Both of their parent breeds, the Cavalier King Charles Spaniel and the Bichon Frise, are well-loved because of how personable and cute they are. Given how friendly and snuggly their parents are, it is no surprise that the Cavachon is an ardent cuddle pup that loves little more than to be with the family. With their small stature, they make an incredibly versatile dog that fits into any environment with ease. If you have a small home and want a dog that can easily be accommodated within a

limited space, the Cavachon is perfect. When you are sitting down and enjoying your favorite TV show, your Cavachon will happily cuddle up on your lap. Petting your pup will become a secondary reaction to sitting, and it can be very relaxing. This is one reason why Cavachons also make great therapy dogs. They tend to love everyone, and their happy energy is more sedate than other small dogs. This does not mean they don't love adventure –they just appreciate relaxing with you because being with you is what makes them happiest. If you are the more adventurous type, the Cavachon is still a great dog to have because they are so curious. With their intelligence, they will be more than happy to go out hiking with you. Seven days, seven notes, one devastating family secret. Relentlessly twisting, Samantha King's debut novel is a dark and brilliant slice of psychological suspense in which even the happiest family can awake to a nightmare . . . Maddie Castle is broken. Ever since the tragedy that struck on her twins' tenth birthday, she's been trying to fit the pieces together, to get back to the life she led before. Maddie, her husband, Dom, and their children, Aidan and Annabel, lived in a comfortable

Now, a disoriented and grieving Maddie floats like a ghost through each day, hardly sleeping, eating, or speaking. It's easier to stay locked in her own head than to torment herself by reliving what happened. And yet, the harder Maddie tries to pin down her memories, the more they slip out of reach. Is her guilt and remorse justified? Is it Maddie's fault that everything was ripped apart? Or could it be that the real terror is still to come.

Kane Morgan, the SFPD inspector renting space in the art co-op next door, initially suspects Miki had a hand in the man's murder, but Kane soon realizes Miki is as much a victim as the man splattered inside the GTO. As the murderer's body count rises, the attraction between Miki and Kane heats up. The complete story of the universe and absolutely everything in it (minus the boring parts). Despite our clever linguistic abilities, humans are spectacularly ill-equipped to comprehend what 's happening in the universe. Our senses and intuition routinely mislead us. came to suppress our monkey minds and perceive the true nature of reality. Written with wit and humor, this brief book tells the story of science—tales of fumbles and missteps, errors and egos, hard work, accidents, and some really bad decisions—all of which have created the sum total of human knowledge. Geneticist Adam Rutherford and mathematician Hannah Fry guide readers through time and space, through our bodies and brains, showing how emotions shape our view of reality, how our minds tell us lies, and why a mostly bald and curious ape decided to begin poking at the fabric of the universe. Rutherford and Fry shine as science sleuths, wrestling with some truly head-scratching questions: Where did time come from? Do we have free will? Does my dog love me? Hilarious sidebars present memorable scientific oddities:
