Soon after the death of Alexander the Great, the priest Berossus wrote the first known narrative and comprehensive history of his native Babylon, and the priest Manetho likewise wrote the first such history of his native Egyptian civilization. Nothing like these histories had been produced before in these cultures. Clio's Other Sons considers why that is: why were these histories written at this point, and for what purposes? Berossus and Manetho operated at the crossings of several political, social, and intellectual worlds. They were members of native elites under the domination of

Macedonian overlords; in their writings we can see suggestions that they collaborated in the foreign rule of their lands, but at the same time we see them advocating for their cultures. Their histories were written in Greek and betray active engagement with Greek historical writing, but at the same time these texts are clearly composed from native records, are organized along lines determined by local systems of time-reckoning, and articulate views that are deeply informed by regional scholarly and wisdom traditions. In this volume John Dillery charts the interactions of all these features of these historians. An afterword considers Demetrius, the approximate contemporary of Berossus and Manetho in

time, if not in culture. While his associates wrote new histories, Demetrius' project was a rewriting of an existing text, the Bible. This historiographical "corrective" approach sheds light on the novel historiography of Manetho and Berossus.

present from the very beginning of written communication. Moving chronologically from the ancient world to the present, the book shows how written communication media evolved from cuneiform to the Kindle. Focusing on key technologies and vital periods of historical transition, it traces an evolution that elucidates the history of the written word, at each step examining and evaluating such aspects of technologies as memory capacity, readability and writability, durability, recyclability, information security, ease and mode of access, and cost. Additional attention is paid to how these technologies were made, how they were circulated, and who was reading them. Originally a Unesco project, this annotated bibliography results from more than 4,600 requests to media scholars and researchers for research reports, publications, and other information relating to violence and terrorism.

Although there is an international cast to the materials, most are from the U.S. Even though violence and terrorism permeate our myths and legends, there is increasing concern with their effect on viewers. This bibliography is particularly timely, with entries through spring 1987. The sections of the work (mass media content, mass media effects, pornography and the media, terrorism and the media) give a better idea of the work's scope than does the title. Choice [T]he annotations are clearly written, succinctly descriptive of the original work's research with test groups, and evaluative of research results. Reference Books Bulletin This

bibliography focuses on research and scholarly works relating to violence and terror. Consisting primarily of articles published in scholarly journals and books, this comprehensive work examines major topics such as violence and mass media content, violence and mass media effects, terrorism and the mass media, and pornography. Also included are articles from popular journals, reports published by the United States and other governments, conference papers, and dissertations. Each entry consists of the bibliographic citation and a short abstract; many of the sources include studies from other countries where relevant research has been conducted.

The compilers' introduction provides a clear definition of violence and terrorism as they are dealt with in this volume and offers an interesting overview of various aspects of the subject.
