This book introduces the principles and practice of writing a comprehensive reference grammar. Several thousand distinct languages are currently spoken across the globe, each with its

own grammatical system and its own selection of diverse grammatical structures.

Comprehensive reference grammars offer a basis for understanding linguistic diversity and can provide a unique perspective into the structure and social and cognitive underpinnings of different languages. Alexandra Aikhenvald describes the means of collecting, analysing, and organizing data for use in this type of grammar, and discusses the typological parameters that can be used to explore relationships with other languages. She considers how a grammar can be made to reflect and bring to life the society of its speakers through background explanation and the judicious choice of examples, as well as by showing how its language, history, and culture are intertwined. She ends with a full glossary of terms and guidance for those wanting to explore a particular linguistic phenomenon or language family. The Art of Grammar is the ideal resource for students and teachers of linguistics, language studies, and inductively-oriented linguistic, cultural, and social anthropology.

THE LAW OF CONTRACTS AND THE UNIFORM COMMERCIAL CODE, 3e covers all the important features of common law contracts, as well as Article 2 of the Uniform Commercial Code in a practical, understandable, and realistic manner. Real cases demonstrate how the concepts in each chapter are applied, and the fact pattern is used throughout the chapter to demonstrate how contracts and their concepts affect our daily lives, often with unusual results. Using a fluid and interesting writing style, the author reduces contract law to its basic components and provides examples that build on other examples. Chapter summaries, review questions, exercises, a running glossary, and--new to this edition--learning objectives help your students to fully grasp this complex area of the law. Based on the Artech House classic ANSI SQL Data Modeling and Structure Processing, this expanded and updated book offers you an essential tool for utilizing the ANSI SQL outer join operation to perform simple or complex hierarchical data modeling and structure processing. The book provides you with a comprehensive review of the outer join operation, its powerful syntax and semantics, and new features and capabilities. This revised resource introduces several important new concepts such as relationship and hierarchical integration at the hierarchical processing level, multipath hierarchical automatic XML query processing, dynamic structured data processing using automatic metadata maintenance, and advanced data transformations. Featuring more than 230 illustrations, the book shows you how to tap the full power of data structure extraction technology that gathers data structure meta information naturally embedded in ANSI SQL specifications. You discover existing, but previously unknown, SQL capabilities for improving performance. The book explains how to perform multitable outer joins and combine relational structures with hierarchical structures. Moreover you learn how to

CD-ROM provides over 200 extra exercises to help you practice the grammar presented. Interpretation or construction is central to the operation of contract law. Despite the fundamental role it plays, there have been limited attempts to explain construction in holistic terms. This important book aims to fill that gap by offering a systematic exposition of the iterative process. It also goes further, suggesting practical solutions to disputes regarding questions of interpretation. The book argues that construction is not simply about establishing what words mean; it is a process through which objective intention is inferred from the choice of words in a contract. The interpretive process involves four steps: formulate the question of interpretation in dispute; explore competing answers to the

question; analyse the admissible material supporting each interpretation; and weigh and balance the competing considerations. By so doing, the book offers a simple yet sophisticated framework for interpreting/constructing contracts.

This volume constitutes the thoroughly refereed conference proceedings of the 25th International Conference on Industrial Engineering and Other Applications of Applied Intelligend Systems, IEA/AIE 2012, held in Dalian, China, in June 2012. The total of 82 papers selected for the proceedings were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on machine learning methods; cyber-physical system for intelligent transportation applications; AI applications; evolutionary algorithms, combinatorial optimization; modeling and support of cognitive and affective human processes; natural language processing and its applications; social network and its applications; mission-critical applications and case studies of intelligent systems; AI methods; sentiment analysis for asian languages; aspects on cognitive computing and intelligent interaction; spatio-temporal datamining, structured learning and their applications; decision making and knowledge based systems; pattern recognition; agent based systems; decision making techniques and innovative knowledge management; machine learning applications. Written for students without knowledge of

linguistics and unfamiliar with "traditional" grammar, this text concentrates on providing a much needed foundation in Standard English in preparation for more advanced work in theoretical linguistics.

