patients worldwide. Nowadays, several therapeutic strategies had improved toward last decades. Surgery is many times still the best curative treatment, mainly in early stage disease. However, Radiotherapy and chemotherapy acquired a main role in this scenario. Target therapies were introduced for medical oncology practice and are demonstrating a hallmark of a new era in cancer treatment. More recently, immunotherapy has been considered the novel cornerstone in cancer treatment. The 2nd edition of the International Manual of

This Manual of Interventional Oncology by Douglas Coldwell is the culmination of more than 30 years of training, hands-on practice, and skills learned from oncology colleagues. The successful practice of interventional oncology (IO) requires familiarity with all cancer interventions, and the ability to recognize each of their strengths and weaknesses. Acquiring basic knowledge of all facets of the vast, ever-evolving cancer treatment paradigm enables greater understanding of how IO fits into the broad cancer management continuum. The first five chapters lay a solid foundation, detailing
