"[E]xamines the former Congressman Melvin Laird's efforts to reconstitute the Department of Defense during the last years of the Vietnam war... Laird acted to mitigate the adverse effects of the Vietnam War on the department and to prepare the nation's armed forces for the future. Foremost was the transition from a conscripted military to an all-volunteer force, a fundamental policy shift that ended an unpopular and inequitable draft system."--from jacket.

The History of Long Melford

Among Asian languages, Tibetan is second only to Chinese in the depth of its historical record, with texts dating back as far as the eighth and ninth centuries, written in an alphabetic script that preserves

the contemporaneous phonological features of the language. The Classical Tibetan Language is the first comprehensive description of the Tibetan language and is distinctive in that it treats the classical Tibetan language on its own terms rather than by means of descriptive categories appropriate to other languages, as has traditionally been the case. Beyer presents the language as a medium of literary expression with great range, power, subtlety, and humor, not as an abstract object. He also deals comprehensively with a wide variety of linguistic phenomena as they are actually encountered in the classical texts, with numerous examples of idioms, common locutions, translation devices, neologisms, and dialectal variations. Economic growth and socio-economic development are particularly important for developing countries, and the construction industry plays a central role in driving both of these. Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context. In addition, research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries, or their economic and social environment. This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries. In so doing

it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers. It forms a companion volume to New Perspectives on Construction in Developing Countries which provides an update on the generic subjects relating to the construction industry in developing countries, and covers new concepts and issues.

A stumbling block for Revisionists, just as it was for the post-war German defendants, is the seeming wealth of documents and testimony assembled by Allied prosecutors for the Nuremberg trials. The more than sixty volumes of trial material which appeared in the wake of the "Trial of the Major War Criminals" and twelve subsequent trials before the (American) Nuremberg Military Tribunal have for many years supplied a massive compilation of apparently damning evidence against Germany's National Socialist regime. Most Exterminationists, academic and lay, believe that Germany's "aggression" in beginning the war, and the numerous

atrocities and war crimes laid to the German account, above all the alleged Holocaust of European Jewry, are amply documented in the so-called "Nuremberg record".

The Development of Armoured Forces, Their Tactics and Operational Potential

Here is an informative introduction to language: its origins in the past, its growth through history, and its present use for communication between peoples. It is at the same time a history of language, a guide to foreign tongues, and a method for learning them. It shows, through basic vocabularies, family resemblances of languages -- Teutonic, Romance, Greek -- helpful tricks of translation, key combinations of roots and phonetic patterns. It presents by common-sense methods the most helpful approach to the mastery of many languages; it condenses vocabulary to a minimum of essential words; it simplifies grammar in an entirely

new way; and it teaches a language as it is actually used in everyday life.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
