What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn. Empirical literature in this area increasingly analyzes this complex collection of factors in isolation, when a larger sample size of comparative institutional contexts can help assess the impact of the procedures, norms, and rules on key institutional decisions, such as how appeals are decided. Four basic institutional questions from a comparative perspective help address these studies regardless of institutional context or government framework. Who decides, or how is a justice appointed? How does an appeal reach the court; what processes occur? Who is before the court, or how do the characteristics of the litigants and third parties affect judicial decision-making? How does the court decide the appeal, or what institutional norms and strategic behaviors do the judges perform to obtain their preferred outcome? This book explains how the answers to these institutional questions largely determine the influence of political preferences of individual judges and the degree of cooperation among judges at a given point in time. The authors apply these four fundamental institutional questions to empirical work on the Supreme Courts of the US, UK, Canada, India, and the High Court of Australia. The ultimate purpose of this book is to promote a deeper understanding of how institutional differences affect judicial decision-making, using empirical studies of supreme courts in countries with similar basic structures but with sufficient differences to enable meaningful comparison.

The perfect gift! A specially priced, beautifully designed hardcover edition of The Joy of the Gospel with a foreword by Robert Barron and an afterword by James Martin, SJ. “The joy of the gospel fills the hearts and lives of all who encounter Jesus... In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church’s journey in years to come.” – Pope Francis This special edition of Pope Francis's popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for “the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned,” the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, “to recognize the traces of God’s Spirit in events great and small.” Profound in its insight, yet warm and accessible in its tone, The Joy of the Gospel is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. This dogmatic study addresses two perennial questions. First, how do we reconcile God's sovereignty with human freedom, not just in general, but particularly with respect to the Church's full understanding of God's plan of salvation as a work of grace? Second (and equally crucial) is the question of how we reconcile God's universal salvific will with the mystery of predestination, election, and reprobation. The author of this study does theology within the normative tradition of confessional Catholicism, and thus in the light of Catholic teaching. But this study is also an ecumenical work, indeed, a work in receptive ecumenism, and hence he listens attentively to the reflections and arguments not only of his fellow Catholic theologians (Matthias Joseph Scheeben and Hans Urs von Balthasar) but also theologians of the Evangelical and Reformed traditions (John Calvin, Herman Bavinck, Karl Barth, and G. C. Berkouwer). This book concludes with a Catholic synthesis regarding the doctrine of divine election in dogmatic and ecumenical perspective.
