

Characteristics Of A Good Marking Scheme

This Guide deals with the construction and maintenance practices that will lead to increased safety on local roads and streets. The specific purpose of the Guide, and the associated training course, is to provide local transportation agency personnel with important information related to highway safety features intended for use on roads and streets in rural and small urban areas. The intended uses and functions for each of several safety features are discussed. Examples of both good and poor practices are given.

A seven-step toolkit to help you produce winning essay and assignments, build your confidence and improve your grades.

The Essential Guide to Using the Web for Research

Grounded in the latest research and best practices, THE CHALLENGE OF EFFECTIVE SPEAKING IN A DIGITAL AGE, 17th Edition, emphasizes the role of technology and digital media in all aspects of preparing, presenting, and interpreting public speeches in face-to-face and online environments. This bestseller's proven six Speech Plan Action Steps skillfully guide readers through topic selection, audience analysis and adaptation, research, organization, presentational aids, and language and delivery. In addition, hands-on activities, techniques to address anxiety, ethical dilemma exercises, and critical-thinking prompts help readers sharpen their skills and become confident speakers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"TRB's National Cooperative Highway Research Program (NCHRP) Report 759: Effective Removal of Pavement Markings aids in the selection of safe, cost-effective, and environmentally acceptable practices for the removal of work zone and permanent pavement markings. The practices highlighted in this report emphasize minimal damage to the underlying pavement or visible character of the surface course." -- Publisher's description
This indispensable handbook provides helpful strategies for dealing with both the everyday challenges of university teaching and those that arise in efforts to maximize learning for every student. The suggested strategies are supported by research and adaptable to specific classroom situations. Rather than suggest a "set of recipes" to be followed mechanically, the book gives instructors the tools they need to deal with the ever-changing dynamics of teaching and learning. Available with InfoTrac Student Collections http://goengage.com/infotrac. Ross Morrison McGill, aka @TeacherToolkit believes that becoming a teacher is one of the best decisions you will ever make, but after more than two decades in the classroom, he knows that it is not an easy journey! Packed with countless anecdotes, from disastrous observations to marking in the broom cupboard, TE@CHER TOOLKIT is a compendium of teaching strategies and advice, which aims to motivate, comfort, amuse and above all reduce the workload of a new teacher. The book includes humorous illustrations, photocopiable templates, a new-look 5 minute plan and QR codes to useful videos. This limited edition hardback version will be an invaluable addition to your school CPD library or a long-lasting bible to keep with you throughout your teaching career. As anyone who has followed him on Twitter knows, Ross is not afraid to share the highs and lows of his own successes and failures. He strives to share great teaching practice, to save you time and to ensure you are the best teacher you can be, whatever the new policy or framework. His eagerly-awaited new book continues in this vein and is a must-read for all new teachers. Vitruvian teaching will help you survive your first five years: Year 1: Be resilient (surviving your NQT year) Year 2: Be intelligent (refining your teaching) Year 3: Be innovative (take risks) Year 4: Be collaborative (share and work with others now your classroom practice is secure) Year 5: Be aspirational (moving towards middle leadership) Start working towards Vitruvian today.

It outlines a fresh approach to the archaeological study of the historic cultures of North America.

The Exam Skills Handbook

This text introduces university students to the philosophical ethos of critical thinking, as well as to the essential skills required to practice it. The authors believe that Critical Thinking should engage students with issues of broader philosophical interest while they develop their skills in reasoning and argumentation. The text is informed throughout by philosophical theory concerning argument and communication—from Aristotle’s recognition of the importance of evaluating argument in terms of its purpose to Habermas’s developing of the concept of communicative rationality. The authors’ treatment of the topic is also sensitive to the importance of language and of situation in shaping arguments, and to the necessity in argument of some interplay between reason and emotion. Unlike many other texts in this area, then, Good Reasons for Better Arguments helps to explain both why argument is important and how the social role of argument plays an important part in determining what counts as a good argument. If this text is distinctive in the extent to which it deals with the theory and the values of critical thinking, it is also noteworthy for the thorough grounding it provides in the skills of deductive and inductive reasoning; the authors present the reader with useful tools for the interpretation, evaluation and construction of arguments. A particular feature is the inclusion of a wide range of exercises, rich with examples that illuminate the practice of argument for the student. Many of the exercises are self testing, with answers provided at the back of the text; others are appropriate for in-class discussion and assignments. Challenging yet accessible, Good Reasons for Better Arguments brings a fresh perspective to an essential subject.

This book will be vital reading for anyone doing research, since using the web to find high quality information is a key research skill. It introduces beginners and experts alike to the most effective techniques for searching the web, assessing and organising information and using it in a range of scenarios from undergraduate essays and projects to PhD research. Nigel Ford shows how using the web poses opportunities and challenges that impact on student research at every level, and he explains the skills needed to navigate the web and use it effectively to produce high quality work. Ford connects online skills to the research process. He helps readers to understand research questions and how to answer them by constructing arguments and presenting evidence in ways that will enhance their impact and credibility. The book includes clear and helpful coverage of beginner and advanced search tools and techniques, as well as the processes of: @critically evaluating online information @lcreating and presenting evidence-based arguments @!organizing, storing and sharing information @!referencing, copyright and plagiarism. As well as providing all the basic techniques students need to find high quality information on the web, this book will help readers use this information effectively in their own research. Nigel Ford is Professor in the University of Sheffield’s Information School.

Kevin Lister’s Teach Like You Imagined It: Finding the right balance shares a wealth of tools, ideas and encouragement to help teachers manage the conflicting pressures of teaching and become the educators they imagined. Teaching is an incredible profession, but it also comes with a potentially toxic workload. You do not have to put up with burn-out, however and one way to avoid it is to return to how you imagined teaching to be in the first place. Before you became a teacher, you pictured yourself as a teacher; in your imagination you almost certainly saw yourself as happy, efficient and able to manage your worklife balance effectively. Yet chances are that the reality of teaching is a little different, and it is this disconnect that can give rise to stress, anxiety and frustration. But what if you could use simple strategies to get a handle on your schedule and take control of your workload? Covering lesson planning, behaviour management, the streamlining of marking and getting the best out of CPD, Kevin Lister has drawn on his background in engineering to fill this book with trusted techniques and savvy suggestions to help you maximise your productivity and teach like you imagined it. Each chapter examines a different aspect of the day-to-day reality of teaching and suggests alternative, practical ways to look at or approach common tasks. Throughout the book Kevin touches on topics such as time management, prioritisation, educational research, leadership, psychology and other diverse concepts that his personal experiences and education have led him to explore. After each area of discussion there are prompts for action, where Kevin asks you to reflect on your working habits, question your practices and decide what you will do in response. Suitable for both new and experienced teachers looking to boost their day-to-day efficiency and find the right balance.
