

## Children The Modern Law Legal Practice Course Resource

In recent years there has been a flourishing body of work on the Law of Treaties, crucial for all fields within international law. However, scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized. One concerns the inv fundamental to or inherent in the law of treaties generally - such as consent, object and purpose, breach of obligation and provisional application - while the other focuses upon the application of treaties and of treaty law in particular substantive (e.g. human rights, international protection, environmental regulation) or institutional contexts (including the Security Council, the World Health Organization, the International Labour Organization and the World Trade Organization). This volume represents the culmination of a series of collaborative explorations operation, development and effectiveness of the modern law of treaties, as viewed through these contrasting perspectives.

This book examines how child protection law has been shaped by the transition to late modernity and how it copes with the ever-changing concept of risk. The book traces the evolution of the contemporary child protection system through historical changes, assessing the fact development of legal responses to abuse over a 130-year period. It does so by focussing on the Republic of Ireland where child protection has become emblematic of wider social change. The work draws on a wide range of primary and secondary sources including legislation, ca reports of child protection inquiries. It also utilises insights developed through an extensive examination of parliamentary debates on child protection matters. These materials are assessed through the lens of critical discourse analysis to explore the relationship between law, so effect child protection. While the book utilises primarily Irish sources, this multidisciplinary approach ensures the argument has international applicability. The book will be a valuable resource for all those with an interest in the development of child protection law.

In mid-sixteenth-century England, people were born into authority and responsibility based on their social status. Thus elite children could designate property or serve in Parliament, while children of the poorer sort might be forced to sign labor contracts or be hanged for arson eighteenth century, however, English and American law began to emphasize contractual relations based on informed consent rather than on birth status. In *By Birth or Consent*, Holly Brewer explores how the changing legal status of children illuminates the struggle over consen America. As it emerged through religious, political, and legal debates, the concept of meaningful consent challenged the older order of birthright and became central to the development of democratic political theory. The struggle over meaningful consent had tremendous political affecting the whole order of society. It granted new powers to fathers and guardians at the same time that it challenged those of masters and kings. Brewer's analysis reshapes the debate about the origins of modern political ideology and makes connections between Reformatio philosophy, and democratic political theory.

One of the aims of the United Nations Convention on the Rights of the Child is to accord due recognition to the fact that 'the child, by reason of his physical and mental immaturity, needs special safeguards and care, including appropriate legal protection, before as well as after hangs over the extent to which 'special safeguards and care' can negatively impact on the rights of the child and result in discrimination against the child in the guise of 'his physical and mental immaturity'. This volume explores the extent to which children's rights are secured a reasons why children's rights have or have not been recognised and secured by various states at the level of domestic law. It also explores the difficulties inherent in the accordance of rights to children in order to ascertain whether they do in fact derive from the particular na mask a reluctance of states to fulfil their domestic and international rights obligations to children, and whether such reluctance constitutes 'discrimination against children'. The volume thus explores the theoretical and legal underpinnings of gender and race discrimination, at bo international level, and examines the extent to which these may be applied to the area of children's rights.

Properties of Law  
The Continental Legal History Series  
Family Law  
The Judicial Assessment of Expert Evidence  
An Introduction  
Medical Treatment of Children and the Law

Presented in an accessible format, this text provides a detailed and authoritative exposition of the law, illustrated by carefully selected materials and complemented by clear and engaging commentary drawing on a range of critical and theoretical perspectives.

**Intestate Succession** is the second volume in the **Comparative Succession Law** series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

This book presents an interdisciplinary exploration of the nature of parenthood and its various manifestations in contemporary society.

