

Child Protection Policies And Procedures Toolkit Unicef

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Child Protection Systems is a comparative study of the social policies and professional practices that frame societal responses to the problems of child maltreatment in ten countries: USA, Canada, England, Sweden, Denmark, Finland, Belgium, the Netherlands, Germany and Norway. Focusing on the developments in policy and practice since the mid-1990s, this volume provides a detailed, up-to-date analysis of the similarities and differences in how child protection systems operate and their outcomes. The findings highlight the changing criteria that define child maltreatment, trends in out-of-home placement, professional responses to allegations of maltreatment, and the level of state responsibility for child and family welfare, providing an in-depth understanding of the different ways modern welfare states assume the sensitive responsibility of balancing children's rights and parents' rights. The changing character of child protection systems worldwide reflects dramatic and rapid organizational, policy, and legislative changes; the expansion of child welfare systems; the rise of formal procedures and evidence-based initiatives; the increased challenges posed by race and ethnicity; and the extent to which countries adopt either a child protection or a family service approach to child abuse. Each chapter analyzes these developments and the directions in which they are heading, such as movements toward privatization and devolution of child welfare service delivery. Against this backdrop, a third approach begins to emerge-a child-focused orientation-that aims to promote and improve children's development and well-being. A vital book for understanding contemporary trends and policy issues in the design of child protection systems, this will be must reading for comparative scholars of child welfare, family policy, and the welfare state.

This open access book critically explores what child protection policy and professional practice would mean if practice was grounded in human rights standards. This book inspires a new direction in child protection research - one that critically assesses child protection policy and professional practice with regard to human rights in general, and the rights of the child in particular. Each chapter author seeks to approach the rights of the child from their own academic field of interest and through a comparative lens, making the research relevant across nation-state practices. The book is split into five parts to focus on the most important aspects of child protection. The first part explains the origins, aim, and scope of the book; the second part explores aspects of professionalism and organization through law and policy; and the third part discusses several key issues in child protection and professional practice in depth. The fourth part discusses selected areas of importance to child protection practices (low-impact in-house measures, public care in residential care and foster care respectively) and the fifth part provides an analytical summary of the book. Overall, it contributes to the present need for a more comprehensive academic debate regarding the rights of the child, and the supranational perspective this brings to child protection policy and practice across and within nation-states. .

Good Practice in Safeguarding Children considers how front-line professionals can keep the best interests of the child at the heart of their work when statutory guidance, the way agencies are integrated and the delivery of services are changing. Liz Hughes and Hilary Owen have drawn together contributors' experiences of working with safeguarding children on a broad range of issues, including neglect, trafficked children, parents with learning difficulties and child protection supervision. The contributors discuss current dilemmas in safeguarding children work and provide models of good practice, including case scenarios and exercises. This book explores how changes in the system offer an opportunity to enhance the quality of service provision, to achieve better outcomes for children and their families. This book is a must-read book for all front-line practitioners involved in safeguarding children, including social workers, child and adolescent mental health practitioners, police officers, healthcare professionals, probation workers and teachers. It is also suitable for undergraduate, post-graduate and post-qualifying students.

This volume gives concise, practical and expert advice on the care of children and young people in a family context. Coverage of basic principles and emergency protocols will enable any nurse to deliver safe and effective care.

Provides support for students studying for the CACHE Level 3 Child Care and Education qualification. This work features an index to help students find just what they're looking for. It also includes case studies, activities and photos that help students to apply their learning, develop professional skills, and reflect on their practice.

Child protection is one of the most high profile and challenging areas of social work, as well as one where children's lives and family life are seen to be at stake. Vital as child protection work is, this book argues that there is a pressing need for change in the understanding and consequent organization of child protection in many English speaking countries. The authors present compelling evidence from around the globe demonstrating that systems across the Western world are failing children, families and social workers. They then set out a radical plan for reform: Providing an overview of contemporary child protection policies and practices across the English speaking world Presenting a clear and innovative theoretical framework for understanding the problems in the child protection system Developing an alternative, ethical framework which locates child protection in the broader context of effective and comprehensive support for children, young people and families at the neighbourhood and community levels Grounded in the recent and contemporary literature, research and scholarly inquiry, this book capitalises on the experiences and voices of children, young people, families and workers who are the most significant stakeholders in child protection. It will be an essential read for those who work, research, teach or study in the area.

This handbook, authored and edited by a multidisciplinary team of child abuse experts, is designed for use by a group that will be formulating policies and procedures to protect children and deal with possible child abuse in their ministry, school, and/or church. Working through this book will assist churches and ministries to assess their current child abuse policies and then guide them through each step they need to take to address the safety of children under their care. It will cover vitally important topics including: Protecting the children in a Christian environment from child abuse The warning signs of child abuse Crafting and implement a child protection policy Responding to abuse allegations Caring for victims of child abuse The legal implications and requirements for churches and Christian ministries Written by a GRACE team with multi-disciplinary knowledge, headed by Boz Tchividjian, a lawyer and former child abuse prosecutor, this handbook will be an invaluable resource to Christians who are seeking to educate themselves and others about child abuse and how to best protect the little ones under their care.