Over the last 40 years, the study of word-order variation has become a prominent and fruitful field of research. Researchers of linguistic typology have found that every language permits a variety of word-order constructions, with subject, verb, and objects occupying varying positions relative to each other. It is frequently possible to classify one of the word orders as the basic or unmarked order and the others as marked. Moshavi's study investigates word order in the finite nonsubordinate clause in classical Biblical Hebrew. A common marked construction in this type of clause is the preposing construction, in which a subject, object, or adverbial is placed before the verb. In this work, Moshavi formally distinguishes preposing from other marked and unmarked constructions and explores the distribution of these constructions in Biblical Hebrew. She carries out a contextual analysis of a sample (the book of Genesis) of preposed clauses in order to determine the pragmatic functions that preposing may express. Moshavi's thesis is that the majority of preposed clauses can be classified as one of two syntactic-pragmatic constructions: focusing or topicalization. This meticulous yet approachable study will be useful both to students of Biblical Hebrew and to persons doing general study of syntax, especially those interested in the connection between linguistic form and pragmatic meaning.

during the 9th International Conference of the Association of Czech Teachers of English, titled “Teaching for Tomorrow” and hosted by the English Department of the Faculty of Science, Humanities and Education at the Technical University of Liberec, Czech Republic. The conference brought together English Language Teaching (ELT) professionals from primary, secondary and tertiary education to discuss a variety of English as a Foreign Language (EFL)-related topics, ranging from reports on language research to viewpoints and insights on classroom practice. The contributions are grouped into three sections: a) Focus on Selected Language Topics, b) Increasing Learner Autonomy and c) Innovative Teaching English as a Foreign Language (TEFL) ideas. Papers were carefully chosen in order to appeal to a broad audience. Consequently, there are articles which have a mainly theoretical bent and those which have a more practical leaning. Although the conference was hosted in the Czech Republic and the majority of participants were from this country, the book is relevant to any context where English is taught as a foreign or second language. Therefore, teachers, advanced students of English, language researchers, and, indeed, anyone engaged in the EFL profession will find this collection both educational and thought-provoking.

'The editor and authors in this volume make a convincing case for focusing on advanced foreign language instruction. Importantly, they invite consideration of this focus as an opportunity to re-examine conventional definitions of the target of instruction. In so doing, readers also learn more about the theories highlighted in this volume, and their capacity to enhance our understanding of advancedness and its development within an educational context. This book thus mediates between linguistic and language learning theories and educational practice, modelling the very best of what applied linguistics has to offer.' Education, University of Michigan. The reality of multicultural societies and globalization has increased the demand for language abilities that far exceed those that have typically been associated with communicative competence in a second language. This book examines the acquisition of advanced levels of ability in three parts: theoretical; descriptive; and instructional. It moves beyond the traditional constraints of second language acquisition research by linking systemic functional linguistics and sociocultural theory. The contributors draw primarily on the work of Halliday, Vygotsky and Bakhtin, as well as empirical data from the language classroom, to suggest practical applications towards advanced literacy and linguistic competence. Advanced Language Learning will be of interest to academics researching systemic functional linguistics, second language acquisition and applied linguistics.

Originally published in 1986. Deafness is not just a deprivation of sound, but a barrier to normal social interaction and learning. There are likely to be children with some degree of hearing loss in every primary classroom, so it is important that teachers know how to help them. This book gives a clear summary of the main causes of hearing loss (mild or severe), its identification, diagnosis and treatment, followed by an explanation of the impact it can have on a child's social and linguistic development. Considering normal development of literacy, the book then is concerned with the hearing-impaired child's strategies for reading, spelling and writing. It explores how teachers can give the most effective help, what the impact of a teaching programme is likely to be, and how to evaluate what the child has learnt. Specialist teachers of the deaf, advisers and psychologists, as well as class teachers and students of education will find this book very helpful.
