***Develop the right
IC program for
your practice's
unique needs***

Many physicians who operate their own practice have nowhere to turn for a resource to help develop an IC program. There are guidelines for other medical environments, such as acute-

care hospitals or long term care facilities, which have many staff and departments that can assist in implementing and maintaining an IC plan. Those guidelines won't work in a physician's

office. In most offices, it's the medical assistants who perform the majority of the work and have the responsibility to oversee IC efforts--with little professional training.
