Effective Police Supervision Study Guide

Because police are the most visible face of government power for most citizens, they are expected to deal effectively with crime and disorder and to be impartial. Producing justice through the fair, and restrained use of their authority. The standards by which the public judges police success have become more exacting and challenging. Fairness and Effectiveness in Policing explores police work in the new century. It replaces myths with research findings and provides recommendations for updated policy and practices to guide it. The book provides answers to the most basic questions: What do police do? It reviews how police work is organized, explores the expanding responsibilities of police, examines the increasing diversity among police employees, and discusses the complex interactions between officers and citizens. It also addresses such topics as community policing, use of force, racial profiling, and evaluates the success of common police techniques, such as focusing on crime "hot spots." It goes on to look at the issue of legitimacy "how the public gets information about police work, and how police are viewed by different groups, and how police can gain

community trust. Fairness and Effectiveness in Policing will be important to anyone concerned about police work: policy makers, administrators, educators, police supervisors and officers, journalists, and interested citizens.

Community policing, as a philosophy, supports the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder, and fear of crime—as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Originating during police reform efforts of the 1970s, the philosophy of community policing is currently widespread and embraced by many citizens, police administrators, scholars, and local and federal politicians. What sorts of collaborative partnerships have evolved between policing agencies and the individuals and communities they serve? How do police departments engage in systematic examination of identified problems to develop effective responses? How have police departments aligned their organizational structures to best support community partnerships and proactive problem solving? Just how effective have efforts at community policing been? These questions and more are explored within the pages of this new reference work. Features: A collection of 150 to 175 entries are organized in A-to-Z fashion in one volume available in both electronic and print formats. Signed entries, authored by significant figures in the field, each conclude with Cross-References and Suggestions for Further Readings to guide

students to in-depth resources. Brief "What Works" case studies within appropriate entries profile community policing programs and strategies as tried in various cities and communities. Although organized in A-to-Z fashion, a thematic "Reader's Guide" in the front matter groups related entries by broad topic areas (e.g., Foundations; Methods & Practices; Legislation & National Organizations; Changing Agency Culture; Planning & Implementation; Training & Curriculum; Assessment & Evaluation; etc.). Also included in the front matter, a Chronology provides students with historical perspective of the development of community policing. The entire work concludes with a Resources appendix listing classic books, journals, and associations, followed by a comprehensive Index.

Fully updated to reflect the latest changes in the field, this new edition provides comprehensive, practical coverage of both law enforcement and the criminal justice system as a whole (including courts, corrections, and juvenile justice) in one convenient volume. Acclaimed for its uniquely accessible writing style, many real-world examples, and its realistic and relevant boots on the street perspective, this new edition is packed with up-to-date information on today's hottest topics. These include the numerous ways technology is changing the day-to-day operations of policing; the recommendations of the President's Task Force on 21st Century Policing, including the need to improve trust and legitimacy with the public and a shift to a guardian mindset; the law enforcement response to new terrorism threats such as ISIS and homegrown violent extremists, the consequences of Brady-Giglio violations, and more. **Important Notice:** Media content referenced within the product description or the product text may not be available in the ebook version.

LOS ANGELES TIMES BESTSELLER The problem is not overpolicing, it is policing itself. Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice.

The best solution to bad policing may be an end to policing.

This report presents the findings of an evaluation of a project funded by the National Institute of Justice in 1987 and to improve policing in Madison, Wisconsin through the use of community policing concepts. An experimental police district was established that decentralized approximately one-sixth of the police agency's personnel. The experimental district promoted innovation through employee participation in decisionmaking about work conditions and the delivery of police service, management and supervisory styles supportive of employee participation and of community- and problem-oriented policing, and the implementation of community- and problem-oriented policing. The 3-year evaluation study compared outcome variables, measured before and 2 years after the implementation of the police district. Data collection methods included three surveys of police personnel, two citizen surveys, observations, structured interviews, and a review of agency documents and press coverage. Findings indicated that the Madison Police Department has succeeded in changing the internal culture of the organization to one in which employees feel involved in decisionmaking about their work. Decentralization made an important contribution to the process of creating the new management style and also contributed to the development of team spirit and processes. The effects of the change effort on the community are somewhat less dramatic, although a pattern of improved public attitudes was found, together with a statistically significant reduction in the number of reported burglaries in the area.

MANAGEMENT AND SUPERVISION IN LAW ENFORCEMENT is a practical and straightforward book that focuses on law enforcement managers and supervisors, their jobs, and the complicated interrelationships between members of the law enforcement team and the communities they serve. The seventh edition has an increased emphasis on leadership and has been reorganized to begin with a general overview of the policing profession, thereby providing context for later discussions of the role of managers within the field. The text focuses on post-9/11 policing and includes research on the effects of 9/11 as well as discussion of data-driven policing (including CompStat policing), intelligence-led policing, evidence-based policing, and predictive policing. A new Ethical Dilemma boxed feature challenges students to think critically about the gray moral issues faced by supervisors every day. **MANAGEMENT AND SUPERVISION IN LAW ENFORCEMENT, 7th Edition**, presents a comprehensive overview of the responsibilities of law enforcement leaders, covering relevant topics ranging from the newest principles in policing to the exiting technological aids changing the face of law enforcement today—preparing readers to become tomorrow's leaders. **Important Notice:** Media content referenced within the product description or the product text may not be available in the ebook version.

Police Operations: Theory and Practice

The Madison, Wisconsin, Police Department undertook an effort to create a new organizational design to support community-oriented and problem-oriented policing. One-sixth of the department serving approximately one-sixth of the population was developed as an Experimental Police District (EPD). Community policing in Madison strived to implement quality leadership, a healthy workplace, improved service delivery, and community benefits. This evaluation had three objectives: document the process of developing the EPD, measure the internal effects of change, and measure the effects of change on the community. In addition to quality leadership, the internal effects focused on in the evaluation included employee input, working conditions, job-related attitudes, and officers' reactions to change. External effects included perceived police presence, frequency and quality of police-citizen contacts, problem-solving, perceptions of neighborhood conditions, levels of worry and fear, and actual victimization. The report found that the successful implementation of a participatory management approach improved employees' attitudes toward the department, decentralized operations, and reduced citizens' fears of crime and increased their belief that police were working for the benefit of the community.

With a strong focus on problem solving and community-police partnerships, Miller, Hess, and Orthmann's comprehensive text provides a practical, up-to-date guide to effective community policing. After introducing the history and philosophy of the movement that has profoundly shaped modern police operations, the authors emphasize practical strategies and essential skills to help readers apply effective, real-world problem solving within their communities. In light of high-profile deadly force incidents that have strained the relationships between the community and the police, this edition taps into the recommendations in the Final Report of the President's Task Force on 21st Century Policing and its call for a renewed emphasis on community policing to strengthen public trust and build police legitimacy. And, the MindTap that accompanies the text helps students master techniques and key concepts while engaging them with career-based decision-making scenarios, visual summaries, and more. COMMUNITY POLICING AND PROBLEM SOLVING: STRATEGIES AND PRACTICES, 6/e is about policing at its most important and challenging levels—in neighborhoods and communities across the nation and abroad. Unique in perspective, its focus is on community policing and problem solving—and the processes that are being implemented under COPPS to control and prevent crime, disorder and fear. Extremely applied, this text focuses on daily processes and tactics and how and why agencies are revolutionizing their traditional philosophy and operations. This sixth edition provides the latest on policing in an information age, how the economy is impacting policing practices and new information concerning COPPS initiatives across the United States.

Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term "proactive policing" to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U.S. communities.
