The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer ' s unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are completely revised to reflect the shifting experiences of cultural groups in our society.

For the savvy educator, assessment can be a powerful tool for informing teaching decisions, improving student learning, and helping students achieve learning standards. Learn how to make the most of assessment with Assessment-Driven Instruction in Physical Education. With this text and web resource, you ' ll learn how to develop assessments and gather information that helps you monitor student progress, structure effective lessons, and make grading more accurate and systematic. Assessment-Driven Instruction in Physical Education: A Standards-Based Approach to Promoting and Documenting Learning shows you how to use standards-based assessment to advance and support student learning in middle and high school physical education programs. In this text, authors Lund and Veal, both experienced physical education teachers and teacher educators, help readers not only understand assessment concepts and applications but also develop the skills to implement assessment. Assessment-Driven Instruction in Physical Education can be used in a methods class, in an assessment class, or for in-service teacher education. It contains numerous examples of assessments and unique practice tasks that help teachers develop assessment skills. Current and future teachers can use these practice tasks to apply their knowledge to specific teaching situations and design their own assessments as they move through the text. Readers will also gain knowledge and strategies for assessing the psychomotor, cognitive, and affective domains based on current assessment research aligned with National Association for Sport and Physical Education (NASPE) standards. To help those new to the assessment process, this text includes chapters on managing assessment, using data to improve learning, and using assessments to assign a fair grade—information not found in most texts on assessment and measurement. An accompanying web resource contains assessment-building practice tasks in a convenient downloadable format, offering an accessible and efficient way to develop knowledge and skills in assessment.

With Assessment-Driven Instruction in Physical Education, teacher candidates and current educators can solidify their knowledge of assessment concepts as they learn to design and use high-quality assessments. Assessment-Driven Instruction in Physical Education can help teachers make assessment a meaningful tool for informing instructional choices, promoting student learning, and documenting learning.
