**Honest Weight** is the 20th century story of Toledo Scale, beginning with their fight in the first decade for weights and measures laws to outlaw dishonest scales. In narrative form, it tells the living history of the company, beginning with the founder after he was dramatically fired by National Cash Register Company. Henry Theobald then started a scale and cash register company to compete with his old boss, the legendary John Patterson of NCR. It’s the story of the inventors, leaders, craftsmen and technical breakthroughs, beginning in the first year of the 20th century up to current times. Included is the story of the innovative sales techniques developed by Theobald that led to tight-fisted merchants being willing to spend four and five times as much for a Toledo “No Springs–Honest Weight” scale than for the scale it replaced. This led to Toledo becoming the best known scale brand in the nation. It includes the story of how a plastic came to be developed for Toledo Scale under the leadership of the company’s second president Hubert Bennett that led him to establish a separate, wholly owned company. This company, Plaskon, became the largest plastic company in the United States for a brief time. It tells of Toledo Scale’s World War II contributions in which the company played a top-secret part in the production of the Norden bombsight and the atomic bomb. The story includes quotations from both retired company executives and current employees. It includes information obtained from an unpublished factual manuscript covering the company’s first 50 years, other company archives and the Toledo Blade. A dozen historical photos are displayed, which include the first DeVilbiss computing scale, a Toledo Cash Register, and a Phinney scale which was the first patented computing scale. A few Phinney scales were manufactured in 1870. Since Toledo Scale couldn’t locate one to prove they were actually manufactured, they lost a huge lawsuit to Dayton Scale that almost broke the company. Also shown is a photo of Norman Bel Geddes’ 1929-30 radical designs of a new factory and plant campus for Toledo Scale, never built due to the depression. The story includes the transition to electronic scales begun by the company’s third president Harris McIntosh. This transition was completed in the final quarter of the century. And finally, the human story that resulted from the evolution of several different ownership’s is told, until just a few years ago, Toledo Scale disappeared as a separate brand and was merged into Mettler-Toledo, Inc.

Traces the life of the Southern novelist and looks at her relationship to a circle of modern writers that included Euroda Welty and Scott Fitzgerald

A warning, a movement, a collection borne of protest. In Watch Your Head, poems, stories, essays, and artwork sound the alarm on the present and future consequences of the climate emergency. Ice caps are melting, wildfires are raging, and species extinction is accelerating. Dire predictions about the climate emergency from scientists, Indigenous land and water defenders, and striking school children have mostly been ignored by the very institutions – government, education, industry, and media – with the power to do something about it. Writers and artists confront colonization, racism, and the social inequalities that are endemic to the climate crisis. Here the imagination amplifies and humanizes the science. These works are impassioned, desperate, hopeful, healing, transformative, and radical. This is a call to climate-justice action. Edited by Madhur Anand, Stephen Collis, Jennifer Dörner, Catherine Graham, Elena Johnson, Canisia Lubrin, Kim Mannix, Kathryn Mockler, June Pak, Sina Queyras, Shazia Hafiz Ramji, Rasiqra Revulva, Yusuf Saadi, Sanchari Sur, and Jacqueline Valencia Proceeds will be donated to RAVEN and Climate Justice Toronto.

The acclaimed Korean author weaves a “disturbing, beautifully controlled” metaphysical detective story “of doubles, shadows, and parallel worlds” (Financial Times). It’s Ayami’s final day working the box-office at Seoul’s only audio theater for the blind. Her last shift completed, she walks the streets with her former boss, searching for a missing friend. Their conversations take in art, love, food, and the inaccessible country to the north. The next day, Ayami acts as a guide for a detective novelist visiting from abroad. But as they contend with the summer heat, the edges of reality start to fray. Ayami enters a world of increasingly tangled threads, and the past intrudes upon the present as overlapping realities repeat, collide, change, and reassert themselves. Blisteringly original, Untold Night and Day upends the very structure of narrative storytelling. By one of the boldest and most innovative voices in contemporary Korean literature, and masterfully realized in English by Man Booker International Prize–winning translator Deborah Smith, Bae Suah’s hypnotic novel asks whether more than one version of ourselves can exist at once.

