Ophthalmology In Focus

Clinical Ophthalmology: A Systematic Approach

Office and Emergency Room Diagnosis and

Treatment of Eye Disease

The Massachusetts Eye and Ear Infirmary Review

Manual for Ophthalmology

The Eye in Systemic Disease, Second Edition presents an overview of the relationship of the eye and medicine. The book details the

Access Free Clinical Ophthalmology A Systematic Approach Jack J Kanski

systemic aspects of diseases. The topics discussed include various eye conditions such as conjunctivitis, episcleritis, keratitis, keratoconjunctivitis sicca, and cataract. Endocrine, circulatory, rheumatological, neurological, pulmonary, and blood disorders are covered as well. Physicians and students of medicine and pathology will find the book very useful.

Written to help trainee ophthalmologists, this textbook is now the recognised text on optics for the examinations of the Royal College of Ophthalmologists and the Royal Surgical Colleges. It approaches the subject

Access Free Clinical Ophthalmology A Systematic Approach Jack J Kanski

from first principles and assumes no previous knowledge of optics. The book has been kept as simple as possible and is liberally complemented with diagrams designed to be easily understood and memorised. Only the most fundamental and clinically useful mathematical formulae are quoted, and the optical principles are applied to clinical situations. Ophthalmology examinations have changed substantially since the last edition was written and a total rewrite of this essential guide has become necessary. The third edition has been made more comprehensive and detailed to keep up with

these changes and incorporates three new chapters: refractive surgery, contact lenses and lasers. Other new material includes photometry, visual acuity, contrast sensitivity, colour vision, absorptive lenses, fluorescence, ultrasound, and the specular microscope.

In Focus Ophthalmology is aimed at all medical and health science students who require an introductory, low cost and highly illustrated guide to this specialty. The material is presented in double page spreads. The left-hand page has a synoptic and highly structured text (normally under the following

headings: incidence; clinical features; differential diagnosis; management; prognosis). The right-hand page has a selection of four to six clinical photographs. Ophthalmology In Focus is a convenient pocket size and therefore ideal for quick preparation before ward rounds. Each volume also includes self-assessment material, which is extremely helpful for preparation for examinations. Because of shorter hospital stays and more outpatient treatment, students are less likely to be able to see the full range of conditions on the ward - the books in this series help
