health and disability in child and youth populations.--Publisher's description. Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls ' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls ' education around the

Female-to-male transgender people, or transmasculine people as they are called, are just beginning to form their networks in India. But their struggles are not visible to a gender-normative society that barely notices, much less acknowledges, them. While transwomen have gained recognition through the extraordinary efforts of activists and feminists, the brotherhood, as the transmasculine network often refers to itself, remains imponderable, diminished even within the transgender community. For all intents and purposes, they do not exist.

In a country in which parents wish their daughters were sons, they exile the daughters who do become sons. In this remarkable, intimate book, Nandini Krishnan burrows deep into the prejudices encountered by India's transmen, the complexities of hormonal transitions and sex reassignment surgery, issues of social and family estrangement, and whether socioeconomic privilege makes a difference. With frank, poignant, often idiosyncratic interviews that braid the personal with the political, the informative with the offhand, she makes a powerful case for inclusivity and a non-binary approach to gender. Above all, she asks the question: what does manhood really mean?

Suicide terrorism is rising around the world, but there is great confusion as to why. In this paradigm-shifting analysis, University of Chicago political scientist Robert Pape has collected groundbreaking evidence to explain the strategic, social, and individual factors responsible for this growing threat. One of the world's foremost authorities on the subject, Professor Pape has created the first comprehensive database of every suicide terrorist attack in the world from 1980 until today. With striking clarity and

Online Library Civil Engineer Interview Questions Nadini

precision, Professor Pape uses this unprecedented research to debunk widely held misconceptions about the nature of suicide terrorism and provide a new lens that makes sense of the threat we face.

FACT: Suicide terrorism is not primarily a product of Islamic fundamentalism.

FACT: The world's leading practitioners of suicide terrorism are the Tamil Tigers in Sri Lanka—a secular, Marxist-Leninist group drawn from Hindu families.

FACT: Ninety-five percent of suicide terrorist attacks occur as part of coherent campaigns organized by large militant organizations with significant public support. FACT: Every suicide terrorist campaign has had a clear goal that is secular and political: to compel a modern democracy to withdraw military forces from the territory that the terrorists view as their homeland. FACT: Al-Qaeda fits the above pattern. Although Saudi Arabia

Online Library Civil Engineer Interview Questions Nadini

is not under American military occupation per se, one major objective of al-Qaeda is the expulsion of U.S. troops from the Persian Gulf region, and as a result there have been repeated attacks by terrorists loyal to Osama bin Laden against American troops in Saudi Arabia and the region as a whole. FACT: Despite their rhetoric, democracies—including the United States—have routinely made concessions to suicide terrorists. Suicide terrorism is on the rise because terrorists have learned that it's effective. In this wide-ranging analysis, Professor Pape offers the essential tools to forecast when some groups are likely to resort to suicide terrorism and when they are not. He also provides the first comprehensive demographic profile of modern suicide terrorist attackers. With data from more than 460 such attackers—including the names of 333—we now know that these

Online Library Civil Engineer Interview Questions Nadini

individuals are not mainly poor, desperate criminals or uneducated religious fanatics but are often well-educated, middle-class political activists. More than simply advancing new theory and facts, these pages also answer key questions about the war on terror: • Are we safer now than we were before September 11? • Was the invasion of Iraq a good counterterrorist move? • Is al-Qaeda stronger now than it was before September 11? Professor Pape answers these questions with analysis grounded in fact, not politics, and recommends concrete ways for today's states to fight and prevent terrorist attacks. Military options may disrupt terrorist operations in the short term, but a lasting solution to suicide terrorism will require a comprehensive, long-term approach—one that abandons visions of empire and relies on a combined strategy of vigorous homeland security, nation

building in troubled states, and greater energy independence. For both policy makers and the general public, Dying to Win transcends speculation with systematic scholarship, making it one of the most important political studies of recent time.

The digital turn might as well be marked as an Asian turn. From flash-mobs in Taiwan to feminist mobilisations in India, from hybrid media strategies of Syrian activists to cultural protests in Thailand, we see the emergence of political acts that transform the citizen from being a beneficiary of change to becoming an agent of change. In co-shaping these changes, what the digital shall be used for, and what its consequences will be,

Online Library Civil Engineer Interview Questions Nadini

are both up for speculation and negotiation. Digital Activism in Asia marks a particular shift where these questions are no longer being refracted through the ICT4D logic, or the West's attempts to save Asia from itself, but shaped by multiplicity, unevenness, and urgencies of digital sites and users in Asia. This reader crowd-sources critical tools, concepts, analyses, and annotations, self-identified by a network of change makers in Asia as important in their own practices within their own contexts.

