

Chinese Made Easy For Kids Textbook 4 Simplified Version English And Chinese Edition

The primary goal of this series is to help total beginners, particularly primary school students, build a solid foundation for learning Chinese as a second/foreign language. This series is designed to emphasize the development of communicational skills in listening and speaking. The unique characteristic of this series is the use of the Communicative Approach, which takes into account the differences between Chinese and European languages, in that the written Chinese characters are independent of their pronunciation. With one daily lesson, motivated student could complete one book within one academic year and move onto Chinese Made Easy (Books 1 to 5) previously published. Topics include: greetings, classroom language, personal introductions, numbers and dates, countries and languages, occupations and work places, daily routines, school subjects and facilities, parts of the body and illness, articles in the house, house and rooms, animals, and etc. Materials include 4 color textbooks (Books 1 to 4), each supplemented by a CD and workbook. From the author of the popular Chinese For Kids First 50 Characters. Get your child excited about learning Chinese with fun

build strong foundation of mastering pin yin and tones through listening to lively rhymes, pictures, and story telling. The topics include such common routines as greetings, classroom language, numbers and dates, colors and clothing, house and rooms, and animals. Also taking into account that, unlike European languages, Chinese characters are independent of their pronunciation, after studying this series of four volumes, a student will be able to write from memory about 100 simple Chinese characters and can recognize over 500 of them. This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Chinese Made Easy adopts a new approach to teaching Chinese as a second or foreign language. It is designed for young students taking GCSE/IGCSE/A-Level Mandarin Chinese Exams (UK), SAT II / AP-Chinese Examinations (USA), IB Chinese Exam, Australian Chinese exams, HSK (Mainland China), or for those students who are starting to learn Chinese on their own. Chinese Made Easy has two levels: level 1-Book 1, 2 and 3; and level 2-Book 4 and 5. After completing this series, learners will acquire a vocabulary of approximately 1,700 Chinese characters and several thousand phrases. This course features task-based learning coupled with a focus on form and function. Textbooks are in full color and it includes both simplified and traditional Chinese characters in its vocabulary lists.

A book to inspire Minnesotans of all ages to learn about and reflect on the ten plants, chosen by experts and citizens, that have most impacted our state.

David Morrow and Anthony Weston build on Weston's acclaimed *A Rulebook for Arguments* to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include: Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the *Rulebook's* rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the *Rulebook*, that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises, including

Read Free Chinese Made Easy For Kids Textbook 4 Simplified Version English And Chinese Edition

commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of Workbook contains the entire text of the recent fifth edition of the Rulebook, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today's students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates—including five new sets of exercises—trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue.

Python for Everybody is designed to introduce students to programming and software development through the lens of exploring data. You can think of the Python programming language as your tool to solve data problems that are beyond the capability of a spreadsheet. Python is an easy to use and easy to learn programming language that is freely available on Macintosh, Windows, or Linux computers. So once you learn Python you can use it for the rest of your career without needing to purchase any software. This book uses the Python 3 language. The earlier Python 2 version of this book is titled "Python for Informatics: Exploring Information". There are free downloadable electronic copies of this book in various formats and supporting materials for the book at www.pythonlearn.com. The course materials are available to you under a Creative Commons License so you can adapt them to teach your own Python course.
