*In Developing Mission, Joseph W. Ho offers a transnational cultural history of US and Chinese communities framed by missionary lenses through time and space—tracing the lives and afterlives of images, cameras, and visual imaginations from before the Second Sino-Japanese War through the first years of the People's Republic of China. When American Protestant and Catholic missionaries entered interwar China, they did so with cameras in hand. Missions principally aimed at the conversion of souls and the modernization of East Asia, became, by virtue of the still and moving images recorded, quasi-anthropological ventures that shaped popular understandings of and formal foreign policy toward China. Portable photographic technologies changed the very nature of missionary experience, while images that missionaries circulated between China and the United States affected cross-cultural encounters in times of peace and war. Ho illuminates the centrality of visual practices in the American missionary enterprise in modern China, even as intersecting modernities and changing Sino-US relations radically transformed lives behind and in front of those lenses. In doing so, Developing Mission reconstructs the almost-lost histories of transnational image makers, subjects, and viewers across twentieth-century China and the United States.*

This book is an essential guide to making traditional 16mm and 8mm films, from production to post, using both analog and digital tools. Focusing on low-budget equipment and innovative techniques, this text will provide you with the steps to begin your journey in making lasting work in the legacy medium of great filmmakers from Georges Méliès to Steven Spielberg. The discipline of 16mm or 8mm film can initially seem challenging, but through the chapters in this book, you'll learn strategies and insight to develop your craft. You'll discover the right camera for your needs, how to light for film, and the options in planning your digital post-production workflow. The book includes numerous hand-drawn diagrams and illustrations for ease of understanding, as well as recommended films and filmmaking activities to help you build your knowledge of film history, technical and creative skills within each chapter theme. By applying the suggested approaches to production planning, you will see how celluloid filmmaking can be both visually stunning and cost effective. This is an essential book for students and filmmakers who want to produce professional quality 16mm and 8mm films.