This open access book provides original, up-to-date case studies of “ethics dumping” that were largely facilitated by loopholes in the ethics governance of low and middle-income countries. It is instructive even to experienced researchers since it provides a voice to vulnerable populations from the fore mentioned countries. Ensuring the ethical conduct of North-South

Online Library Civil Engineer Interview Questions Nadini

collaborations in research is a process fraught with difficulties. The background conditions under which such collaborations take place include extreme differentials in available income and power, as well as a past history of colonialism, while differences in culture can add a new layer of complications. In this context, up-to-date case studies of unethical conduct are essential for research ethics training.

Contemporary societies are marked by new global trends—economic, cultural, technological, and environmental shifts that are part of a rapid and uneven wave of globalization. The growing global interdependence that characterizes our time calls for a

Online Library Civil Engineer Interview Questions Nadini

generation of individuals who can engage in effective global problem solving and participate simultaneously in local, national, and global civic life. Put simply, preparing our students to participate fully in today's and tomorrow's world demands that we nurture their global competence. This document introduces a definition of global competence developed by the Global Competence Task Force—a group of state education agency leaders, education scholars, and practitioners—under the auspices of the Council of Chief State School Officers EdSteps initiative (CCSSO-EdSteps) and the Asia Society Partnership for Global Learning (see page (iv) for task force participants). The definition

Online Library Civil Engineer Interview Questions Nadini

builds on seminal work within the states and a broad range of organizations working to advance global knowledge and critical thinking skills. A process of careful articulation and vetting yielded the definition of global competence here

proposed: Global competence is the capacity and disposition to understand and act on issues of global significance. Globally competent individuals are aware, curious, and interested in learning about the world and how it works. They can use the big ideas, tools, methods, and languages that are central to any discipline (mathematics, literature, history, science, and the arts) to engage the pressing issues of our time. They deploy

Online Library Civil Engineer Interview Questions Nadini

and develop this expertise as they investigate such issues, recognizing multiple perspectives, communicating their views effectively, and taking action to improve conditions. This publication of CCSSO and the Asia Society Partnership for Global Learning puts forward a new definition for global competence and explores how to infuse the capacities of global competence into the classroom and into policy.

GeoComputation and Public Health is fundamentally a multi-disciplinary book, which presents an overview and case studies to exemplify numerous methods and solicitations in addressing vectors borne diseases (e.g, Visceral leishmaniasis, Malaria, Filaria). This book includes a practical coverage of the use of spatial analysis techniques in vector-borne disease using open source software solutions. Environmental factors (relief characters, climatology, ecology, vegetation, water bodies etc.) and socio-economic issues (housing type &

pattern, education level, economic status, income level, domestics' animals, census data, etc) are investigated at micro -level and large scale in addressing the various vector-borne disease. This book will also generate a framework for interdisciplinary discussion, latest innovations, and discoveries on public health. The first section of the book highlights the basic and principal aspects of advanced computational practices. Other sections of the book contain geo-simulation, agent-based modeling, spatio-temporal analysis, geospatial data mining, various geocomputational applications, accuracy and uncertainty of geospatial models,

applications in environmental, ecological, and biological modeling and analysis in public health research. This book will be useful to the postgraduate students of geography, remote sensing, ecology, environmental sciences and research scholars, along with health professionals looking to solve grand challenges and management on public health. During the 1970s, London-based photographers joined together to form collectives which engaged with local and international political protest in cities across the UK. This book is a survey of the radical community photography that these collectives produced. The photographers derived

Online Library Civil Engineer Interview Questions Nadini

inspiration from counterculture while finding new ways to produce, publish and exhibit their work. They wanted to do things in their own way, to create their own magazines and exhibition networks, and to take their politicised photographic and textual commentary on the re-imagination of British cities in the post-war period into community centres, laundrettes, Working Men's Clubs, polytechnics, nurseries - anywhere that would have them. The laminated panel exhibitions were sufficiently robust, when packed into a laundry box, to withstand circulation round the country on British Rail's Red Star parcel

network. Through archival research, interviews and newly discovered photographic and ephemeral material, this tells the story of the Hackney Flashers Collective, Exit Photography Group, Half Moon Photography Workshop, producers of Camerawork magazine, and the community darkrooms, North Paddington Community Darkroom and Blackfriars Photography Project. It reveals how they created a 'history from below', positioning themselves outside of established mainstream media, and aiming to make the invisible visible by bringing the disenfranchised and marginalised into the political debate.

