One of the most important works of twentieth-century American literature, Zora Neale Hurston's beloved 1937 classic, *Their Eyes Were Watching God*, is an enduring Southern love story sparkling with wit, beauty, and heartfelt wisdom. Told in the captivating voice of a woman who refuses to live in sorrow, bitterness, fear, or foolish romantic dreams, it is the story of fair-skinned, fiercely independent Janie Crawford, and her evolving selfhood through three marriages and a life marked by poverty, trials, and purpose. A true literary wonder, Hurston's masterwork remains as relevant and affecting today as when it was first published -- perhaps the most widely read and highly regarded novel in the entire canon of African American literature.

This book takes an extensive look at the many different types of users and cultures that comprise the popular social media platform Tumblr. Though it does not receive nearly as much attention as other social media such as Twitter or Facebook, Tumblr and its users have been hugely influential in creating and shifting popular culture, especially progressive youth culture, with the New York Times referring to 2014 as the dawning of the "age of Tumblr activism." Perfect for those unfamiliar with the platform as well as those who grew up on it, this volume contains essays and artwork that span many different topics: fandom; platform structure and design; race, gender and sexuality, including queer and trans identities; aesthetics; disability and mental health; and social media privacy and ethics. An entire generation of young people that is now beginning to influence mass culture and politics came of age on Tumblr, and this volume is an indispensable guide to the many ways this platform works.

At some point in their lives, most people will have thought: “He should never have said that” “How could she treat me this way?” “I feel guilty when I remember what I said to him” “I’m so angry I can’t bear it” Usually, we don’t feel that we can discuss these hurtful emotions, such as guilt, anger or jealousy, with our friends and families, let alone go to a GP for advice on dealing with them. We’re a nation that bottles things up, dismissing anger, frustration, hatred and guilt as largely insignificant to our minds and bodies. But powerful emotions like these do affect us in a long-term way, not only mentally but also physically, and it’s important to know how to get them under control before our health really suffers. This easy-to-follow, plain-English guide shows you why and how emotions can leave a physical scar, and talks about various life factors and influences that can lead to emotional stress. It will help you heal your emotional traumas with a toolkit of strategies, and allows you to take care of your health with a practical, hands-on approach. This book aims to help consumers and practitioners develop the skills to assess health advice - and hopefully to make decisions that will improve the quality of their care. For some people, making better-informed decisions could be life saving. We hope that it will be useful if you are struggling to come to terms with an illness or injury, and the best ways of managing it. Or you may simply want to lead a healthier life, and may be wondering how to make sense of the often conflicting flood of health information that deluges us every day, through the media, and from our friends and health practitioners.

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.

WONDERS OF TIME AND ETERNITY “And to them will I reveal all mysteries...Yea, even the wonders of eternity shall they know...And their wisdom shall be great, and their understanding reach to heaven; and before them the wisdom of the wise shall perish, and the understanding of the prudent shall come to naught. For...by my power will I make known unto them...things which eye has not seen, nor ear heard, nor yet entered into the heart of man. ” (D&C 76:7-10) Knowledge is key to healing the physical body. This is a fact that no one disputes. There have been countless theories and experimental explorations in an attempt to bring forth the knowledge needed to heal . Modern science is beginning to show that the spiritual end of things is just as important as the physical in regard to health. Yet they still fail to use the most important information for this type of knowledge on the earth. For the most part, the world ignores vital information in scriptures and words of the prophets, seeing it as separate from the problems in health they are trying to solve, when the truth of the matter is that they contain the patterns, clues, and information most pertinent to true science and true healing. This book is an exploration of that science discovered through research and hands-on experience in the fields of energy work, physics, anatomy, physiology, Chinese philosophy, scriptures and other ancient texts, religious principles, and personal revelation. Much of learning is also found as we analyze pertinent parallels presented by nature. As we apply knowledge of how the spiritual and physical realms interact, the body begins to heal itself and we step into our true identity as deity, learning to be as our Heavenly Parents. Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." –New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of Into the Wild. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, Into the Wild is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

