Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

In an age when students come to class with more varied music listening preferences and experiences than ever before, music educators can find themselves at a loss for how to connect with their students. Listening in Action provides the beginnings of a solution to this problem by characterizing students’ contemporary music listening experiences as they are mediated by digital technologies. Several components of contemporary music listening experiences are described, including: the relationship between music listening experiences and listener engagements with other activities; listener agency in creating playlists and listening experiences as a whole; and the development of adolescent identities as related to the agency afforded by music listening devices. The book provides an accessible introduction to scholarship on music listening across the disciplines of musicology, ethnomusicology, sociology of music, psychology of music, and music education. By reading Listening in Action, music educators can gain an understanding of recent theories of music listening in everyday life and how those theories might be applied to bridge the gap between music pedagogies and students who encounter music in a heavily mediated, postperformance world.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. This volume discusses pleasurable design — a part of the traditional usability design and evaluation methodologies. The book emphasizes the importance of designing products and services to maximize user satisfaction. By combining this with traditional usability methods it increases the appeal of products and use of services.

Most classical musicians, whether in orchestral or ensemble situations, will have to face a piece by composers such as Ligeti, Messiaen, Varèse or Xenakis, while improvisers face music influenced by Dave Holland, Steve Coleman, Aka Moon, Weather Report, Irakere or elements from the Balkans, India, Africa or Cuba. Rafael Reina argues that today’s music demands a new approach to rhythmical training, a training that will provide musicians with the necessary tools to face, with accuracy, more varied and complex rhythmical concepts, while keeping the emotional content. Reina uses the architecture of the South Indian Karnatic rhythmical system to enhance and radically change the teaching of rhythmical solfege at a higher education level and demonstrates how this learning can influence the creation and interpretation of complex contemporary classical and jazz music. The book is designed for classical and jazz performers as well as creators, be they composers or improvisers, and is a clear and complete guide that will enable future solfege teachers and students to use these techniques and their methodology to greatly improve their rhythmical skills. An accompanying website of audio examples helps to explain each technique. For examples of composed and improvised pieces by students who have studied this book, as well as concerts by highly acclaimed karnatic musicians, please copy this link to your browser: http://www.contemporary-music-through-non-western-techniques.com/pages/1587-video-recordings

Ever heard of benzodiazepines? How about z-drugs? Perhaps you know their brand names, like Ambien, Ativan, Klonopin, Lunesta, Valium or Xanax. Millions of people around the world take these drugs every day and very few know much about them, let alone what it's like to withdraw. My hope is to change that. For those who experience benzodiazepine withdrawal syndrome (BWS), incessant questions run rampant, but answers are few. I searched high and low to find information during my withdrawal, and in the midst, Benzo Free was born. By the time I finished writing the first draft, I'd spent four years reading and cataloging over a thousand separate articles, books, and scientific studies. In this book, I aim to present an honest and objective look at the world of anti-anxiety drugs and provide some encouragement, solace, and even some answers for those who struggle each day from the effects of these drugs.

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book’s focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

The first book to look at innovation/entrepreneurship from an international perspective, Managing Innovation and Entrepreneurship: A Global Perspective provides a step-by-step process for managing innovation and entrepreneurship in an organization in both turbulent and stable economic times. Authors Robert D. Hisrich and Claudine Kearney demonstrate how to manage innovation on a day-to-day basis-using a wide range of real world scenarios, theories, principles, best practices, case studies, and modern examples. The book provides detailed coverage of each aspect of the process of innovation required to achieve success, including what it takes to build an innovative and entrepreneurial organization, how to develop innovation and entrepreneurship in both individuals and teams, how to manage and operationalize innovation and entrepreneurship, how to develop a global business plan, and more.

The Chainsaw Operator’s Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the ‘tension’ and ‘compression’ forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

The Mamba Mentality: How I Play is Kobe Bryant’s personal perspective of his life and career on the basketball court and his exceptional, insightful style of playing the game—a fitting legacy from the late Los Angeles Laker superstar. In the wake of his retirement from professional basketball, Kobe “The Black Mamba” Bryant decided to share his vast knowledge and understanding of the game to take readers on an unprecedented journey to the core of the legendary “Mamba mentality.” Citing an obligation and an opportunity to teach young players, hardcore fans, and devoted students of the game how to play it “the right way,” The Mamba Mentality takes us inside the mind of one of the most intelligent, analytical, and creative basketball players ever. In his own words, Bryant reveals his famously detailed approach and the steps he took to prepare mentally and physically to not just succeed at the game, but to excel. Readers will learn how Bryant studied an opponent, how he channeled his passion for the game, how he played through injuries. They’ll also get fascinating granular detail as he breaks down specific plays and match-ups from throughout his career. Bryant’s detailed accounts are paired with stunning photographs by the Hall of Fame photographer Andrew D. Bernstein. Bernstein, long the Lakers and NBA official photographer, captured Bryant’s very first NBA photo in 1996 and his last in 2016—and hundreds of thousands in between, the record of a unique, twenty-year relationship between one athlete and one photographer. The combination of Bryant’s narrative and Bernstein’s photos make The Mamba Mentality an unprecedented look behind the curtain at the career of one of the world’s most celebrated and fascinating athletes.

Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all con- nents to ICCHP. The International Programme Committee, encompassing 102 experts form all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize “Special Thematic Sessions” (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the me- ing into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the - portance of giving access to ICT and AT at a global level. In another keynote by H- old Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

A “blistering exposé” of the USA’s secret history of financial, political, and cultural exploitation of Latin America in the 20th century, with a new introduction (Publishers Weekly). What happened when a wealthy industrialist and a visionary evangelist unleashed forces that joined to subjugate an entire continent? Historians Gerard Colby and Charlotte Dennett tell the story of the forty-year campaign led by Standard Oil scion Nelson Rockefeller and Wycliffe Bible Translators founder William Cameron Townsend to establish a US imperial beachhead in Central and South America. Beginning in the 1940s, future Vice President Rockefeller worked with the CIA and allies in the banking industry to prop up repressive governments, devastate the Amazon rain forest, and destabilize local economies—all in the name of anti-Communism. Meanwhile, Townsend and his army of missionaries sought to undermine the belief systems of the region’s indigenous peoples and convert them to Christianity. Their combined efforts would have tragic and long-lasting repercussions, argue the authors of this “well-documented” (Los Angeles Times) book—the product of eighteen years of research—which legendary progressive historian Howard Zinn called “an extraordinary piece of investigative history. Its message is powerful, its data overwhelming and impressive.”

CROSSCURRENTS: CULTURES, COMMUNITIES, TECHNOLOGIES is a combined print and online text/webtext designed to provide readings and activities that allow students not only to critically examine mass culture and the media that circulates it but also to engage rhetorically with electronic communication, presentation, and web-authoring and digital imaging technologies. CROSSCURRENTS is available in both printed text and as an electronic text with additional links to YouTube and websites chosen by the authors to extend the conversation and learning experience. CROSSCURRENTS represents the first in a new generation of texts that doesn't make instructors choose between teaching traditional rhetorical concerns and helping students develop as writers and readers of electronic media.