Legal research examines subject matter enshrouded in social circumstances in order to conceptualize theories and prepare a future course of action. This dynamic, inter-disciplinary, and labyrinthine character of legal research requires researchers to be fluid, eclectic, and analytical in their approach. Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research, how a theme is built on the basis of comprehensive and intensive study, and the paths through which notions of objectivity, feminism, ethics, and purposive character of knowledge are to be understood. The book first

Online Library Civil Engineer Interview Questions Nadini

explains the meaning, evolution, and scope of legal research, and discusses objectivity and ethics in legal research. It engages with the requirements, advantages, and limits of various doctrinal and non-doctrinal methods and tools, and the points to be considered in selecting a suitable method or combination of methods. It highlights analytical, historical, philosophical, comparative, qualitative, and quantitative methods of legal research. The book then goes on to discuss the use of multi-method legal research, policy research, action research, and feminist legal research and finally, reflects on research-based critical legal

writing, as opposed to client-related legal writing. This book, thus, is a comprehensive answer to key questions one faces in legal research.

The decade from the 2008 global financial crisis to the 2020 coronavirus pandemic has seen a real transformation of the world order. The very nature of international relations and its rules are changing before our eyes. For India, this

means optimal relationships with all the major powers to best advance its goals. It also requires a bolder and non-reciprocal approach to its neighbourhood. A global footprint is now in the making that leverages India's greater capability and relevance, as well as its unique diaspora. This era of global upheaval entails greater expectations from India, putting it on the path to becoming a leading power. In The India Way, S. Jaishankar, India's Minister of External Affairs, analyses these challenges and spells

out possible policy responses. He places this thinking in the context of history and tradition, appropriate for a civilizational power that seeks to reclaim its place on the world stage.

that the judges of the high courts and the Supreme Court of India wield tremendous powers. However, power comes with a price which bestows huge responsibility and calls for strict adherence to dos and don'ts. This book builds upon this narrative and advocates that judges must be made accountable not only in respect of their personal conduct and integrity, but also in respect of the judicial verdicts they deliver. The work emphasizes that the need for judicial accountability has

Online Library Civil Engineer Interview Questions Nadini

increased in recent times as the judiciary is, nowadays, performing not only judicial functions, but virtually executive functions also, for which the government is accountable to the people. The author, in particular, critically discusses Articles 141, 142, and 144, which make the Supreme Court the most powerful institution in the country, and Articles 32 and 136, which also confer wide powers on it. Using these powers, the apex court sometimes, unmindful of the budgetary

and other vital implications, passes orders which are simply not implementable. For example, the intervention of the Supreme Court in the matter of the interlinking of rivers, a policy decision which falls clearly in the domain of the Executive. Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism. From Brazil and Mexico to Zimbabwe and the Philippines, rural movements of diverse political character, but all sharing the same social basis of dispossessed peasants and unemployed workers, have used land occupations and other tactics to confront the neoliberal state. This volume brings together for the first time across three continents - Africa, Latin America and Asia - an intellectually consistent set of original investigations into this new generation of rural social movements. These country studies seek to identify their social

Online Library Civil Engineer Interview Questions Nadini

composition, strategies, tactics, and ideologies; to assess their relations with other social actors, including political parties, urban social movements, and international aid agencies and other institutions; and to examine their most common tactic, the land occupation, its origins, pace and patterns, as well as the responses of governments and landowners. At a more fundamental level, this volume explores the ways in which two decades of neoliberal policy - including new land tenure arrangements intended to hasten the commodification of land, and new land uses linked to global markets -- have undermined the social reproduction of the rural labour force and created the conditions for

Online Library Civil Engineer Interview Questions Nadini

popular resistance. The volume demonstrates the longer-term potential impact of these movements. In economic terms, they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis. And in political terms, breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development.

This edition of the biennial Poverty and Shared Prosperity report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of

Online Library Civil Engineer Interview Questions Nadini

swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. Poverty and Shared Prosperity 2020: Reversals of Fortune presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of 'new poor.' Original analysis included in the

Online Library Civil Engineer Interview Questions Nadini

report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead.

Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change. Covers all the major topics in civil
