First published in 1961, Forrest E. Baird's revision of *Philosophic Classics* continues the tradition of providing generations of students with high quality course material. Using the complete works, or where appropriate, complete sections of works, this anthology allows philosophers to speak directly to students. Esteemed for providing the best available translations, *Philosophic Classics: Ancient Philosophy*, features complete works or complete sections of the most important works by the major thinkers, as well as shorter samples from transitional thinkers.

Hill offers a wealth of insight on the history of Christian thought and the colorful personalities of those who gave it shape and form. --from publisher description.

The Eighth Edition of Steven M. Cahn's *Classics of Western Philosophy* offers the same exacting standard of editing and translation that made earlier editions of this anthology the most highly valued and widely used volume of its kind. But the Eighth Edition offers exciting new content as well: Plato's *Laches* (complete), new selections from Aristotle's *Nicomachean Ethics* (on courage), Descartes' *Discourse on Method* (complete), all previously omitted sections of Berkeley's *A Treatise Concerning the Principles of Human Knowledge*, Kant's *Prolegomena to Any Future Metaphysics* (complete). These additions—with no offsetting deletion of content of the Seventh Edition—yield an anthology of unrivaled versatility, the only one to offer the complete texts of: both Descartes' *Discourse on Method* and *Meditations on First Philosophy*, both Berkeley's *A Treatise Concerning the Principles of Human Knowledge* and *Three Dialogues between Hylas and Philonous*, Kant's *Prolegomena to Any Future Metaphysics* and selections from the *Critique of Pure Reason*.

"His book...supplant[s] all others, even the immensely successful *History of Western Philosophy* by Bertrand Russell."—A. C. Grayling  
Already a classic in its first year of publication, this landmark study of Western thought takes a fresh look at the writings of the great thinkers of classic philosophy and questions many pieces of conventional wisdom. The book invites comparison with Bertrand Russell's monumental *History of Western Philosophy*, "but Gottlieb's book is less idiosyncratic and based on more recent scholarship" (Colin McGinn, *Los Angeles Times*). A *New York Times* Notable Book, a *Los Angeles Times* Best Book, and a *Times Literary Supplement* Best Book of 2001.

This anthology contains the basic vision of Philo (c. 20 B.C.E.-50 C.E.), the greatest Jewish mystic, philosopher and theologian of the Graeco-Roman era.

"Forrest Baird's revisions of *Philosophic Classics*, Prentice Hall's long-

standing philosophy series, continue the tradition begun in 1961, to provide generations of students with anthologies of high quality in the history of Western philosophy. Using the complete works, or, where appropriate, complete sections of works, this series allows philosophers to speak directly to students. This series includes texts central to the thinker's own philosophy, using the best available translations."--Cover.

Reading the Western Classics to Find Meaning in a Secular Age

Classics of Western Philosophy

Volume II: Middle Ages, Renaissance, and Reformation

What makes for a philosophical classic? Why do some philosophical works persist over time, while others do not? The philosophical canon and diversity are topics of major debate today. This stimulating volume contains ten new essays by accomplished philosophers writing passionately about works in the history of philosophy that they feel were unjustly neglected or ignored-and why they deserve greater attention. The essays cover lesser known works by famous thinkers as well as works that were once famous but now only faintly remembered. Works examined include Gorgias' Encomium of Helen, Jane Adams' Women and Public Housekeeping, W.E.B. DuBois' Whither Now and Why, Edith Stein's On the Problem of Empathy, Jonathan Bennett's Rationality, and more. While each chapter is an expression of engagement with an individual work, the volume as a whole, and Eric Schliesser's introduction specifically, address timely questions about the nature of philosophy, disciplinary contours, and the vagaries of canon formation.

Spanning the Crusades, the Indian Raj, and the postwar decline of the British Empire, Homer ' s Turk illuminates how English writers of all eras have relied on Greek and Roman literature to help them understand the world once called " the Orient. " Even today, the Classics frame the West ' s relationship with the Islamic world, India, and China.

In unrelenting flow of choices confronts us at nearly every moment of our lives, and yet our culture offers us no clear way to choose. This predicament seems inevitable, but in fact it ' s quite new. In medieval Europe, God ' s calling was a grounding force. In ancient Greece, a whole pantheon of shining gods stood ready to draw an appropriate action out of you. Like an athlete in " the zone, " you were called to a harmonious attunement with the world, so absorbed in it that you couldn ' t make a " wrong " choice. If our culture no longer takes for granted a belief in God, can we nevertheless get in touch with the Homeric moods of wonder and gratitude, and be guided by the meanings they reveal? All Things Shining says we can. Hubert Dreyfus and Sean Dorrance Kelly illuminate some of the greatest works of the West to reveal how we have lost our passionate engagement with and responsiveness to the world. Their journey takes us from the wonder and openness of Homer ' s polytheism to the monotheism of Dante; from the autonomy of Kant to the multiple worlds of Melville; and, finally, to the spiritual difficulties evoked by modern authors such as David Foster Wallace and Elizabeth Gilbert. Dreyfus, a philosopher at the University of California, Berkeley, for forty years, is an original thinker who finds in the classic texts of our culture a new relevance for people ' s everyday lives. His lively, thought-provoking lectures have earned him a podcast audience that often reaches the

