The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It

provides guidance for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students' own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines, as well as those training for Professional Development and Management Education qualifications. It will also be useful for postgraduate, MBA and

The importance of databases and information systems to the functioning of 21st century life is indisputable. This book presents papers from the 13th International Baltic Conference on Databases and Information Systems, held in Trakai, Lithuania, from 1- 4 July 2018. Since the first of these events in 1994, the Baltic DB&IS has proved itself to be an excellent forum for researchers, practitioners and PhD students to deliver and share their research in the field of advanced information systems, databases and related areas. For the 2018 conference, 69 submissions were received from 15 countries. Each paper was assigned for review to at least three referees from different countries. Following review, 24

regular papers were accepted for presentation at the conference, and from these presented papers the 14 best-revised papers have been selected for publication in this volume, together with a preface and three invited papers written by leading experts. The selected revised and extended papers present original research results in a number of subject areas: information systems, requirements and ontology engineering; advanced database systems; internet of things; big data analysis; cognitive computing; and applications and case studies. These results will contribute to the further development of this fast-growing field, and will be of interest to all those working with advanced information systems, databases and related areas.

Professor Brendan Gough, Institute of Health and Wellbeing, Leeds Metropolitan University, UK "In just over a decade, Carla Willig's book has become one of the key introductory texts in the field. In addition, there are new chapters on epistemology and interpretation which I think my students will find particularly valuable as these are often the most challenging topics when one is new to qualitative research." Dr David Harper, Reader in Clinical Psychology, University of East London, UK "Once again, Carla Willig has produced a wonderfully clear account of how and why qualitative methods ought be used to answer psychological questions. Not only does Willig examine key theories, ethics and debates surrounding the use and interpretation of qualitative data, she shows us 'how' to do it - step by step, with a tremendous sense of balance and integrity. This new edition covers some of the more recent

debates in qualitative research, contains new examples of how to design, carry out and approach analysis in qualitative methods and lots of useful questions that researchers ask themselves along the way. My students have used Willig's writings on qualitative methods for many years as they can understand and engage with it. There is simply no other equivalent text in psychology to rival Willig's - her clarity, conviction and sheer brilliance in putting difficult ideas on methods into plain language is something students in psychology will relish for a very long time to come." Paula Reavey, Professor of Psychology, London South Bank University, UK "In writing this text originally, Carla Willig argued that, unlike quantitative research (where the aim is to follow a set of rules and get them 'right'), qualitative research

is more about 'having adventures'. From the start it sounds a lot more fun, and certainly a lot more interesting! And it was. Students and lecturers alike appreciate its lively, practical approach, its very clear and elegant writing, its use of clever examples of students' own work and its lucid explanations of the theory underpinning methods and methodologies. This new, third edition is a real triumph. It's more comprehensive and it's bang up to date, with three additional new chapters, more examples of student projects, and overall an even more systematic approach. It is, in my view, the most approachable and person-friendly text around introducing qualitative research in psychology, and a great opportunity to 'boldly go', have adventures, and really get to grips with doing qualitative research." I can't tell him anything. There are too many people looking for me. He's pretty persuasive, though, and he convinces me to go home with him so he can keep me safe from this harsh city where I find myself. It's not my home. It's his. He belongs. I don't. Logan lives with four brothers in the inner city. Yet I've never felt more safe than I do when I'm with him. I want him. But he won't let me have a darn thing, aside from his friendship, unless I'm willing to tell him my secrets.**

**But they're mine, and I can't share them. Not unless I want them to come and get me. Logan She catches my eye because she's so beautiful she takes my breath. But that's not all that I love about her. I love the way she smells. The way she smiles. The way she plays the guitar is unlike anything I have ever seen. She sleeps in my bed every night, and drives me crazy with her touch. But I can't take what she offers because I need all of her. I need for her to tell me her secrets. I need for her to trust me. From the back of the book: She's locked up tight. But he might be the key. Logan Reed is tall, tatted and tempting. Kit's a woman with a mean right hook and**

**a secret. Kit wants a tattoo, but Logan sees more than she intends to share in the drawing of the tat she wants. He sees her in ways no one ever has. Logan's not disabled; but he hasn't spoken in eight years. He hasn't needed to. Until he meets Kit. Logan doesn't know everything about Kit. Kit doesn't know anything about herself, until she has to sacrifice all she ever wanted to save what's most important to him.**

*proposal is now in a thoroughly revised second edition. It includes new guidance for developing methodology-specific problem statements, an expanded discussion of the literature review, coverage of the four-chapter dissertation model, and more. "Let's Start Writing" exercises serve as building blocks for drafting a complete proposal. Other user-friendly features include case-study examples, checklists, and practice tests. Appendices include an exemplary proposal written three ways to demonstrate quantitative, qualitative, and mixed methods approaches"--*

*Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases--such as sets of teachers, staff development sessions, or clinics operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three*
