# **Chapter 9**

# **Resource Masters**

The fundamental mathematical tools needed to understand machine learning include linear algebra,

## Read Free Chapter 9 Resource Masters

analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science

## Read Free Chapter 9 Resource Masters

students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses

## Read Free Chapter 9 Resource Masters

these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these

## Read Free Chapter 9 Resource Masters

derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes

## Read Free Chapter 9 Resource Masters

worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

The Complete Classroom Set, Print & Digital includes: 30 print Student Editions 30 Student Learning Center
