This essential book on fly tying will teach anyone how to tie flies. All the important techniques are illustrated with color photographs, from starting the thread on the hook to whip finishing. The book lays the basic ground work by fully explaining simple tying techniques, and then progresses to detailed tying instructions for some of the most popular, modern patterns. How to choose and prepare the correct material, and all the necessary tying steps for each fly, are detailed in superb, large, color photographs. Even if you have no previous tying experience, you'll be able to tie dries, nymphs, streamers, saltwater offerings, and bass bugs after just a few sessions with this book. The tyer is then advised how to progress to similar patterns using the same basic techniques. Also included is a huge reference of fly patterns - more than four hundred flies from the Orvis catalog are shown in full color, along with the tying recipes and proportions for each one. This book, drawing from the Orvis Company's vast resources and teaching experience and written by an author whose name is synonymous with Orvis, has become the bible for fly-tyers of all skill levels.

The IEMA Handbook

The Orvis Fly-Tying Guide Rowman & Littlefield

Environmental Management in Organizations

Environmental issues can present some daunting operational concerns for all types of organization, whether in the private, public and voluntary sectors. Managing them requires environmental professionals with a working knowledge of the rapidly developing body of regulatory measures. This new edition of Environmental Management in Organizations provides all the management tools, performance measures and communication strategies that organizations need to manage their environmental responsibilities effectively. Leading experts on each topic provide focused explanations and clear practical guidance, as well as setting out the context and the key environmental and management drivers. This edition significantly updates the original handbook to take account of developments in the environmental agenda, including new dedicated chapters on climate change, energy, transport, biodiversity and chemicals. Published with IEMA.
