This book features selected papers from the 11th Asia-Oceania Symposium on Fire Science and Technology (AOSFST 2018), held in Taipei, Taiwan. Covering the entire spectrum of fire safety science, it focuses on research on fires, explosions, combustion science, heat transfer, fluid dynamics, risk analysis and structural engineering, as well as other topics. Presenting advanced scientific insights, the book introduces and advances new ideas in all areas of fire safety science. As such it is a valuable resource for academic researchers, fire safety engineers, and regulators of fire, construction and safety authorities. Further it provides new ideas for more efficient fire protection.

Learn essential technical rescue know-how with Fundamentals of Technical Rescue! Beginning with an introduction to technical rescue and progressing through discussions of tools and equipment, incident management, and conducting search operations, this text will introduce students to all aspects of the rescue process and the various environments in which they may be carried out. Fundamentals of Technical Rescue presents in-depth coverage of structural collapse, confined space and trench rescue, vehicle rescue, and water and wilderness rescue to allow students to approach any rescue situation confidently. Fundamentals of Technical Rescue includes coverage of both the awareness level requirements found in the 2009 Edition of NFPA 1670, Standard on Operations and Training for Technical Search and Rescue Incidents and Level I requirements found in the 2008 Edition of NFPA 1006, Standard for Technical Rescuer Professional Qualifications.

The Third Edition provides a comprehensive introduction to trench rescue, focusing on the knowledge and skills required to effectively perform rescues in a variety of trench environments.

Ray Downey wrote the first edition of The Rescue Company in the early 1990s. Building on Downey's legacy, John Norman has written Fire Department Special Operations to take into consideration the earth-shattering events, funding increases, research advances, expanded capabilities, and changes in regulations and standards that have widened the knowledge gap since the publication of Chief Downey's book. Fire Department Special Operations is an excellent guide for agencies and individuals in establishing, staffing, operating, and maintaining heavy rescue units in the many forms they may take. It is also an ideal training resource for the officers and individuals assigned the duties that a rescue firefighter must accomplish.

In addition to reprinting the PDF of the CMS CoPs and Interpretive Guidelines, we include key Survey and Certification memos that CMS has issued to announced changes to the emergency preparedness final rule, fire and smoke door annual testing requirements, survey team composition and investigation of complaints, infection control screenings, and legionella risk reduction.

Guides the reader in the development and maintenance of a rope access program Provides comprehensive guidance for employers, safety managers and rope access technicians to develop, maintain, and manage a rope access program Offers specific guidance for writing a comprehensive managed fall protection plan that includes rope access Thoroughly describes how to perform specific rope access maneuvers that can be used to offer greater safety when working at height Shows how a well-managed rope access program can be used as a tool to get more work accomplished at a lower cost and with greater efficiency than conventional methods can achieve Discusses and clarifies unique distinctions of equipment for rope access, as compared with equipment for fall arrest, positioning, and restraint

*From Aviation Supplies & Academics, trusted publisher of Federal Aviation Administration resources. This book is also available bundled with ASA Inspection Authorization Test Prep. This FAA-CT-8080-8D is the most current testing supplement, released by the FAA in June 2008. It supersedes the earlier FAA-CT-8080-8C, dated 2005. This publication was prepared by the Flight Standards Service of the Federal Aviation Administration (FAA) for the specific purpose of Inspection Authorization (IA) testing at selected testing centers. Applicants for Inspection Authorization Certificates will be required to use FAA-CT-8080-8D, Computer Testing Supplement for Inspection Authorization, to answer the computer-assisted IA airman knowledge test questions. The supplement material consists of excerpts of selected advisory circulars, airworthiness directives, Code of Federal Regulations, type certificate data sheets, aircraft specifications, FAA orders, and forms. Applicants should note that reference material contained in this supplement is for testing purposes only. To ensure current material is available for use in day-to-day certification activities, users should be aware that they must initiate and order the publications desired, and maintain contact with the managing FAA office for the latest information, forms, and guidance.*

His unique book explains how to select and use ropes, cordage, and webbing for the outdoors. Invaluable information is provided on rope handling techniques (how to avoid dreaded tangles) and the best methods for rope care and maintenance. Step-by-step directions for tying over 40 knots are clearly illustrated with photographs. Other useful features include a glossary and a knot comparison chart by activity. Chapters include Knots Basics (from Tripod Lashing to the Figure 8 Loop), Knots for Hikers and Climbers (from the Prusik knot to the Autoblock), Knots for Canoeists and Kayakers (from the Buntline hitch to the Bowline on a bight), and more. This is the definitive text on ropes and knots for anyone who plays in the outdoors!*

The assault on North Africa on 8 November 1942 led to a bitter conflict that finally culminated in the defeat of the Axis forces in Tunisia seven months later. The campaign was, for the U.S. Army, a school in coalition warfare and an introduction to enemy tactics.

We the people—these words embody the ethos of what it means to be an American citizen. As individuals we are a tapestry of colors and creeds; united we are a nation committed to preserving our hard-earned freedom. In this heart-stirring collection of watercolor portraits of military veterans—one from each of the fifty states—artist Mary Whyte captures this ethos as well as the dedication, responsibility, and courage it takes to fulfill that promise. Those who raise their hands to serve may join for different reasons, but all—along with their families—make the extraordinary commitment to place the needs of the country before their own. Whyte gives us the opportunity to meet and to see some of them—to really see them. Whyte's portrait of America includes individuals from many walks of life, some still active duty, and from every branch: women and men, old and young, and from a wide swath of ethnicities, befitting our glorious melting pot. From a mayor to an astronaut, from a teacher to a garbage collector, from a business entrepreneur to someone who is homeless, Whyte renders their unique and exceptional lives with great care and gentle brush strokes. We the People is not only a tour across and through these vast United States, it is a tour through the heart and soul, the duty and the commitment of the people who protect not only our Constitution and our country but our very lives. We can only be deeply grateful, and humbled by all of them.

