This title is directed primarily towards health care professionals outside of the United States. The cases discussed in Small Animal Ophthalmology cover selected areas of the subject, in particular common or potentially frustrating cases, as well as the occasional less frequently encountered diseases which should, nonetheless, be recognised by general practitioners. Each section is fully illustrated and useful appendices are included, covering ophthalmic emergencies, conditions which should be checked for in young animals and commonly used pharmacological agents. Unique new case-based approach relating essential theory to clinical practice Modern, highly designed and illustrated so key information can be seen at a glance Self testing, MCQs and remediation means these books are ideally suited for CPD or as an exam revision aid Essential for all general small animal veterinary practitioners and students This is a series of must-have practical handbooks covering specific veterinary problems using a unique, consistent, cases-based approach. From simple routine first opinion cases to referrals and more complex clinical scenarios, the series provides the essential knowledge that will lead to improved skills and practice for veterinary practitioners undertaking clinical professional development or students nearing the end of their courses and needing a vital examination revision aid. New case-based approach helps relate essential theory to the real world of the busy clinic Each case outlines: initial presentation, clinical signs, examination techniques, differential diagnoses, treatment options, clinical tips and relevant nursing information Highly illustrated using full colour throughout so key information can be found quickly and easily. Ideally suited for CPD and as an exam revision aid Shelter Medicine for Veterinarians and Staff, SecondEdition is the premier reference on shelter medicine. Provides fast access to reliable information on treating dermatologic diseases and conditions in dogs and cats Uses the popular Blackwell's Five-Minute Veterinary Consult format and alphabetic arrangement for quick reference Offers thorough updates to this popular handbook, including a new "basics" section, new topics, and updated therapeutics, as well as new and improved images of dermatoses for easy comparison with clinical cases Puts the most commonly used dermatology information at the clinician's fingertips for rapid decision-making Includes access to a companion website with client education handouts to download and use in practice

Feeding on "fat free" pet foods? This book offers essential guidance to the most common problems encountered in small animal general practice. Addressing 100 core scenarios, it is ideal for the undergraduate or newly qualified vet, and for those seeking an up-to-date refresher. Organized by presenting sign (diarrhoea, itching) or disease (diabetes mellitus, pancreatitis), and with colour illustration throughout, each chapter explains how to make a diagnosis which interventions are most appropriate in each general practice what the vet should say to the client before and after examination.The authors also offer invaluable advice on other key topics such as animal health checks, neutering and euthanasia, and they tackle the tough questions: What if it doesn't get better? What is the low cost option? When should I refer? Never before has so much practical information been brought together in a single volume. Like having an experienced or specialist clinician standing by your side in the consulting room, 100 Top Consultations will become a trusted companion for students and practitioners alike.