**Public and situated display technologies can have an important impact on individual and social behaviour and present us with particular interesting new design considerations and challenges. While there is a growing body of research exploring these design considerations and social impact this work remains somewhat disparate, making it difficult to assimilate in a coherent manner. This book brings together the perspectives of key researchers in the area of public and situated display technology. The chapters detail research representing the social, technical and interactional aspects of public and situated display technologies. The underlying concern common to these chapters is how these displays can be best designed for collaboration, coordination, community building and mobility. Presenting them together allows the reader to examine everyday display activities within the context of emerging technological possibilities.**

**International Electronics Directory '90, Third Edition: The Guide to European Manufacturers, Agents and Applications, Part 1 comprises a directory of various manufacturers in Europe and a directory of agents in Europe. This book contains a classified directory of electronic products and services where both manufacturers and agents are listed. This edition is organized into two sections. Section 1 provides details of manufacturers, including number of employees, production program, names of managers, as well as links with other companies. The entries are listed alphabetically on a country-by-country basis. Section 2 provides information concerning agents or representatives, including names of manufacturers represented, names of managers, number of employees, and range of products handled. A number of these companies are also active in manufacturing and so appear in both Section 1 and Section 2. This book is a valuable resource for private consumers.**

**"Contrary to what some people think, an education and background in chemistry prepares you for much more than just a laboratory career. The broad science education, logical and analytical thinking, research methods, and other professional skills are of value to a wide variety of employers, and are essential for a plethora of positions. In addition, those who are interested in chemistry tend to have some similar personality characteristics, which lead to success in certain types of positions. Realizing these two things opens up a world of possibilities for the professional chemist, and allows the selection of a career path that truly is the best fit for your own personal skills, abilities, and interests.""**Each chapter in this book provides background information on a nontraditional field and a variety of positions within that field, including typical tasks, education or training requirements, and personal characteristics that contribute to a successful career. Each chapter also contains detailed profiles of several chemists who have achieved success and personal satisfaction in various types of positions in that field. These interesting and varied career histories explain how these chemists got where they are, details what motivates them, and gives advice for others considering the same path, in both the short and long term.""**Specific career fields profiled include communication, chemical information, patents, sales and marketing, business development, regulatory affairs, public policy, safety, human resources, and computers, among others. Along the way you will learn how to seek out and evaluate new career options, so even if none of the careers profiled is right for you, you can continue the exploration on your own until you find the one that is.**"--Back cover.

“ Courageous, achingly honest.” —Michelle Alexander, New York Times bestselling author of The New Jim Crow: Mass Incarceration in the Age of Colorblindness “ A compelling, incisive and thoughtful examination of race, origin and what it means to be called an American. Engaging, heartfelt and beautifully written, Lythcott-Haims explores the American spectrum of identity with refreshing courage and compassion. ” —Bryan Stevenson, New York Times bestselling author of Just Mercy: A Story of Justice and Redemption A fearless memoir in which beloved and bestselling How to Raise an Adult author Julie Lythcott-Haims pulls no punches in her recollections of growing up a black woman in America. Bringing a poetic sensibility to her prose to stunning effect, Lythcott-Haims briskly and stirringly evokes her personal battle with the low self-esteem that American racism routinely inflicts on people of color. The only child of a marriage between an African-American father and a white British mother, she shows indelibly how so-called “micro” aggressions in addition to blunt force insults can puncture a person’s inner life with a thousand sharp cuts. Real American expresses also, through Lythcott-Haims ’ s path to self-acceptance, the healing power of community in overcoming the hurtful isolation of being incessantly considered “the other.” The author of the New York Times bestselling anti-helicopter parenting manifesto How to Raise an Adult, Lythcott-Haims has written a different sort of book this time out, but one that will nevertheless resonate with the legions of students, educators and parents to whom she is now well known, by whom she is beloved, and to whom she has always provided wise and necessary counsel about how to embrace and nurture their best selves. Real American is an affecting memoir, an unforgettable cri de coeur, and a clarion call to all of us to live more wisely, generously and fully.

Changes in library and information services management is entering a new age of accountability and the provision of information, even in the more traditional library settings, is no longer accepted by funding authorities as inherently good. Library and information science professionals must now justify their existence, and basic concepts of quality management can be applied to library and information services units with success.

This book is written for practitioners in the profession and covers TQM practices, programmes, customer care and more, showing how the ideas and techniques can work in a service environment.

*The first in a new series from the “wicked-hot”\* author of Hard Time and Give It All explores the fantasies of a daring married couple—and those of a stranger invited to play along in their scandalous little games... When he’s working, Mike Heyer is all business—every inch the alpha male, with the hard, capable body to back up his persona. But at home he can be a different man entirely, harboring appetites only his wife gets to glimpse... When Samira first learned of her husband’s fantasies, she was reluctant, even alarmed. But after witnessing the way they set him on fire, she yielded, and happily indulged. As their games have intensified, so has the rush. And now so has the risk—they’re poised to take Mike’s indecent desires to the next level, by opening their bed to a sexy, brazen stranger. A man seeming custom-made to grant every last one of Mike and Samira’s sinful wishes. Welcoming someone new into their lives was always a dangerous proposition, but the couple imagined if anything was at stake, it was their privacy...not their hearts. \*New York Times Bestselling Author Jaci Burton*
