Have you looked around at the world and felt as though everything was falling apart? America is struggling economically and no one has any answers. Unemployment has been over 9% for over two years now. It feels like the government is trying to take control of our lives. There is speculation that Greece might collapse economically, and, if they do, other European countries will follow suit. The Middle East is in total chaos and very unstable, with all these people rioting in the streets and wreaking havoc on their respective countries, along with dictators falling and rising from power. Iran is still telling everyone they are intent on annihilating Israel as they improve their nuclear capabilities. As Christians, our hope is in Jesus Christ; we know that our God is sovereign, so all the chaos in the world has no effect on how God brings the world to an end. But the end is in sight, and people are looking for something certain in this world. There are so many questions Christians have regarding End Times Prophecy and do not understand, simply because the church has not fulfilled its purpose in rightly dividing the Word of truth for the saints. The Complete Layman's Guide to End Times Prophecy will bring together all the questions one might have regarding the end of the world and the return of the Warrior King Jesus Christ to this earth to set up His millennial kingdom. This book is clear, concise, and cogent in its message and attempts to address all End Times Prophecy questions. As autism rates in children continue to rise--the latest studies suggest anywhere from 1 in 50 to 1 in 100 American children is autistic--parents are scrambling to find effective treatment methods. The Natural Medicine Guide to Autism offers answers by exploring a range of effective treatment options and the possibility of a positive outcome via natural medicine therapies. The book covers the basics of autism--what it is and what causes it--and the factors that are often involved in the disorder: heavy metal toxicity, nutritional deficiencies/imbbalances, food allergies, digestive problems and fungal overgrowth, viruses or viral overload, immune dysfunction, problems in the birthing process, energetic legacies from unresolved family issues in previous generations, and vaccines. It also covers a range of natural medicine treatments, including elimination diets, listening and learning skills, nutritional supplements to correct imbalances, cranial osteopathy to reverse birth trauma, and many more. A chapter is also devoted to the deeper question of what makes a child susceptible to autism. Included in this discussion is the work of William J. Walsch, PhD, whose research may well have pinpointed the genetic component of autism that has previously eluded scientific inquiry.
