Bedfordshire lace became popular in the fashions of the second half of the nineteenth century because of the beauty of its bold-open designs, often with elegant floral motifs to fascinate and captivate lacemakers today. This practical book is dedicated to the novice and experienced lacemaker wishing to learn these techniques so as to realize their own designs. Information is given about the equipment needed for bobbin lacemaking, how to make a pricking (the pattern on which the lace is made), and how to wind the bobbins. Instruction explains how to work cloth stitch and half stitch, plaits, windmill crossings, picots and leaf-shaped tallies, and how to finish a piece of lace. There is a series of patterns, some traditional and others designed more recently. These are supported by instructions, photographs and diagrams. The patterns include small motifs, edgings - some for handkerchiefs - butterflies and, finally, three exquisite collars.

Reissue of this practical guide to the craft of weaving shuttle lace. Contains comprehensive step-by-step methods of tatting, with numerous exercises, sketches, diagrams. Includes a bibliography and glossary of foreign words.