iTunesU Top 40. Kelly, chair of the philosophy department at Harvard University, is an eloquent new voice whose sensitivity to the sadness of the culture—and to what remains of the wonder and gratitude that could chase it away—captures a generation adrift. Re-envisioning modern spiritual life through their examination of literature, philosophy, and religious testimony, Dreyfus and Kelly unearth ancient sources of meaning, and teach us how to rediscover the sacred, shining things that surround us every day. This book will change the way we understand our culture, our history, our sacred practices, and ourselves. It offers a new—and very old—way to celebrate and be grateful for our existence in the modern world.

Philosophy: The Classics

A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds. What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In *Rescuing Socrates*, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, *Rescuing Socrates* describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

[The author's] purpose is to exhibit philosophy as an integral part of social and political life: not as the isolated speculations of remarkable individuals, but as both an effect and a cause of the character of the various communities in which different systems flourished.—Pref.

**In this synthetic introduction to the history of the philosophy of art, Noël Carroll elucidates and analyzes selected writings on art by Plato, Aristotle, Hutcheson, Hume, Kant, Hegel, Schopenhauer, Tolstoy, and Bell. Carroll's narrative tracks developments between major positions in philosophy of art, ranging from the idea that art is unavoidably embedded in society to the evolution of the notion that art is autonomous ("art for art's sake"), thereby setting the stage for continuing debates in the philosophy of art. Presupposing no prior background, and useful on its own or accompanying the reading of primary works, Classics in Western Philosophy of Art is ideal as a text for introductory undergraduate and graduate courses in philosophy of art and aesthetics, or for anyone interested in learning about the origin of some of our most fundamental conceptions of art in the Western tradition.**

**We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely - on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking**

**humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.**

**Classics of Western Thought: The ancient world, D. S. Gochberg, ed  
From Ancient Greece to the Twentieth Century**

A comprehensive introduction to the history of Western Philosophy from the Pre-Socratic Twentieth Century thought. The book covers the key figures and also those whose contribution has been overlooked, such as Vico, Durkheim and Weber.

From very early on, Western philosophers have been obsessed with the understanding relatively few works of philosophy which have played a disproportionately large and fundamental role in developing the Western philosophical canon, dominating the curriculum in the past and in the present; there is no indication that they will not do so in the future. *Abuses of the Classics* examines the various ways in which the different periods of history of philosophy have approached these texts. The editors have chosen for analysis of the major philosophers from periods of the history of philosophy in which the interpretation of the classics has been particularly significant. Contributions to this book include entries on: Aristotle's reading of Plato; Averroes on Aristotle; Nietzsche on the Beginnings of Western Philosophy; and Thomas Aquinas's Commentary on Aristotle's *Metaphysics*.

Now in its fourth edition, *Philosophy: The Classics* is a brisk and invigorating tour through the great books of western philosophy. In his exemplary clear style, Nigel Warburton introduces and assesses thirty-two philosophical classics from Plato's *Republic* to Rawls' *Theory of Justice*. The fourth edition includes new material on: Montaigne *Essays* Thomas Paine *Rights of Man* R.G. Collingwood *The Principles of Art* Karl Popper *The Open Society and Its Enemies* Thomas Kuhn *The Structure of Scientific Revolutions* With a glossary and suggestions for further reading at the end of each chapter, this is an ideal starting point for anyone interested in philosophy.

**One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not**

only a mystery, but also a complete and entertaining history of philosophy.

For over 2000 years, philosophy has been our best guide to the experience of being human, and the true nature of reality. From Aristotle, Plato, Epicurus, Confucius, Cicero and Heraclitus in ancient times to 17th century rationalists Descartes, Leibniz and Spinoza, from 20th-century greats Jean-Paul Sartre, Jean Baudrillard and Simone de Beauvoir to contemporary thinkers Michael Sandel, Peter Singer and Slavoj Zizek, *50 Philosophy Classics* explores key writings that have shaped the discipline and had an impact on the real world. Philosophy can no longer be confined to academia, and *50 Philosophy Classics* shows how powerful it can be as a tool for opening our minds and helping us think. Whether you are fascinated or daunted by the big questions of how to think, how to be, how to act and how to see, this is the perfect introduction to some of humanity's greatest minds and their landmark books.
