The team of teachers and mathematicians who created Eureka Math™ believe that it's not enough for students to know the process for solving a problem; they need to know why that process

Historically,  
teachers have  
exercised  
considerable  
autonomy in the  
day-to-day  
learning that  
occurs in their  
classrooms. Now,

# Online Library Ccss Pacing Guides

it is growing increasingly rare for a teacher to experience this type of professional freedom. In response to high-stakes testing, national and state academic content standards, and most recently the

# Online Library Ccss Pacing Guides

common core standards, pacing guides are one of the more recent devices schools are using to implement and monitor curriculum. The purpose of this research project is to investigate teacher opinion

# Online Library Ccss Pacing Guides

toward these  
pacing guides. An  
online survey  
called the Pacing

delivered to  
secondary regular  
and special

teachers in core  
subject areas of  
mathematics,  
science, social