Swiftwater Rescue 2nd Edition offers an in-depth look at swiftwater rescue for the professional – firefighters, park rangers, law enforcement, EMS personnel – as well as anyone who might be faced with the possibility of a flood or swiftwater rescue. Topics include rescuer safety considerations and equipment; river hydrology; equipment; shore-based, boat-based, and in-water rescue techniques; medical considerations; rigging for river rescue; incident command, animal rescue, and swiftwater training. Densely illustrated with line drawings and black & white photographs, the second edition also covers advanced subjects like the use of helicopters in swiftwater rescue and special situations like low-head dams, urban flooding, and flood channel rescues.

\* Author was an American Mountain Guide Association (AMGA) certified rock guide and instructor\* Learning exercises reinforce key skills\* Step-by-step technique illustrated in over 150 photosCraig Luebben taught rock climbing basics to hundreds of clients and has conducted

self-rescue clinics across the U.S. Here he presents the most common foot positions, hand grips, and body positions and how to use them precisely, from the smear to the crimp to the twistlock. Going beyond static moves, he emphasizes a dynamic style of movement for the greatest climbing efficiency—a style that makes the most of your strength and your time on the rock. With an emphasis on safety and how to stay within your abilities, Luebben teaches how to evaluate potential hazards and then avoid them. Topics addressed include: risk management, face climbing, crack climbing, gear, knots, anchors, belaying, top roping, sport climbing, trad climbing, multi-pitch free climbs, rappelling, aid climbing, bouldering, training, and self-rescue. Craig Luebben guided professionally for more than twenty years.

The author of How to Rappel, How to Ice Climb, and other titles, he also wrote for magazines including Climbing and Rock & Ice. He opened many new routes on four continents.Part of the Mountaineers Outdoor Expert series.

The 2020 UNODC Global Report on Trafficking in Persons is the fifth of its kind mandated by the General Assembly through the 2010 United Nations Global Plan of Action to Combat Trafficking in Persons. It covers more than 130 countries and provides an overview of patterns and flows of trafficking in persons at global, regional and national levels, based primarily on trafficking cases detected between 2017 and 2019. As UNODC has been systematically collecting data on trafficking in persons for more than a decade, trend information is presented for a broad range of indicators.

"The definitive guide to mountains and climbing . . ."—Conrad Anker For nearly 60 years it's been revered as the "bible" of mountaineering—and now it's even better than ever • The best-selling instructional text for new and intermediate climbers for more than half a century • New edition—fully updated techniques and all-new illustrations • Researched and written by a team of expert climbers Mountaineering: The Freedom of the Hills is the text beloved by generations of new climbers—the standard for climbing education around the world where it has been translated into 12 languages For the all-new 9th Edition, committees composed of active climbers and climbing educators reviewed every chapter of instruction, and discussed updates with staff from the American Alpine Club (AAC), the American Institute for Avalanche Research and Education (AIARE), and the Access Fund. They also worked with professional members of the American Mountain Guides Association (AMGA) to review their work and ensure that the updated textbook includes the most current best practices for both alpine and rock climbing instruction. From gear selection to belay and repel techniques, from glacier travel to rope work, to safety, safety, and more safety—there is no more comprehensive and thoroughly vetted training manual for climbing than the standard set by Mountaineering: The Freedom of the Hills, 9th Edition. Significant updates to this edition include: • New alignment with AAC's nationwide universal belay standard • Expanded and more detailed avalanche safety info, including how to better understand avalanches, evaluate hazards, travel safely in any terrain, and locate and rescue a fellow climber in an avalanche • Newly revamped chapters on clothing and camping • All-new illustrations reflecting the latest gear and techniques—created by artist John McMullen, former art director of Climbing magazine • Review of and contributions to multiple sections by AMGA-certified guides • Fresh approach to the Ten Essentials—now making the iconic list easier to recall

Bramnigan's Building Construction for the Fire Service, Fourth Edition is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Bramnigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Bramnigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs every aspect of this new edition of the text. Listen to a Podcast with Bramnigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Bramnigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition. *The CMC Rope Rescue Technician Manual is the standard text for many fire departments, rescue teams and training programs across the country. The sixth edition reflects the latest advances in technology, equipment and procedures available to rescue professionals. Its concise style clearly sequences and describes the elements of rope rescue in a way that is both detailed and easy to understand. Well-drawn diagrams depict each recommended stage of rope rescue operations. The result is a very useful tool for rescue professionals at every skill level. CMC has been an innovator in the emergency services industry for over 40 years. In 1978 Jim Frank endeavored to make rescue safer and more efficient by founding California Mountain Company (later CMC Rescue, now CMC), a company that sourced and supplied specialized life safety equipment to the rescue community. Today, CMC is a globally recognized, employee-owned company that proudly manufactures many products in our ISO-certified Santa Barbara facility, and provides specialized education and training for rescue and rope access professionals. CMC recommends that all rope technicians seek qualified, hands-on instruction from a trusted source. The CMC School provides this type of training with a focus on learning-by-doing. Open enrollment and custom courses are available worldwide. For more information on CMC or the CMC School, visit [cmcpro.com](http://cmcpro.com).*

*This book provides an overview of all aspects of search and rescue procedures and equipment. It teaches the absolutely essential techniques employed by nearly all search and rescue personnel. *As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam, going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is, in fact, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first time in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am*

*responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must take note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare—the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime.
