The book starts from the fundamentals and builds up from there. It is intended to serve as a review of the state-of-the-practice in the field of big data handling. The traditional framework of relational databases can no longer provide appropriate solutions for handling big data and making it available and useful to users scattered around the globe. The study of big data covers a wide range of issues including management of heterogeneous data, big data frameworks, change management, finding patterns in

data usage and evolution, data as a service, service-generated data, service management, privacy and security. All of these aspects are touched upon in this book. It also discusses big data applications in different domains. The book will prove useful to students, researchers, and practicing database and networking engineers.

Cloud computing is here to stay. If you're a

Access Free Cloud Computing 101 A Primer For Project Managers

Project Manager, you're increasingly likely to encounter situations in which cloud computing will have an impact on your project - whether you want it to or not! Often, you may have no choice - especially if a boss, customer or sponsor states, "You will use cloud computing in this project!" If you ask why, chances are the answer will be, "Because everyone else is using them!" As a PM, you need to be able to make sure that everyone involved with your project understands which of the three basic types of clouds are appropriate for

Access Free Cloud Computing 101 A Primer For Project Managers

that project. Each type of cloud has specific capabilities and limitations. Some come with different service models, as well as different "deployment models," each with its own advantages and disadvantages. This book helps you cut through the jargon and hype surrounding clouds and cloud-based services. It will enable you to distinguish between the different types of clouds, service models, deployment models, and their relative strengths and limitations. It will help you:

- * Effectively manage project team and stakeholder expectations***
