Students of Western civilization need more than facts. They need to understand the cross-cultural, global exchanges that shaped Western history; to be able to draw connections between the social, cultural, political, economic, and intellectual happenings in a given era; and to see the West not as a fixed region, but a living, evolving construct. These needs have long been central

the development of the Truman Doctrine and the Marshall Plan. "The fifteen weeks which form the title and subject of this book comprise the period in 1947 when the United States stepped out irrevocably and wholeheartedly as leader upon the world stage.... "The greatness of a nation, like the greatness of an individual, is in the last analysis a mystery. We do not know why at one time immense exertions and far-reaching vision are more prevalent than at others. Yet to look within, to account for the obvious factors in the situation is highly useful. collection of leading international experts to revisit and review our understanding of the Cuban Missile Crisis, via a critical reappraisal of some of the key texts. In October 1962, humankind came close to the end of its history. The risk of catastrophe is now recognised by many to have been greater than realised by protagonists at the time or scholars subsequently. The Cuban missile crisis remains one of the mostly intensely studied moments of world history. Understanding is framed and informed by Cold War historiography, political science and personal experience, written by scholars, journalists, and surviving officials. The emergence of Soviet (later Russian) and other national narratives has broadened the scope of

World History, Volume II: Since 1500 Civilization in the West

The Cold War in the Third World

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times

to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An

exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical “episodes” that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which

societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. Puts world events in a context that is relevant for today's students and casual readers

Updated to include the significant events from the past several years

Winston Churchill was one of the giants of the twentieth century. As Britain's prime minister from 1940 to 1945, he courageously led his nation and the world away from appeasement, into war, and on to triumph over the Axis

dictators. His classic six-volume account of those years, *The Second World War*, has shaped our perceptions of the conflict and secured Churchill's place as its most important chronicler. Now, for the first time, a book explains how Churchill wrote this masterwork, and in the process enhances and often revises our understanding of one of history's most complex, vivid, and eloquent leaders. *In Command of History* sheds new light on Churchill in his multiple, often overlapping roles as warrior, statesman, politician, and

historian. Citing excerpts from the drafts and correspondence for Churchill's magnum opus, David Reynolds opens our eyes to the myriad forces that shaped its final form. We see how Churchill's manuscripts were vetted by Whitehall to conceal secrets such as the breaking of the Enigma code by British spymasters at Bletchley Park, and how Churchill himself edited the volumes to avoid offending postwar statesmen such as Tito, Charles de Gaulle, and Dwight D. Eisenhower. We explore his confusions about the true story of the atomic

bomb, learn of his second thoughts about Stalin, and watch him repackage himself as a consistent advocate of the D-Day landings. In Command of History is a major work that forces us to reconsider much received wisdom about World War II. It also peels back the covers from an unjustly neglected period of Churchill's life, his "second wilderness" years, 1945—1951. During this time Churchill, now over seventy, wrote himself into history, politicked himself back into 10 Downing Street, and delivered some of the most vital oratory

of his career, including his pivotal “iron curtain” speech. Exhaustively researched and dazzlingly written, this is a revelatory portrait of one of the world’s most profiled figures, a work by a historian in full command of his craft. “A fascinating account that accomplishes the impossible: [Reynolds] actually finds something new and interesting to say about one of the most chronicled characters of all time.” –The New York Times Book Review A New York Times NOTABLE BOOK OF THE YEAR A BEST HISTORY OF THE YEAR SELECTION
