America's favorite cat behavior expert, author of Catwise and Cat vs. Cat, offers the most complete resource for cat owners of all stripes, now fully updated. "The queen of cat behavior" – Steve Dale, author of My Pet World Think it's impossible to train a cat? Think again! By learning how to think like a cat, you'll be amazed at just how easy it is. Provides instructions and training techniques for teaching your cat a variety of tricks, including rolling over, climbing ladders, and ringing bells. The book tells the story of how we never evolved to exercise – to do voluntary physical activity for the sake of health. Using his own research and experiences throughout the world, the author recounts how and why humans evolved to walk, run, dig, and do other necessary and rewarding physical activities while avoiding needless exertion. Drawing on insights from biology and anthropology, the author suggests how we can make exercise more enjoyable, rather than shaming and blaming people for avoiding it

Have you ever wondered what your cat is thinking or trying to tell you in his language? For many of us, cat language feels foreign, difficult to understand, and even harder to decipher. We all know about the effects that an untrained cat can have on our stress levels and wallet. Proper training and care can make it easy to raise a well-behaved and loving companion. More often than not, cats can have tricks to solve behavior problems that can easily escalate with time. Due to their nature, cats can sometimes seem unpredictable and apparently less inclined to cooperate with us. Here's some of what you can expect to learn inside the pages of this book: Learn what triggers bad behaviors and what training mistakes to avoid so you can accelerate the learning process. Understanding what your cat is trying to tell you in his language and completely eliminate guesswork. How to potty train your cat so that he doesn't turn your entire house into his own litter box. How to make older cats accept new members of the family without any unwanted behaviors. Learn how short or long training sessions should be based on your cat's age. This is very important! Proper training can have a lot of good benefits on the health and stress levels of your beloved companion. Your cat will thank you for it. The best moment to start with cat training is right now. Don't let those bad habits continue to sink in! What are you waiting for? Bad behaviors and habits can be tricky to revert the more you let your kitten get away with them. You'll have your cat performing like a stage star in no time!

Perhaps you thought training a cat was an impossible task. Maybe you think your cat's too independent, too stubborn or too wild. Not so! In 50 Ways to Train Your Cat, author Sally Franklin's easy training methods keep feline instincts in mind. You can achieve wonderful results by working with your cat's nature rather than against it. At the same time you'll create a deeper bond with your cat through increased interaction and positive reinforcement. Among other things, your cat will learn to leave the curtains alone, climb up-and down!-a tree and get along with dogs. More precocious cats can try tricks like swimming and retrieving. Sally Franklin's methods proceed at a cat's own pace, and bring even the most difficult skills within your cat's reach. By spending just a few minutes each day, you'll make life with your cat easier, happier and more fulfilling.

Clicker training includes the use of a clicker as a reward or encouragement when training a cat.Cats can relate with the clicker, displaying right actions and behavior. Clicker training is often linked with the current condition, where cats associate the sound with food and operational health and where cats execute movements for food.A clicker is found to be more effective than a verbal command because cats can hear clicker sounds more clearly than a voice, as human voice tones change while the clicker sound is always steady or constant.The click is brief and concise, whereas a voice, phrase or a word, is relatively long in cats' point of standing. To say 'good boy!' will lead time than a click.And BUY & READ this book, if you want more!THIS BOOK INCLUDING: cat training, cat training collar, cat training toilet, cat training clicker, cat training treats, cat training pads, cat training alarm, cat training air blaster, cat training aids, cat training book, cat training air blaster with sensor, cat training books bestsellers, cat training bottle, cat training box, cat training bowl, cat training collar with remote, cat training crates, cat training collar, cat training device, cat training DVD, cat training equipment, cat training for toilet, cat training food, cat training gloves, cat training apparatus, cat training in 10 minutes, cat training is accessible, cat training kit, cat training litter, cat training litter box, cat training laser, cat training mat, cat training motion sensor, cat training noise, cat training potty, cat training products, cat training pee, cat training remote, cat training spray, cat training sound, cat training stick, cat training spray bottle, cat training

This handbook will help veterinary clinicians and their staff to manage cases of poisoning in dogs and cats. It will also help answer enquiries about potential poisonings received from concerned pet owners. The content has been compiled from over 15 000 past cases referred to the Veterinary Poisons Information Service - a 24-hour information service for veterinary surgeons. The VPIS experience is compared and contrasted with case data and reports from the literature to provide a comprehensive overview of both toxicity and management for the agents included. Each agent, or group of agents, has a separate chapter covering its effects in either the cat or the dog. In some cases the species information is combined where the clinical effects and management are identical. The chapters provide all the information necessary for the immediate management of a particular poisoning case. This includes doses at which clinical intervention is advisable and dosing regimens and indications for any drug therapy required. Thus the user will be able to access quickly all the information needed for an emergency situation without having to refer to other sources.