Kelsen, Hans. *Pure Theory of Law*. Translation from the Second German Edition by Max Knight. Berkeley: University of California Press, 1967. x, 356pp. Reprinted 2002 by The Lawbook Exchange, Ltd. ISBN 1-58477-206-9. Cloth. New. \$95. \* The second revised and enlarged edition, being a completely revised version of the first edition which was published in 1934. Kelsen [1881-1973], was the author of more than forty works on law and legal philosophy, and is best known for this title and *General Theory of Law and State*. He was also the author of the *Austrian Democratic Constitution*, which was published in 1920, abolished during the Nazi regime, restored in 1945, and in force today. Walker calls Kelsen "possibly the most influential jurisprudent of the twentieth century." Walker, *Oxford Companion to Law* 699.

This volume brings together some of the best journal articles of the last twenty years which deal with various aspects of the relationship between parents and children. Adopting an inter-disciplinary and comparative approach, the book reproduces articles from a variety of journals in law and the social sciences. The book is divided into eight parts dealing, respectively, with becoming a parent; the status and obligations of parenthood; issues of upbringing; adolescence; child support; parental separation, divorce and children; child abuse and state intervention; social parenthood and adoption. The volume includes a substantial introduction by the editor.

"This book is a foundational inter-disciplinary volume on children's rights that is relevant to scholars, practitioners, and students with interests in children's rights, human rights, family law, and related topics. With contributions from leading scholars and practitioners in the field of children's rights, this book provides both in-depth analysis of children's rights as a discipline, and maps the critical issues for advancing children's rights today and in the future"--

An invaluable resource for all social workers in practice with children and families, this book examines key issues such as child protection, family support, care planning, adoption and case preparation for court. With illustrative case studies throughout, the text is divided into two sections: " Part 1 explores the legal context of social work practice with children, examining how international human rights standards are absorbed within domestic law. " Part 2 explores the application of the law, policies and systems to individual case work, illustrating rights-based thinking in practice. Accessible to those without a background in law, the book highlights links between social work standards and legal values and rules. With promotion of the rights of children and families a measure of professional competence and legal obligation, the book helps readers satisfy social work standards and use their knowledge of the law to improve their practice. The book is vital reading for all levels of social work student, including those undertaking the post-qualifying award in child care, as well as being an indispensable resource for practitioners working with children and families. Jane Williams is a lecturer in law at the University of Swansea. She specialises in social work law, and children's rights. Other publications include *Children and Citizenship* (SAGE, 2007), co-edited with Antonella Invernizzi.

By Birth or Consent

The Oxford Handbook of Children's Rights Law

The Legal Status of Runaway Children

Elements of Child Law in the Commonwealth Caribbean

A Treatise on the Conflict of Laws, Or Private International Law ...

Children, Law, and the Anglo-American Revolution in Authority

Children Act 1989 introduced the most radical changes to child care law for a generation. Eekelaar and Dingwall provide a concise, practical guide to the legislation for all professionals practising in this area.

After the Cold War, how did China become a global symbol of disregard for human rights, while the U.S positioned itself as the chief exporter of the rule of law? Teemu Ruskola investigates globally circulating narratives about what law is and who has it, and shows how "legal Orientalism" developed into a distinctly American ideology of empire.

The book relates the normativity of law to law's internal sociality and shows the multi-layered nature of legal normativity.

Children: The Modern Law is well-established as the leading textbook dealing comprehensively with the law and policy relating to children. This fourth edition has been extensively revised and updated to take account of

significant legislative, case-law and other developments including: \* Greater recognition being given to social parents, especially same-sex parents, and the Human Fertilisation and Embryology Act 2008 \* The Family Justice Review 2011 and the Government Response 2012 \* Birth registration and the Welfare Reform Act 2009 \* Leading authorities in public law on uncertain perpetrators \* The Narey Report on adoption and case-law on post-adoption contact \* The important decision in *K v K* on relocation in shared care cases Children: The Modern Law is an authoritative study of the legal position of children in our society, and is essential reading for

students of child law, family law and social work.

What is a Parent?

