

Chapter 2 Page Assessment Milforded Milford

Contains all the formal opinions and accompanying orders of the Federal Power Commission ... In addition to the formal opinions, there have been included intermediate decisions which have become final and selected orders of the Commission issued during such period. Understanding Decision-Making in Educational Contexts presents 'problem cases' confronting school leaders in real settings, and illustrates the multiple approaches that school leaders draw upon to navigate complex and challenging decision-making contexts. Mapping in the Manson Creek-Germansen Landing area was undertaken to provide a detailed geological database for a belt of rocks long known to host lode gold and base metal occurrences. The project produced 1:50,000-scale geological maps for all or part of map sheets 93N/9, 93N/10, 93N/15, and 94C/2; revised the mineral inventory database; placed known mineral occurrences within a geological framework; and augmented existing coverage or initiated new surveys in areas lacking previous coverage. The report describes the geographic setting and framework and exploration history; lithologic units; structure; metamorphism; economic geology; and geological synthesis.

The story of tourism in New Zealand from 1870 through to the end of the 20th century. McClure follows the development of tourist sites and landmark hotels; the Centennial Exhibition, the establishment of the National Film Unit, the Tourist Hotel Corporation and Air New Zealand.

In this long-awaited volume, Jeremy Shearmur and Piers Norris Turner bring to light Popper's most important unpublished and uncollected writings from the time of The Open Society until his death in 1994. After The Open Society: Selected Social and Political Writings reveals the development of Popper's political and philosophical thought during and after the Second World War, from his early socialism through to the radical humanitarianism of The Open Society. The papers in this collection, many of which are available here for the first time, demonstrate the clarity and pertinence of Popper's thinking on such topics as religion, history, Plato and Aristotle, while revealing a lifetime of unwavering political commitment. After The Open Society illuminates the thought of one of the twentieth century's greatest philosophers and is essential reading for anyone interested in the recent course of philosophy, politics, history and society.

The Conservation Legacy of Gifford Pinchot

President John F. Kennedy officially dedicated the Pinchot Institute for Conservation Studies on September 24, 1963 to further the legacy and activism of conservationist Gifford Pinchot (1865-1946). Pinchot was the first chief of the United States Forest Service, appointed by Theodore Roosevelt in 1905. During his five-year term, he more than tripled the national forest reserves to 172 million acres. A pioneer in his field, Pinchot is widely regarded as one of the architects of American conservation and an adamant steward of natural resources for future generations. Author Char Miller highlights many of the important contributions of the Pinchot Institute through its first fifty years of operation. As a union of the United States Forest Service and the Conservation Foundation, a private New York-based think tank,

the institute was created to formulate policy and develop conservation education programs. Miller chronicles the institution's founding, a donation of the Pinchot family, at its Grey Towers estate in Milford, Pennsylvania. He views the contributions of Pinchot family members, from the institute's initial conception by Pinchot's son, Gifford Bryce Pinchot, through the family's ongoing participation in current conservation programming. Miller describes the institute's unique fusion of policy makers, scientists, politicians, and activists to increase our understanding of and responses to urban and rural forestry, water quality, soil erosion, air pollution, endangered species, land management and planning, and hydraulic franking. Miller explores such innovative programs as Common Waters, which works to protect the local Delaware River Basin as a drinking water source for millions; EcoMadera, which trains the residents of Cristobal Colón in Ecuador in conservation land management and sustainable wood processing; and the Forest Health-Human Health Initiative, which offers health-care credits to rural American landowners who maintain their carbon-capturing forestlands. Many of these individuals are age sixty-five or older and face daunting medical expenses that may force them to sell their land for timber. Through these and countless other collaborative endeavors, the Pinchot Institute has continued to advance its namesake's ambition to protect ecosystems for future generations and provide vital environmental services in an age of a burgeoning population and a disruptive climate.

Feedback that works—for leadership that makes a difference. Leaders know that feedback is essential to teacher development. Crafting the right feedback, however, can be daunting. This how-to book introduces a dynamic yet practical leadership model that helps leaders in all roles and at all experience levels conduct comprehensive observations, analyze lessons for effectiveness, and develop high-leverage action steps that change practices and outcomes. Features include Comprehensive explanations of standards and discrete core skills Explicit think-alouds, ready-to-use strategies, and field-tested lesson examples Evidence-collection notes—with templates—from live observations Feedback samples across grade levels and content areas Rebllicable case studies for professional learning

This book provides step-by-step instructions on how to analyze text generated from in-depth interviews and focus groups, relating predominantly to applied qualitative studies. The book covers all aspects of the qualitative data analysis process, employing a phenomenological approach which has a primary aim of describing the experiences and perceptions of research participants. Similar to Grounded Theory, the authors' approach is inductive, content-driven, and searches for themes within textual data.

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.
