Since the early 1990s, Europe's economies have been facing several new challenges: the single market programme, the collapse of the Berlin wall and eastward enlargement, and monetary unification. Building on the influential Varieties of Capitalism (VoC) perspective, first elaborated in detail in the book Varieties of Capitalism (OUP, 2001), this book critically analyzes these developments in the European political economy and their effects on the continental European economies. Leading political economists from Europe and the US debate how VoC can help understand the political-economic challenges that Europe is facing today and how understanding these new challenges can in turn enrich and enhance the VoC perspective. Thematically, the contributions to this volume are organised in four sections: \* how the macro-economics of EMU have influenced different European models of capitalism, \* how the Single Market programme was received in the different institutional regimes in European capitalism, \* how welfare and labour market reforms are debated and implemented, \* how European capitalism travelled east after 1989. Preceding this is a spirited defence of the VoC approach by Peter Hall, and an introduction from the volume editors, considering the approach, and proposing extensions and amendments. This book demonstrates that the VoC approach remains, as the editors put it in their introduction, a rich seam to mine, capable of accommodating new developments, and theoretically flexible enough to produce new and innovative hypotheses and arguments.

Towards the Single Employment Contract

**Forty years ago Amartya Sen introduced to the world a novel approach to the idea of equality: the notion of 'basic capability' as 'a morally relevant dimension' and the claim that we should focus upon equality of basic capabilities ('a person being able to do certain basic things'). These ideas, as developed by Sen and Martha C. Nussbaum, have launched an academic armada now proceeding under the flag of the 'capability approach' (CA). While that flag has ventured far and wide and engaged many areas of inquiry, this volume of essays is the first to explore how CA might shed light upon labour law. The capabilities approach can illuminate our understanding of labour law across three dimensions. Part I looks at the nature of the basic relationship between CA and labour law-do they share common ground or disagree about what is important? Can the CA provide a normative 'foundation' for labour law? Part II goes further by examining the relationship of the CA and other well-established perspectives on labour law, including economics, history, critical theory, restorative justice, and human rights. Part III examines the possible relevance of the CA to a range of specific labour law issues, such as freedom of association, age discrimination in the workplace, trade, employment policy, and sweatshop goods.**

Also available as an e-book The book argues that the decision-making processes within international organizations and other global governance bodies ought to be subjected to procedural and substantive legal constraints that are associated domestically with the requirements of the rule of law. The book explains why law — international, regional, domestic, formal or soft — should restrain global actors in the same way that judicial oversight is applied to domestic administrative agencies. It outlines the emerging web of global norms designed to protect the rights and interests of all affected individuals, to enable public deliberation, and to promote the legitimacy of the global bodies. These norms are being shaped by a growing convergence of expectations of global institutions to ensure public participation and representation, impartiality and independence of decision-makers, and accountability of decisions. The book explores these mechanisms as well as the political and social forces that are shaping their development by analysing the emerging judicial practice concerning a variety of institutions, ranging from the UN Security Council and other formal organizations to informal and private standard-setting bodies.

This book examines the concept of the single employment contract, tracing it from its genesis and evaluating its pros and cons in the context of the current labour market problems in selected European countries. The book adopts a comparative approach to examining the single employment contract, highlighting its virtues and revealing its inherent contradictions. The authors set out the general framework within which the current debate has developed by outlining the origins that gave rise to the proposal of a single employment contract. They then review the debate on labour market segmentation and the flexicurity proposal, and examine the key characteristics of the single employment contract as well as the arguments put forward both for and against it. Case studies show how the idea has been taken up in France, Italy and Spain. The book concludes with a concise review of contractual arrangements in EU labour markets and of possible future projections and developments. The book is aimed at academics

and practitioners interested in labour market and labour legislation reforms. The book is a co-publication between Hart Publishing and the International Labour Organization.

***The Bulletin is an annual peer-reviewed journal of the Transport and Tourism Division of the Economic and Social Commission for Asia and the Pacific (ESCAP). It provides a medium for the sharing of knowledge, experience, ideas, policy options and information on the development of transport infrastructure and services in the Asia-Pacific region. This edition is devoted to issue related to women and transport. Six articles included in the publication share views on gender issues in transport based on the outcome of research and analytical studies and experiences from a number of countries, and discuss important policy issues related to the subject.***

