**Appropriate for all basic-to-intermediate level courses in Visual Basic 2008 programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been**

**thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda**

Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming**

**Winner, category of Architecture and Urban Studies in the 1991 Professional/Scholarly Publishing Annual Awards Competition presented by the Association of American Publishers, Inc. and Winner, Alice Davis Hitchcock Award, Society of Architectural Historians. Richard Etlin's sweeping, generously illustrated study explores the changing idea of modernism in Italian architecture over the five crucial decades that saw the birth and crystallization of modern architecture. Systematically treating the major architects and movements of the period - such as**

**Raimondo D'Aronoco and Art Nouveau, Antonio Sant'Elia and Futurism, Marcello Piacentini and the modern vernacular, Giovanni Muzio and the Novecento, Giuseppe Terragni and Italian Rationalism - this book also explores the ways in which the original ideals of the various movements were transformed by working for the Fascist state. Modernism in Italian Architecture examines the legacy of the romantic revolution, which confronted architects with the dilemma of how to create an architecture that was both modern and national. It challenges accepted opinion on a variety of issues. Etlin argues against too close an association of Sant'Elia's architecture and manifesto with Futurism**

**by demonstrating a broader context for its themes. His study of Novecento architecture chronicles a movement whose use of classical detailing created a "postmodernism" contemporaneous with the pioneering buildings of the International Style elsewhere in Europe and preceding its arrival in Italy. Etlin undermines the notion that the architects of Italian Rationalism blindly followed an antihistorical credo, by bringing to light the profoundly contextual nature of the abstract geometries of the best Rationalist architecture. The final section, devoted to Fascism, focuses on Terragni's famous Casa del Fascio in Como and the Danteurn project by Terragni and Lingeri. Etlin concludes with a consideration of**

**the anti-Semitic attacks on modern architecture during the Fascist racial campaign of 1938. Richard Etlin is Professor in the School of Architecture at the University of Maryland.**

**“Modern Italy” may sound like an oxymoron. For Western civilization, Italian culture represents the classical past and the continuity of canonical tradition, while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely**

**premodern setting. The ancient forum, medieval cloisters, baroque piazzas, and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter's, all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time; but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian, we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250**

**years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.**

**Teige envisioned the minimum dwelling not as a reduced version of a bourgeois apartment or rural cottage, but as a wholly new dwelling type built with the cooperation of architects, sociologists, economists, health officials, physicians, social workers, politicians, and trade unionists."**

synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the

context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is

**Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By revealing hidden histories, we learn how food, landscape and architecture are intertwined, as well as the extent to which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process, this book reveals the extent to which Tuscany has been constructed by Anglos — and what has been distorted, idealized and even overlooked in the process.**
