SOUND OF THE CROWD: A DISCOGRAPHY OF THE '80s is the ultimate record collector's guide to the 1980s. In the era of multi-formatting, picture discs, coloured vinyl, multiple remixes, funny shaped records and tiny CDs you could lose down the back of the sofa, this book lists every format of every single, EP and album released in the UK in the 1980s by over 140 of the decade's biggest acts, from ABBA to Paul Young. This fourth edition has been fully revised and expanded to include even more acts than ever before, with additional sections to cover Band Aid-style charity congregations and compilation albums from the early '80s K-Tel efforts through to the Now That's What I Call Music series and its competitors. Compiled by Steve Binnie, editor of the '80s music website Sound of the Crowd and writer, producer and co-host of the unconventional '80s chart show Off The Chart, broadcast weekly on Mad Wasp Radio.

How to Lie with Charts
Fourth Edition

On 14 November 1952, the New Musical Express published the first British singles chart. In the 60 years since, 20744 records have entered the top 40. This book lists the 1000 biggest of those hits. The list is calculated solely from chart positions, not sales figures. These are the biggest chart performers, not the biggest sellers. Indeed, "Candle In The Wind 1997" by Elton John, the biggest selling single ever in the UK, is only at no. 119 in this list.

This book is not just another technical analysis textbook. It'll lead the readers into a new dimension of technical analysis that you would not find in other books. The author, William Chan, discusses his charting style involving pivotal technical studies/indicators to build a comprehensive analysis that can readily be used for trading. Unlike others, Bill's technical analysis approach serves to uncover two fundamental precepts. First, the charting style engages dynamic channels to cope with today's algorithmic trading impacts. Second, the charting style, when mastered and abided by, can bring forth a systematic list cataloging all potential hidden risks visually. Whereby, investors can steer away from them in their investment decision making. The book illustrates how risk mitigation is the identification of support/resistance. The charting scheme employs key technical studies/indicators working side by side to expose all the hidden risks. Readers will be amazed by the amount of risks that this methodology reveals in a single stock chart. One may feel this work is unnecessary. The fact remains that traders are subjected to ALL legitimate risks whether they are clearly identified on a stock chart or not. As we can't possibly keep track of all those potential risks, it still makes sense to characterize them - minimizing any shock to the investors' bottom line unexpectedly. Moreover, it is not uncommon even for seasoned traders to make wrong investment decisions simply because they fail to identify those hidden supports/resistances either due to ignorance or otherwise. A price chart inherently bears full of traps that investors can fall into. This book expounds on what those risks are and how to deal with them through analysis. Many investors feel program trading is based on some mysterious programming logic. Can anyone explain why statistics finds its way into technical analysis tools? This book substantiates evidence of two statistical charting studies - standard deviation channel and linear regression channel - with continuous computation, embedded in every stock chart. They, therefore, form the basis of our underlined technical analysis. The author vindicates why some traditional technical analysis techniques are not effective in a digital market and how private investors must act and adopt in order to be profitable. This book demonstrates the effectiveness of the unpopular intraday charts on how they can be utilized to improve a trader's precise timing in trade execution. Having covered the various essential charting techniques and features, the author delineates how the finished product can enable one to identify profit opportunities on stock charts, provided that he/she can locate the active trend accurately and conduct the analysis adhering to the guidelines cited in the book.

Children working the cocoa plantations for Americas chocolate. Would you ever dream of such abuse happening to five-year-old boys and girls, children being worked worse than animals on the cocoa plantations to get the cocoa bean, the main ingredient in chocolate, to America. The cocoa beans are covered with the blood, sweat, and tears of five-year-old children sold for slave labor to work on the cocoa plantations. Everyone has limited freedoms, even in America. We protect our children. They dont have to work on cocoa plantations like five-year-old children in Africa. What should we do about the children who are being abused? Laws are in place. The International Labor Organization, Convention laws, and the Convention of the Rights of the Child, these laws are not being enforced. American people want chocolate but are not aware of the abuse taking place on the Ivory Coast of Africa and Ghana, where 60 percent of the cocoa beans in the world are produced on the cocoa plantations. The cocoa plantations on the Ivory Coast of Africa and Ghana are noted as being the worst form of child slavery in the history of the world. Five-year-old children are working one hundred hours a week. Children are sold into slavery and will never have a childhood or education. The 4 Untold Trading Indicators (How to Make Money in Stocks - Trading for a Living)

Sarah Palin, abortions, global warming and Usain Bolt. The CEO of Apple, 35 trillion gun deaths in 1995, Fox News and 193%. This book has got scandals galore! With 9 witty chapters taking you on a roller coaster tour of graphical lies, pictorial deceptions and pie charts of mayhem, this might just be the most entertaining book about graphs you'll read this year. Did you know that between them, Sarah Palin, Mike Huckabee and Mitt Romney enjoyed a total of 193% support from Republican candidates in the 2012 US primaries? It must be true – it was on a pie chart broadcast on Fox News. Did you also know that the number 34 is smaller than 14, and zero is much bigger than 22? Honest, it's true, it was published in a respectable national newspaper after the 2017 UK General Election. There can't have been any kind of misdirection here because they were all shown on a pie chart. In this astonishing book, award winning statistician and author Lee Baker uncovers how politicians, the press, corporations and other statistical common use graphs and charts to deceive their unwitting audience. Like how a shocking, and yet seemingly innocuous statement as “Every year since 1950, the number of children gunned down has doubled”, meant that there should have been at least 35 trillion gun deaths in 1995 alone, the year the quote was printed in a reputable journal. Or how an anti-abortion group made their point by trying to convince us all that 327,000 is actually a larger number than 935,573. Nice try, but no cigar – we weren't born yesterday. In his trademark sardonic style, the author reveals the secrets of how the statistical hustlers use graphs and charts to manipulate and misrepresent for political or commercial gain – and often get away with it. Written as a layman's guide to lying, cheating and deceiving with graphs, there's not a dull page in sight! And it's got elephants in it too...
