The Social Sciences Empowered contains papers presented at the 7th International Congress on Interdisciplinary Behavior and Social Science 2018 (ICIBSoS 2018), held 21-22 July 2018, Bangkok, Thailand, 22-23 September 2018, Bali, Indonesia, 6-7 October 2018, Kuta, Bali, Indonesia, and 24-25 November 2018, Yogyakarta, Indonesia. ICIBSoS 2018 provided the economic and social analysis necessary for addressing issues in Humanities disciplines such as Education, Sociology, Anthropology, Politics, History, Philosophy, Psychology as well as food security. Contributions to these proceedings give necessary insight into the cultural and human dimension of such diverse research areas as transport, climate change, energy and agriculture. ICIBSoS 2018 also analyses the cultural, behavioural, psychological, social and institutional drivers that transform people's behaviour and the global environment. ICIBSoS 2018 proposes new ideas, strategies and governance structures for overcoming the crisis from a global perspective, innovating the public sector and business models, promoting social innovation and fostering creativity in the development of services and product design.

Industry and Commerce of Zimbabwe Rhodesia

In the last two hundred years, the earth has increasingly become the private property of a few classes, races, transnational corporations, and nations. Repeated claims about the "tragedy of the commons" and the "crisis of capitalism" have done little to explain this concentration of land, encourage solution-building to solve resource depletion, or address our current socio-ecological crisis. The Commons in an Age of Uncertainty presents a new explanation, vision, and action plan based on the idea of commoning the land. The book argues that by commoning the land, rather than privatising it, we can develop the foundation for prosperity without destructive growth and address both local and global challenges. Making the land the most fundamental priority of all commons does not only give hope, it also opens the doors to a new world in which economy, environment, and society are decolonised and liberated.

As organizations continue to move towards digital enterprise, the need for digital transformation continues to grow especially due to the COVID-19 pandemic. These impacts will last far into the future, as newer digital technologies continue to be accepted, used, and developed. These digital tools will forever change the face of business and management. However, on the road to digital enterprise transformation there are many successes, difficulties, challenges, and failures. Finding solutions for these issues through strategic thinking and identification of the core issues facing the enterprise is of primary concern. This means modernizing management and strategies around the digital workforce and understanding digital business at various levels. These key areas of digitalization and global challenges, such as those during or derived from the pandemic, are new and unique; They require new knowledge gained from a deep understanding of complex issues that have been examined and the solutions being discovered. Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation explores the key challenges being faced as businesses undergo digital transformation. It provides both solutions and best practices for not only handling and solving these key issues, but for becoming successful in digital enterprise. This includes topics such as security and privacy in technologies, data management, information and communication technologies, and digital marketing, branding, and commerce. This book is ideal for managers, business professionals, government, researchers, students, practitioners, stakeholders, academicians, and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective.

Research Trends in Multidisciplinary subjects - Volume 2

A "digital divide" threatens the global trade regime. And it is not narrowing; it is rapidly becoming an unbridgeable chasm. Nor is this a problem merely for developing countries: the headlong trend
toward dematerialisation of trade documents in the developed world will grind to a halt unless all trading countries without exception possess the legal and operational ability to participate in paperless
trade. This challenging work not only describes the obstacles to universal support for paperless trade, but also provides solutions that can be implemented if stakeholders make the collective effort to
achieve this most desirable (and in fact necessary) goal. Dr. Laryea investigates such central issues as the following: legal problems and security risks not encountered in paper documentation;
accommodating low-tech problems with electronic documentation; and funding the construction of information and communication technology infrastructure in developing countries. The presentation focuses on
each of the essential contract documents in turn, from the quotation to the documentary credit, explaining exactly how the electronic versions of each work (particularly in terms of security), and why
each is desirable. As the first comprehensive set of practical proposals, from a truly global perspective, for the speedy dematerialisation of trade documents, Paperless Trade is essential reading for
traders, practitioners, academics, and national and international officials and policymakers engaged in facilitating world trade.

The dot-com revolution has brought many advances before unimagined. Of them all, it may be said that none have surpassed e-government in attracting a significant number of researchers and practitioners from around the world. However, the question remains
whether everyone is ready to join the e-government movement, or if some are just blindly following the latest trend. Digital Solutions for Contemporary Democracy and Government touches on several key issues and challenges surrounding the recent e-
government boom and offers practical solutions from those who have been a part of implementing e-government programs internationally. Due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics, democracy,
and government, this authoritative book is a valuable reference source for professionals, researchers, and students in the field of e-government, information management, or knowledge management.