Inducted in 1942, Johnson went through pilot training, followed by airborne operations flight training with the 27th Troop Carrier Squadron, 10th Troop Carrier Group. Assignment to the 49th Troop Carrier Squadron, 313th Troop Carrier Wing, for training in Sicily in late 1943 came next. Assigned to the 36th Troop Carrier Squadron, 316th Troop Carrier Group, in November 1943, for training for the Normandy D-Day invasion, followed by support for the invasion and Allied advance across Europe during the summer of 1944. Also during this period, he trained for Operation Market Garden, as part of the armada that dropped the 82nd Airborne Division. His C-47 was shot down during this mission and he became a POW. In addition to detailing his life as a POW, from capture and interrogation to life in Stalag Luft 1A, through liberation, Johnson includes details of what it was like back home for his family, particularly after he was listed as Missing in Action after being shot down, including his parents' efforts at trying to get more details from politicians, the Army and members of his unit in England. A detailed personal account by a C-47 pilot who flew Un-Armed, Un-Armored and Un-Escorted over the skies of Europe, delivering men and materiel where it was needed to defeat the enemy. 35 photos and documents Contents Introduction Prelude: 18 September 1944 Chapter 1: The Beginning: It All Started Here Chapter 2: Induction: U.S. Army, Fort Thomas, Kentucky Chapter 3: Loneliness and Mournful Sounds Chapter 4: Casey Jones School of Aeronautics Chapter 5: A Prophecy Unfolds Chapter 6: Aviation Cadet Days: Part 1, Classification/Pre-Flight/Primary Chapter 7: Aviation Cadet Days: Part 2, Basic —Advanced Chapter 8: Prepare for Combat: Bergstrom Field, Austin, Texas, June-July 1943 Chapter 9: Dunnellon, Florida Chapter 10: This One is for the Birds: Dunnellon, Florida, September 1943 Chapter 11: Off to War Chapter 12: Rain Clock: A Jungle Jaunt, 11 October 1943 Chapter 13: Sicily: Trapani/Milo and Castelvetrano, October 12, 1943-February 15, 1944 Chapter 14: Emerald Isle Interlude Chapter 15: Settling In: Preparing for D-Day Chapter 16: First with the Best: Operation OVERLORD: Airborne Mission, NEPTUNE: Boston-Freeport, June 5-6, 1944 Chapter 17: Between Major Combat Missions Chapter 18: Operation MARKET GARDEN Chapter 19: From Hot Pilot to POW Chapter 20: Interrogation: A Psychological Experience 175 Chapter 21: Dulag Luft Transit Camp, October 1944 Chapter 22: Stalag Luft 1A, Part 1 Chapter 23: Meanwhile Back Home, Part 1 Chapter 24: Stalag Luft 1A, Part 2 Chapter 25: At Last, Homeward Bound Chapter 26: Meanwhile Back Home, Part 2 The Author

The orientlists have been studying the seerah of the prophet with a view to casting doubt and raising suspicions and discrediting the life and personality of the Prophet (saw). Their approach has evolved over the period of time. At times they have been vicious in their attacks as was the case in the 18th century which with time during the 19th and 20th century became seemingly sympathetic to his life. This study by Dr Muhammad Mohar Ali critically analyses the works of three famous orientlists, William Muir, D.S Margoliouth and W. Montgomery Watt. Dr Ali refutes the charges levelled by them against the Prophet (saw) with an erudition which the treatment of such a subject requires. Leviathan or The Matter, Forme and Power of a Common-wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state (“God of the death”). He starts with a postulate about a natural human state (“the war of all against all”) and develops the idea “man is a wolf to a man”. When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

Leadership first, location second As more organizations adopt a remote workforce, the challenges of leading at a distance become more urgent than ever. The cofounders of the Remote Leadership Institute, Kevin Eikenberry and Wayne Turmel, show leaders how to

guide their teams by recalling the foundational principles of leadership. The authors' "Three-O" Model refocuses leaders to think about outcomes, others, and ourselves—elements of leadership that remain unchanged, whether employees are down the hall or halfway around the world. By pairing it with the Remote Leadership Model, which emphasizes using technology as a tool and not a distraction, leaders are now able to navigate the terrain of managing teams wherever they are. Filled with exercises that ensure projects stay on track, keep productivity and morale high, and build lasting relationships, this book is the go-to guide for leading, no matter where people work.

From the Background to the Beginning of the Prophet's Mission

In a neo-liberal era concerned with discourses of responsible individualism and the 'selfie', there is an increased interest in personal lives and experiences. In contemporary life, the personal is understood to be political and these ideas cut across both the social sciences and humanities. This handbook is specifically concerned with auto/biography, which sits within the field of narrative, complementing biographical and life history research. Some of the contributors emphasise the place of narrative in the construction of auto/biography, whilst others disrupt the perceived boundaries between the individual and the social, the self and the other. The collection has nine sections: creativity and collaboration; families and relationships; epistolary lives; geography; madness; prison lives; professional lives; 'race'; and social justice and disability. They illustrate the inter- and multi-disciplinary nature of auto/biography as a field. Each section features an introduction from a section editor, many of whom are established researchers and/or members of the British Sociological Association (BSA) Auto/Biography study group. The handbook provides the reader with cutting-edge research from authors at different stages in their careers, and will appeal to those with an interest in auto/biography, auto-ethnography, epistolary traditions, lived experiences, narrative analysis, the arts, education, politics, philosophy, history, personal life, reflexivity, research in practice and the sociology of the everyday. This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the "macro system." A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.
