The sixth novel in James S.A. Corey’s New York Times bestselling Expanse series—now a new original series from the Syfy Channel, coming December 14th 2015. The final war has started. The protocolecule, fairly quiescent since the opening of the gates, has identified its enemy and is arming itself for battle. Humanity is at most a tool in its post–human arsenal. When people, ships, and even places begin to disappear, Holden and the crew of the Rocinante have to face the fact that the thing they’ve been hauling through the depths of space only appears to be Detective Miller. The time when the protocolecule’s agenda and humanity’s overlapped has passed. As the protocolecule takes control of the ancient networks and relays, the final battle begins. Holden and his allies are faced with the decision of whether to blow the gates, trapping humanity in beads of disconnected worlds, or engage in a battle that they can only lose no matter who wins.

Thirty years after her British bomber pilot father parachuted from his stricken plane into German-occupied Tuscany, Joanna embarks on a healing journey to learn about her father’s hidden wartime past.

Amid preparations though, the Regimental High Command is destroyed. Lieutenant Commander (reserve) Vyr Cossont appears to have been involved, and she is now wanted - dead, not alive. Aided only by an ancient, reconditioned android and a suspicious Culture avatar, Cossont must complete her last mission given to her by the High Command. It seems that the final days of the Gzilt civilization are likely to prove its most perilous.

A quest for a priceless element—and revenge—fuels this far-future interstellar adventure that “reads like Moby-Dick at a strobe-light show” (Time). In 3172, the universe is divided between three political units: the stars and worlds of Draco, with Earth as its power center; the Pleiades Federation, on whose capital world, New Ark, lives the incredibly wealthy Von Ray family, descended from well-heeled merchants whose ancestors made their fortune as pirates; and the Outer Colonies, where, in their underwater mines, tiny quantities of the fabulously valuable Illyrion have been discovered. Lorq Von Ray was a playboy and young space-yacht-racing captain who, at a party at Earth’s Paris, clashed with Draco’s Prince Red. This sets Lorq on a demonic quest, through which he hopes to find vengeance. When a star goes nova and implodes, in the seething stellar wreckage for a few days—even hours—lie tons of Illyrion, the element that makes interstellar travel possible. To help him secure the priceless fuel, Lorq recruits a gypsy musician, a would-be novelist, and some other ragtag misfits. But an even more dangerous fuel than Illyrion is revenge. . . . This ebook features an illustrated biography of Samuel R. Delany including rare images from his early career.