***L'opera offre per ogni istituto del Diritto e processo del lavoro uno spaccato della dottrina e della giurisprudenza che consente agli operatori pratici di avere una conoscenza completa dei problemi che riguardano la vita dei lavoratori e degli imprenditori. Il Trattato 'Diritto e processo del lavoro e della previdenza sociale' è collocato nella collana Omnia di Trattati di Utet Giuridica - Wolters Kluwer. Tra le novità principali di questa ottava edizione si ricordano: il decreto dignità introdotto nel 2018 dal legislatore che ha ridotto da 36 a 12 mesi l'uso del contratto a tempo determinato; la sentenza della Corte Cost. n. 194 del 2018 che ha ritenuto costituzionalmente illegittima la norma del D.lgs. n. 23 del 2015 che adottava come unico parametro l'anzianità di servizio per determinare il risarcimento del danno in caso di licenziamento illegittimo e da ultimo la sentenza della Corte Cost. n. 150 del 2020; la Legge n. 128/2019 di conversione del D.L. 101/2019, che ha introdotto norme a tutela di coloro che lavorano attraverso piattaforme digitali ed in particolare dei riders (v. Cass. 24 gennaio 2020, n. 1663); da ultimo la recentissima normativa anti Covid che affronta, tra i tanti temi: smart working; sospensione e proroga dei licenziamenti; tutela della salute dei lavoratori; trattamenti di integrazione salariale (Decr. Cura Italia 17.03.2020 conv. con L. 24.04.2020 n. 27; Decr. Rilancio 19.05.2020 n. 34, conv. in L. 17.07.2020 n. 77; D.L. 14.08.2020, n. 104); semplificazioni operative per le imprese (Decr. From the author of Persepolis, comes this illustrated fairy tale. Rose is one of three daughters of a rich merchant who always brings gifts for his girls from the market. One day Rose asks for the seed of a blue bean, but he fails to find one for her. She lets out a sigh in resignation, and her sigh attracts the Sigh, a mysterious being that brings the seed she desired to the merchant. But every debt has to be paid, and every gift has a price, and the Sigh returns a year later to take the merchant's daughter to a secret and distant palace.

New technologies?digitalization, artificial intelligence, and machine learning?are changing the way work gets done at an unprecedented rate. Helping people adapt to a fast-changing world of work and ameliorating its deleterious impacts will be the defining challenge of our time. What are the gender implications of this changing nature of work? How vulnerable are women ' s jobs to risk of displacement by technology? What policies are needed to ensure that technological change supports a closing, and not a widening, of gender gaps? This SDN finds that women, on average, perform more routine tasks than men across all sectors and occupations?tasks that are most prone to automation. Given the current state of technology, we estimate that 26 million female jobs in 30 countries (28 OECD member countries, Cyprus, and Singapore) are at a high risk of being displaced by technology (i.e., facing higher than 70 percent likelihood of being automated) within the next two decades. Female workers face a higher risk of automation compared to male workers (11 percent of the female workforce, relative to 9 percent of the male workforce), albeit with significant heterogeneity across sectors and countries. Less well-educated and older female workers (aged 40 and above), as well as those in low-skill clerical, service, and sales positions are disproportionately exposed to automation. Extrapolating our results, we find that around 180 million female jobs are at high risk of being displaced globally. Policies are needed to endow women with required skills; close gender gaps in leadership positions; bridge digital gender divide (as ongoing digital transformation could confer greater flexibility in work, benefiting women); ease transitions for older and low-skilled female workers.

The book discusses how labour law and welfare systems will be affected by the ongoing transformation of work. The first section considers demography from two

different perspectives. On the one hand, it focuses on chronic diseases and their impact on work, emphasising the role and the regulation of welfare systems. On the other, attention is given to youth unemployment and to those forms of employment which might have an impact on young people. Section II touches upon the relationship between the environment and industrial relations, while the third part broaches the topic of the impact of technology in the context of the Fourth Industrial Revolution, also known as Industry 4.0. As such, this volume provides an exhaustive picture of the changes currently underway, considering all the aspects which will affect work now and in the future.

This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference – in both conceptual and legal terms – that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which – in accordance with the programmatic approach of Marco Biagi – will also feed the debate at the national level.

Il testo unico dell'apprendistato e le nuove regole sui tirocini

Analisi del Testo unico sulla disciplina dell'apprendistato, valevole sia per il settore privato che pubblico. Normativa sui tirocini formativi e di orientamento.

L'idea di un commentario al Contratto collettivo per il settore metalmeccanico sottoscritto nel febbraio di quest'anno trova la propria origine da un lato nella centralità storica del settore nel nostro sistema di relazioni industriali, dall'altro nel fortissimo ricordo di uno studente di Giurisprudenza (il sottoscritto) che, nell'affrontare l'esame di Diritto del lavoro trovò tra i materiali "Commento al contratto collettivo nazionale 1° maggio 1976 per i lavoratori addetti all'industria metalmeccanica privata", con contributi di P.G. Alleva, F. Carinci, G. Giugni, G.F. Mancini, P. Tosi, 1978, per i tipi di Zanichelli 1. E a seguire può anche essere ricordato, nel 2010, il Commentario al contratto collettivo dei metalmeccanici del 2008, curato da Massimo Roccella e Gianni Garofalo per Cacucci. Insomma, il Ccnl da "oggetto astratto" di studio nell'ambito della disciplina diviene "soggetto", protagonista della vita scientifica e pratica della materia giuslavoristica.
