In what ways are language, cognition and perception interrelated? Do they influence each other? This book casts a fresh light on these questions by putting individual speakers' cognitive contexts, i.e.

their usage-preferences and entrenched patterns of linguistic knowledge, into the focus of investigation. It presents findings from original experimental research on spatial language use which indicate that these individual-specific factors indeed play a central role in determining whether or not differences in the current and/or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non-linguistic behaviour (visual attention allocation to and memory for spatial referent scenes). These findings form the basis of a new, speaker-focused usage-based model of linguistic relativity, which

defines language-perception/cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities.

Deconstructing Creole is a collection of studies aimed at critically assessing the idea of creole languages as a homogeneous structural type with shared and peculiar patterns of genesis. Following up on the critical discussion of notions of 'creole exceptionalism' as historical and ideological constructs, this volume tests the basic assumptions that underlie current attempts to present 'creole structure' as a special type, from typological as well as sociohistorical perspectives. The sum of the findings presented here suggests that careful empirical investigation of input varieties and contact environments can explain the structural output without recourse to an exceptional genesis scenario. Echoing calls to dissolve the notion of 'creolization' as a special diachronic process, this volume

proposes that theoretically grounded approaches to the notions of simplicity, complexity, transmission, etc. do not warrant considering so-called 'creole' languages as a special synchronic type.

While in a state of despair after the death of

his brother, the author is visited by Acharya, an Indian mystic. Using astral projection, Acharya takes him out of the physical world onto the astral planes of the 'afterlife'. Each astral plane teaches something new about life and death, karma and the ego. Through a series of meetings with the 'dead' - including his brother - the author comes to realise how irrational it is to fear death. Through his teaching, Acharya opens up a whole vision of life in the world that follows this, a world where anything is possible. Based on notes taken

immediately following out-body experiences, this book is both enlightening and absorbing. It gives the reader a direct insight into the unknown mysteries of life and death.

Innovations by Bosch in the field of diesel-injection technology have made a significant contribution to the diesel boom in Europe in the last few years. These systems make the diesel engine at once

quieter, more economical, more powerful, and lower in emissions. This reference book provides a comprehensive insight into the extended diesel fuel-injection systems and into the electronic system used to control the diesel engine. This book also focuses on minimizing emissions inside of the engine and exhaust-gas treatment (e.g., by particulate filters). The texts are complemented by numerous detailed drawings and illustrations. This 4th Edition includes new, updated and extended information on several subjects including:

History of the diesel engine Common-rail system Minimizing emissions inside the engine Exhaust-gas treatment systems Electronic Diesel Control (EDC) Start-assist systems Diagnostics (On-Board Diagnosis) With these extensions and revisions, the 4th Edition of Diesel-Engine Management gives the reader a comprehensive insight into today's diesel fuel-injection technology.