A Textbook of Children's and Young People's Nursing E-Book

Comparative Succession Law

The Modern Law of Evidence

*This volume brings together new essays in law and philosophy on a broad range of topics in children's and family law. It is the first volume to bring together essays by legal scholars and philosophers for an integrated, critical analysis of key issues in this area, marking the 'coming of age' of a comparatively new field of family law. Debates in children's and family law are at once theoretical and empirical in nature. Not only does children's and family law have significant consequences for individuals' intimate lives, the field's impact on lived experience highlights the socially constructed nature of law. Approaching this area of law often involves exploring a legal concept familiar from daily life, such as the very notion of 'marriage' or 'family', and examining it within its social, economic, and historical context. The normative basis for law regulating intimate personal and family life extends beyond any narrow legal philosophy or social context to its broader foundations in theories of morality or justice. The chapters included bring together a representative and broad range of pieces that engage with long-standing and contemporary debates. A wide range of perspectives is represented on topics such as same-sex marriage, polygamy and polyamory, alimony, unmarried cohabitation, gestational surrogacy and assisted reproductive technologies, child support, parental rights and responsibilities, children's rights, family immigration, religious freedom, and the rights of paid caregivers. There is also philosophical discussion of concepts such as care, intimacy, and the nature of family and family law itself.*

*This book identifies the definition of a child within the law, the rights of children, and discusses the extent to which primarily English law gives adequate recognition to and protection of these rights. To what extent does English law gives adequate recognition to and protection of the rights of children? Historically the idea of and protection of rights has focused on parental rights rather than the rights of the child. The rights of children have remained far less recognised and certain until recently. Using case studies from the United Kingdom and beyond, this book takes a thematic approach to children's rights and considers topics including: underlying concepts such as the welfare of the child and safeguarding, the right to education and to medical treatment, the right to freedom from abuse and/or sexual and commercial exploitation, including contemporary challenges from forced marriage, FGM, modern slavery and trafficking, the role of the State in relation to children in need of care and protection, children's rights in the criminal justice system, the right to contract and employment. In addition, the book provides an introduction to key aspects of domestic and international law, including the Children Act 1989, the UN Convention on the Rights of the Child, the European Convention on Human Rights and the Human Rights Act 1998. The book will be of great interest to law and social science students in the areas of Child Development and Protection, Human Rights Law, Family Law, Child Law, and Child Studies, as well as to social workers, police officers, magistrates, probation officers and other related professions.*

*First published in 1998, this volume responds to child-prostitution being recognised as a major social problem in modern capitalist Taiwan. It is defined, both legally and socially, as a problem of 'sexual transactions involving children and juveniles', thus the issue of child maltreatment is submerged under other concerns. However, the main concern of this book is the protection of children from maltreatment, so related socio-legal measures will be examined by this parameter. During the social campaigns against child prostitution, structural problems such as police corruption, male sexual perversion, socio-economic inequality, and the maladjustment of aboriginal people in the modern Taiwanese society are subjugated to increasing criticism. Nevertheless, efforts to encounter any of them have had very limited accomplishment. This book intends to show that the functions of law in the prevention and treatment of the social problem of child prostitution cannot work as intended if those structural problems are not properly tackled. Suggestions are also made to address the need to reconceptualise the problem in the analytical framework of child maltreatment and to recommend the direction for reformation of policy and practice.*

*Fully updated by Stephen Gilmore and Lisa Glennon, the 4th edition of Hayes and Williams' Family Law provides comprehensive, critical and case-focused discussion of the key legislation and debates affecting adults and children. The book takes a critical approach to the subject and includes 'talking points' throughout each chapter which highlight areas of debate or controversy and help students develop their own ideas and analysis of the law. Review questions at the end of each chapter allow students the opportunity to reflect and apply their knowledge and offer the ideal preparation for exams and assessments. Cases are at the heart of family law and this textbook offers unrivalled case detail, with comprehensive summaries of key cases throughout the text to ensure students understand the development of family law legislation through the courts. Further case discussion is fully incorporated throughout the text to demonstrate complex points of law and offer a useful starting point for further research and debate. The text also includes a range of further features to support students studying the subject for the first time, including legislation extracts, contextual chapter introductions, and further reading advice, alongside a clear and engaging writing style.*

