A Guide to Meeting Today's Academic Standards

Supporting the Education of Children with Autism Spectrum Disorders

K-5 teachers will discover how to integrate the tech requirements found within today's academic standards into their everyday curriculum. Perhaps your district provides current technology development for staff on a regular basis and has instructional coaches to help teachers infuse technology into their curriculum to meet various academic standards. But in reality, most districts don't have this kind of support. In this book (the first in a two-book series), you'll learn how to shift your instructional practice and leverage technology to meet today's curriculum education standards for grades K-5. This book doesn't cover every K-5 national standard, but identifies the standards with a technology component and provides resources and lessons to help you teach those standards effectively. This book includes:

• Classroom-tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness. • Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards. • Suggestions for addressing roadblocks to incorporating technology in the classroom. • Ways to incorporate staff development and parental support at the school level. Access to a companion website with information on the tools referenced in the text. With the implementation of these strategies, you'll help your students become self-directed and critical readers, writers and thinkers so they're better prepared for the future!

Want to get boys excited about poetry? Try establishing a wiki-war on the use of form and structure. Or perhaps a podcast to develop close analysis of language. How about getting them blogging about their favourite characters? Based on established principles of the best ways to use ICT in English, this practical resource looks at when and how ICT can be used to engage and inspire students of English, but only when it enhances teaching and learning, never for its own sake. Beginning with an overview of what ICT can offer and how it is changing the way we teach and learn, the authors then give practical examples of activities and ideas to attain key English skills and learning goals in secondary schools. Throughout the book, there are tried-and-tested ideas for tackling the hard-to-teach topics, and there is also a dedicated website with links to useful websites, the authors' favourite tips and downloadable resources.

If you want to start an argument in a teachers' lounge, bring up the topic of how best to teach grammar. There is a wide spectrum of opinion. Traditionalists claim that we must explicitly teach grammar. Students drill the basics and diagram sentences. Sometimes their study and drills take the place of writing, but these teachers claim the grammar. At the opposite end of the spectrum are teachers who claim that the best way to learn grammar is to write, thereby being forced to use grammar in writing and editing. They reason that students will learn grammar in the context of actually using it, without all the drills and worksheets. They trust the writing process to instill grammar actually teaching it. Teachers on the write-to-learn-grammar side claim that students who are only taught grammar rules might pass tests, but since they didn't learn in the context of writing, they typically don't apply the rules when they write. Grammar traditionalists say students in writing classes never learn grammar at all, because it is not used. Rules, authors Tommy Thomason and Geoff Ward take the middle-ground position that grammar should be taught as part of the writing process. Tommy Thomason is a veteran journalist and university journalism professor at TCU. Geoff Ward is a well-known Australian professor and associate dean from James Cook University in Townsville.
