

## Civics Today Student Edition

A thriving and peaceful democracy requires an informed and engaged citizenry, but such citizenship must be learned. Educators around the globe are facing challenges in teaching politics in an era in which populist values are on the rise, authoritarian governance is legitimized, and core democratic tenets are regularly undermined by leaders and citizens alike. To combat anti-democratic outcomes and citizens' apathy, Teaching Civic Engagement Globally provides a wide range of pedagogical tools to help the current generation learn to effectively navigate debates and lead changes in local, national, and global politics. Contributors discuss key theoretical discussions and challenges regarding global civic engagement education, highlight successful evidence-based pedagogical approaches, and review effective ways to reach across disciplines and the global education community. Most importantly, the book provides tangible steps to link democratic education research with action that reflects contemporary global circumstances.

StudentWorksTM Plus CD-ROM combines the complete Interactive Student Edition with a page-by-page audio reading of the text so students can both listen and read the book at the same time. Also included are all of the student worksheets and Spanish audio summaries.

Civics Now is a program that all teachers will be able to successfully deliver regardless of subject area speciality. Key Features: Extensive content in the areas of human rights, environmental citizenship, and Aboriginal issues Embedded Literacy Strategies and Skills Appendix to support student learning Accessible reading level and highly visual design engages reluctant readers

What Makes Students Learn

Teaching Civic Engagement provides an exploration of key theoretical discussions, innovative ideas, and best practices in educating citizens in the 21st century. The book addresses theoretical debates over the place of civic engagement education in Political Science. It offers pedagogical examples in several sub-fields, including evidence of their effectiveness and models of appropriate assessment. Written by political scientists from a range of institutions and subfields, Teaching Civic Engagement makes the case that civic and political engagement should be a central part of our mission as a discipline.

This book empowers teachers to support student activists. The authors examine arguments for promoting student activism, explore state and national curriculum standards, suggest activist projects, and report examples of student individual and group activism. By offering suggestions for engaging students as activists across the K-12 curriculum and by including the stories of student activists who became lifetime activists, the book demonstrates how activism can serve to bolster democracy and be a component of rich, experiential learning. Including interviews with student and teacher activists, this volume highlights issues such as racial and immigrant justice, anti-gun violence, and climate change.

one civics and economics content with an accessible, student-friendly text aligned to the Understanding by Design® instructional approach

A civics program building the next generation of active Americans. Civics Today: Citizenship, Economics, and You meets the content standards for civics and government as outlined by the National Standards for Civics and Government. Many young citizens are completing their education with little or no sense of civic responsibility. This program teaches the knowledge and skills needed to be an effective, active citizen. It also encourages an appreciation for the American political system and fosters a willingness to take part in American democracy. Two economics units provide an understanding of the interrelationship between democracy and the free enterprise system.

The Basics of American Government is a collaborative effort among eight current and one former faculty members in the Departments of Political Science and Criminal Justice at University of North Georgia. The purpose of this book is to offer a no-frills, low-cost, yet comprehensive overview of the American political system for students taking introductory courses in American national government. Furthermore, the work combines the best aspects of both a traditional textbook and a reader in that most chapters offer a piece of original scholarship as a case study to bolster or reinforce the material presented in the chapter. In addition, many chapters present a civic engagement-type exercise and discussion questions intended to challenge, engage, and foster student participation in the political system. The authors undertook this project for several reasons, most notably the high costs of textbooks for students and the lack of college-level scholarship found in most American Government texts. This 375-page, peer-reviewed, edited book that combines traditional material with original scholarship will cost students \$27.99, well below market standards. All of the authors are experienced classroom instructors, subject matter experts, and published researchers in the field of American politics.
