

to be fully prepared for tomorrow's medical assisting profession, then look no further than Today's Medical Assistant! Consistent and meticulous coverage throughout the main text, Evolve resources, study guide, and SimChart for the Medical Office provide reliable content and unparalleled accuracy on the responsibilities of the modern medical assistant. The most up-to-date information and insights on key topics such as: electronic medical records (EMR), HIPAA, and advanced directives documentation, evaluation & management, office and hospital services (billing & coding) emergency preparedness ICD-10 coding medical office technology medical asepsis, OSHA Bloodborne Pathogens Standard: AIDS & Hepatitis, latex gloves, immunization information, IM injection (theory), child abuse colonoscopies IV therapy CLIA waived tests Unique learning aids throughout the book include: procedure charting examples outlines, detailed learning objectives, and key terms for each chapter Highlight boxes What Would You Do? What Would You Not Do? boxes Patient Teaching boxes On the Web Practice boxes Memories from Practicum boxes glossary of key terms Arsenal of engaging activities on the Evolve companion site gives users a fun way to practice their medical assisting knowledge. Over 120 procedures give readers clear, illustrated guidance on each step of every procedure. The procedural videos on the Evolve companion site enable users to view grade reading level makes material approachable and easy to understand for all types of readers. Full-color design makes the book visually stimulating. NEW! Chapter on nutrition underscores the CAAHEP curriculum's emphasis on nutrition by covering all of the latest nutritional information that pertains to today's medical assistants. NEW! Updated chapters on emergency medical records ensure readers are up to date on the latest advances and rulings in these topical areas. NEW! Updated content aligned to the most recent CAAHEP and ABHES competencies ensures readers have the latest information needed to obtain employment and long-term success on the job. NEW! Expanded resources on Evolve now include videos, video evaluations, and examinations for the CMA, RMA, CMAA, and CMAA. NEW! Tie-in with SimChart for the Medical Office links important text content to opportunities for hands-on practice working on Elsevier's educational EHR. NEW! Updated photographs and illustrations give readers a closer look at today's most pertinent information and skills for the medical assistant. NEW! Expanded sections give readers ample terminology reinforcement, including proper pronunciations.

Now in full color, Manual of Equine Reproduction, 3rd Edition provides a comprehensive look at the reproductive management of horses, including management of stallions, pregnant mares, and neonatal foals. Expert authors use a concise, practical approach in discussing improved therapies and treatments in equine breeding. You'll enhance your skills and knowledge coverage of techniques used in reproductive examination, breeding procedures, pregnancy diagnosis, foaling, and reproductive tract surgery. A clinical emphasis includes a step-by-step format of possible scenarios from conception to breeding management. Practical information includes topics such as breeding with transported cooled or frozen semen, and caring for a foal. The organization of material corresponds to the course of study in veterinary school, so you can find topics easily. Chapter objectives and study questions at the beginning of each chapter guide you through the material and provide clear learning goals. Evaluation of Breeding Records chapter covers the importance of breeding records, and how to use them to optimize fertility. References are listed at the end of each chapter for further research and study. Full-color photographs and illustrations clearly depict procedures, and all drawings have been redrawn and improved. NEW Assisted Reproductive Technology chapter goes beyond embryo transfer. Updated content includes the latest advances in therapies and treatment chapters, Reproductive Physiology of the Nonpregnant Mare and Manipulation of Estrus in the Mare. Thorough coverage of every aspect of equine reproduction provides a strong foundation for success in veterinary practice, including a discussion of the use of GnRH-analog deslorelin (Ovuplant) to hasten ovulation; aseptic technique for endometrial biopsy; use of triptorelin especially in early pregnancy; determination of fetal gender by transrectal ultrasonography; aspiration testicular biopsy using a spring-loaded biopsy instrument; and procedure for surgical embryo transfer.

The success of Assisted Reproductive Technology is critically dependent upon the use of well optimized protocols, based upon sound scientific reasoning, empirical observations and evidence of clinical efficacy. Recently, the treatment of infertility has experienced a revolution, with the routine adoption of increasingly specialized molecular biological techniques and ac manipulation of gametes and embryos. This textbook - inspired by the postgraduate degree program at the University of Oxford - guides students through the multidisciplinary syllabus essential to ART laboratory practice, from basic culture techniques and micromanipulation to laboratory management and quality assurance, and from endocrinology to molecular biology. Written for all levels of IVF practitioners, reproductive biologists and technologists involved in human reproductive science, it can be used as a reference manual for all IVF labs and as a textbook by undergraduates, advanced students, scientists and professionals involved in gamete, embryo or stem cell biology.

Comprehensive Medical Terminology

Disease Control Priorities, Third Edition (Volume 2)

A Review for Nurses, Medical Assistants, Other Healthcare Professionals and Well Informed Patients