*Conceptual and Contextual Perspectives on the Modern Law of Treaties*

*A Better World for Children?*

*Philosophical Foundations of Children's and Family Law*

*The Modern Law*

*From Traditional to Modern Law*

*Children, Autonomy and the Courts*

The Modern Law of Evidence is a best-selling and indispensable guide for students studying the contemporary law of evidence. The fourteenth edition examines the theory behind the law as well as its practical application, with emphasis on current debates.

Reprint of the original, first published in 1869.

The first book to provide a broad coverage of Thai legal history in the English language.

Written for students of criminal justice, *Comparative Criminal Justice Systems: Global and Local Perspectives* examines the nature of crime and justice in varying countries and cultures in North America, Europe, Asia, Africa, and Latin America. Using a topical approach, it compares different systems of crime and justice in terms of their differences from, and similarities to, the laws and institutions of modern criminal justice, focusing on the United States as a standard of comparison.

By examining different criminal justice systems in terms of their local peculiarities and understanding their change and continuity, readers will gain a well-rounded international perspective of the world's varying systems of criminal justice. Key Features: -Explores the rise of modern criminology and the criminal justice system in the nineteenth century. It is critical for students to understand the history of modern systems to fully comprehend the varying nature of today's main legal systems, focusing on the United States as a standard of comparison. -Employs a topical approach to examine the criminal justice systems in varying countries in Europe, Asia, Africa, and Latin America, including comparative views on law enforcement, judicial systems, corrections, due process of law, and search and seizures. -Includes discussions on comparative processes of criminalization and decriminalization on such issues as domestic violence, child abuse, homosexuality,

and sexual harassment. -Discusses new global crimes and their impact on modern and traditional criminal justice systems, including human smuggling, global sex trade, global illegal drug trade, illegal trafficking of conventional military weapons, money laundering, cybercrime, and global terrorism. -Discussion questions ensure that student's grasp the core theoretical concepts.

Age Discrimination And Children's Rights

Children's Rights and the Developing Law

Beyond the Right to be Heard

The Reform of Child Care Law

Text, Cases, and Materials

Laws Relating to "Mothers' Pensions" in the United States, Denmark and New Zealand ...

**By exploring such diverse issues as the management of child abuse, legal reforms following sex abuse enquiries, moral explanations for the actions of child murderers, the impossible task faced by social workers and the limitations of children's rights campaigns, Michael King examines the revolutionary ideas of the social theorist, Niklas Luhmann. He demonstrates how Luhmann's theory of autopoietic systems compels readers to re-examine exactly what they mean by society. Questioning the relationship between personal morality and political will, it challenges the assumption that changing society is merely a matter of changing attitudes and highlights the pitfalls associated with formulating social reform.**

**Following the implementation of the Human Rights Act 1998, awareness has increased that we live in a rights-based culture and that children constitute an important group of rights holders. Now in its third edition, Children's Rights and the Developing Law explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children. It reflects on how far these developments take account of children's interests, using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics, including medical law, education and youth justice. A critical approach is maintained throughout, particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under, for example, the UN Convention on the Rights of the Child.**

**The high profile cases of Charlie Gard, Alfie Evans, and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the best interests of their child. This book answers these questions. It argues for a reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child, within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest, protected through the intervention of the state. This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago. It argues that understanding of the cases only as disputes over the best interests of the child, and judicial resolution thereof, fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public, or state, intervention into family life and parental decision-making. Whilst the principles and approach of the court established in the early cases endure, the nature and balance of these responsibilities to children in their care need to be understood in the changing social, legal, and political context in which they are exercised and enforced by the court. The book will be a valuable resource for academics, students, and practitioners of Medical Law, Healthcare Law, Family Law, Social Work, Medicine, Nursing, and Bioethics.**