This book is a valuable resource for all those involved in EYTS and will be useful for: - EYTS trainees - their mentors - their placement tutors - course lecturers - EYTS assessors

Churches have always sought to be a safe haven for children and families, but many today are dealing with the tragic reality of child sexual abuse. For the first time in history, this issue is finally being acknowledged by churches and faith communities. But the task of developing a policy to keep children safe can seem too overwhelming—it feels like an impossible task to plan for every contingency. This results in churches neglecting to put working safety plans in place, leaving themselves, and the children they care for, vulnerable. This handbook, supported by a multidisciplinary

team of child abuse experts, is designed to help churches and faith communities formulate policies and procedures to protect children and deal with possible child abuse in their ministries, school, and church. By walking through a wide range of scenarios, this book will assist churches and ministries to assess their current child abuse policies and guide them through each step they should take to address the safety of children under their care. Covering vitally important topics including the warning signs of abuse, how to respond to abuse allegations and care for victims, and the legal implications and requirements for churches and Christian ministries, working through this book will guide churches and Christian ministries in creating and implementing policies to protect children in a Christian environment from child abuse. This handbook is an invaluable resource for Christians who are seeking to educate themselves and others about child abuse and how they can best protect the little ones under their care.

This book identifies and analyses differences between the four UK nations in the way child protection systems are being developed, thought about and put into practice. Covering key areas such as inter-agency working and the role of local safeguarding children boards, it draws out important implications for policy and practice across the UK.

In recent decades, advances in biomedical research have helped save or lengthen the lives of children around the world. With improved therapies, child and adolescent mortality rates have decreased significantly in the last half century. Despite these advances, pediatricians and others argue that children have not shared equally with adults in biomedical advances. Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research, we do not want to place children at risk of being harmed by participating in clinical studies. Ethical Conduct of Clinical Research Involving Children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it. It also considers problems with the interpretation and application of these standards and conduct, concluding that while children should not be excluded from potentially beneficial clinical studies, some research that is ethically permissible for adults is not acceptable for children, who usually do not have the legal capacity or maturity to make informed decisions about research participation. The book looks at the need for appropriate pediatric expertise at all stages of the design, review, and conduct of a research project to effectively implement policies to protect children. It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular.

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, Under-standing Child Abuse and Neglect, which provided an overview of the research on child abuse and neglect. New Directions in Child Abuse and Neglect Research updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. New Directions in Child Abuse and Neglect Research recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. New Directions in Child Abuse and Neglect Research identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

This study seeks to provide a critical analysis of child protection policies in Egypt and examine whether these policies are based on the rights-based model of child protection that is embodied in the Convention for Child Rights (CRC). It identifies the ways in which these policies fail to link child rights and child protection and thus are unable to provide integrated and accessible services that meet children's needs. *Cairo Papers in Social Science* 30:1

Child welfare program standards based on current knowledge, children's developmental needs, and tested ways of meeting these needs most effectively provide benchmarks of excellence that can be used as goals to advance and guide contemporary practice. This book delineates standards for services for abused or neglected children and their families. The standards were developed by the Child Welfare League of America (CWLA), based on extended discussion of principles and issues by experts in social work and related fields and critical review of a preliminary statement by CWLA member agencies, representatives of related professions, and other national organizations. The book discusses how to use the standards and differentiates the standards from accreditation and licensing. The book's introduction describes the origins of child protection efforts; the child protection policy framework; and practice, program, and policy issues in child protection. A new framework for child protection is also presented. The bulk of the book is comprised of the goals and standards for services and is organized in the following chapters: (1) "Protective Service for Abused or Neglected Children and Their Families"; (2) "Social Work Practice in Child Protective Services"; (3) "Working Together To Keep Children Safe: A Community Responsibility"; (4) "Working with the Civil and Criminal Justice Systems in Protecting Children"; (5) "Organization and Administration of Child Protective Services"; and (6) "Protecting Children in Settings Outside of Their Families or Homes." Also included in the book is a glossary of relevant terms. Contains approximately 100 references. (KB)

Child Protection in the Church investigates whether, amidst publicised promises of change from church institutions and the introduction of "safe church" policies and procedures, reform is actually occurring within Christian churches towards safeguarding, using a case study of the Anglican Diocese of Tasmania, Australia. Through the use of interviews and document analysis, the book provides an insight into the attitudes and practices of "ordinary clergypersons" towards child sexual abuse and safeguarding to understand how safe ministry is understood and executed in everyday life in the Church, and to what extent it aligns with policy requirements and criminological best practice. It adopts organisational culture theory, the perspective used to explain how clerical culture enabled and concealed child sexual abuse in the Church to the present, in order to understand how clerical attitudes (cognition) and practice (conduct) today is being shaped by some of the same negative cultures. Underlying these cultures is misunderstandings of abuse causation, which are shown here to negatively shape clerical practice and, at times, compromise policy and procedural requirements. Providing an insight into the lived reality of safeguarding within churches, and highlighting the ongoing complexities of safe ministry, the book is a useful companion to students, academics, and practitioners of child protection and organisational studies, alongside clergy, church leaders, and those training for the ministry.