A textbook of the diseases of cattle, horses, sheep, pigs and goats

Laboratory Manual for Clinical Anatomy and Physiology for Veterinary Technicians

Clinical and Administrative Procedures

Easy to read, well organized, and focused on high-yield content, Human Histology, 5th Edition, features concise, up-to-date coverage of the core knowledge in this complex field. Ideal for students in all areas of health care, this revised edition is aligned with recent developments in integrated and problem-based learning, providing rapid access to relevant, practical knowledge in histology. It provides students with opportunities to make important connections between histological knowledge, cell biology, anatomy, clinical understanding, and assessment. Features an easy-to-navigate, full-colour layout that includes summary headings, readable text, quick-reference tables, and key facts - all highlighted by nearly 900 clear illustrations, photos, and graphics throughout. Covers the latest concepts and advances in histology including developments in the primary cilium, the nuclear pore, extracellular matrix components, dendritic spines, subsets of astrocytes, haematopoiesis, classification of cells in the immune system, macrophage subsets, and much more. Includes NEW self-assessment questions. Provides just the right amount of detail for maximum readability and retention. Highlights key laboratory, clinical, and high-level scientific material in boxes. Presents advanced concepts such as the molecular and functional relevance of histological features. Provides review material in the book and online, self-assessment questions plus 180 additional review questions online. Evolve Instructor Resources, including a downloadable image and test bank, are available to instructors through their Elsevier sales rep or via request at: <https://evolve.elsevier.com>

Master the art and science of specimen collection, preparation, and evaluation with Canine & Feline Cytology: A Color Atlas and Interpretation Guide, Second Edition. This easy-to-use guide covers all body systems and fluids including a special chapter on acquisition and management of cytology specimens. Hundreds of vivid color images of normal tissue alongside abnormal tissue images - plus concise summaries of individual lesions and guidelines for interpretation - will enhance your ability to confidently face any diagnostic challenge. A greatly expanded image collection, with more than 1,200 vivid, full-color photomicrographic illustrations depicting multiple variations of normal and abnormal tissue for fast and accurate diagnosis Clear, concise descriptions of tissue sampling techniques, slide preparation and examination guidelines Helpful hints for avoiding technical pitfalls and improving diagnostic quality of specimens Includes all body systems and fluids as well as pathological changes associated with infectious agents Histologic and histopathologic correlates provided in all organ system chapters. User-friendly format and logical organization facilitates readability and learning. Expert contributors represent the most respected leaders in the field. NEW! Chapter on Fecal Cytology Highlighted boxes featuring Key Points provide helpful tips for best conceptual understanding and diagnostic effectiveness Photomicrographs now include more comparative histology Discussions of broader uses of stains and immunocytochemistry for differential cytologic characterization Expanded chapter on Advanced Diagnostic Techniques includes more methodology and application of current tools, representing advances in both aspiration and exfoliative cytology.

Reproductive Pathology of Domestic MammalsElsevier

Fundamentals of Assessment and Care Planning For Nurses All nursing students are required to meet the seven standards produced by the Nursing & Midwifery Council (NMC) before being entered onto the professional register. Fundamentals of Assessment and Care Planning for Nurses addresses two of these important standards, helping readers become proficient in assessing patient needs, and planning, providing and evaluating care. This timely publication adopts a practical approach with NMC proficiencies at its core, providing guidance and insight into the application of key skills and demonstrating competency in real-life settings. Centres around a fictitious nuclear family to provide a practical basis to the various chapters and assessment Offers mnemonics to enable comprehensive history taking and systematic physical assessment Helps readers address socio-cultural considerations they may face in practice Includes links to literature that provides further support and additional information Fundamentals of Assessment and Care Planning for Nurses is an important resource for pre-registration nursing students and Nursing Associates who are required to demonstrate proficiency in the new NMC standards, and other registered practitioners seeking to update their knowledge. All content reviewed by students for students. Wiley Health Science books are designed exactly for their intended audience. All of our books are developed in collaboration with students. This means that our books are always published with you, the student, in mind. If you would like to be one of our student reviewers, go to www.reviewnursingbooks.com to find out more.

Essentials of Medical Terminology

Outdoor Emergency Care: A Patroller's Guide to Medical Care

Anatomy and Histology of the Laboratory Rat in Toxicology and Biomedical Research

Reproductive, Maternal, Newborn, and Child Health

Use this study tool to master the content from your Today's Medical Assistant: Clinical & Administrative Procedures, 2nd Edition textbook! Corresponding to the chapters in the textbook by Kathy Bonewit-West, Sue Hunt, and Edith Applegate, this study guide helps you understand and apply the material with practical exercises, activities, flashcards, checklists, review questions, and more. Chapter assignment tables at the beginning of chapters guide you through textbook and study guide assignments, and make it easy to track your progress. Laboratory assignment tables list the procedures in each chapter, including study guide page number references, and indicate the procedures shown on the DVDs. A pretest and posttest in each chapter measure your understanding with 10 true/false questions. Key term assessments include exercises to help in reviewing and mastering new vocabulary. Evaluation of Learning questions let you assess your understanding, evaluate progress, and prepare for the certification examination. Critical thinking activities let you apply your knowledge to real-life situations. Practice for Competency sections offer extra practice on clinical skills presented in the book. Evaluation of Competency checklists evaluate your performance versus stated objectives and updated CAAHEP performance standards. Updated content includes exercises for topics such as electronic medical records, advanced directives, HIPAA, emergency preparedness, ICD-10 coding, documentation, medical office technology, medical asepsis, vital signs, pediatrics, colonoscopy, IV therapy, and CLIA waived tests. New activities provide practice for the Today's Medical Assistant textbook's newest and most up-to-date content. New Emergency Protective Practices for the Medical Office chapter includes procedures, critical thinking questions, and other activities to help you understand emergency preparedness. New Wheelchair Transfer Procedure and Evaluation of Competency checklist includes a step-by-step guide to this important procedure. New video evaluation worksheets on the Evolve companion website reinforce the procedures demonstrated on the textbook DVDs. New practicum and externship activities on Evolve provide practice with real-world scenarios.
