The days when title to land was always proved by the production of a bundle of deeds are long gone; today, most landowners in England and Wales have registered title to their land. That means that their ownership is recorded on a register kept by Land Registry. Entry on the register is all that is needed to prove title, and the law does not allow buyers of land (or lenders) to look behind the register at the deeds and other documents to establish their title. Furthermore, the law guarantees the correctness of the register. The terms of reference for this project was broadly stated as comprising a "wideranging review" of the LRA 2002. This Paper is divided into ten parts: Part 1 explains the project; 2 considers the registration of estates and dispositions of land; 3 considers the land registration rules on priorities which determine when and against whom a property right is enforceable; 4 addresses the question of indefeasibility; the circumstances in which the register can be changed and when such changes trigger an entitlement to an indemnity; 5 looks at specific matters relating to easements; 6 examines the provisions of the Act on adverse possession; 7 addresses some specific issues relating to mortgages or charges over registered land; 8 considers the development of electronic conveyancing; 9 looks at the jurisdiction of the Land Registration Division of the First-tier Tribunal (Property Chamber) and

**Europe: Ethnographic Perspectives** brings together a range of detailed accounts of the legal and bureaucratic processes by which asylum claims are decided. The book includes a legal overview of European asylum determination procedures, followed by sections on the diverse actors involved, the means by which they communicate, and the ways in which they make life and death decisions on a daily basis. It offers a contextually rich account that moves beyond doctrinal law to uncover the gaps and variances between formal policy and legislation, and law as actually practiced. The contributors employ a variety of disciplinary perspectives - sociological, anthropological, geographical and linguistic - but are united in their use of an ethnographic methodological approach. Through this lens, the book captures the confusion, improvisation, inconsistency, complexity and emotional turmoil inherent to the process of claiming asylum in Europe.
