"Our Mission was the people of Kandahar and keeping the Taliban from interfering with rebuilding. When we did use force, we had to be discriminate Killing innocent civilians would be mission failure. I had the A-Team ad could not make it work with lesser men and women." - Lieutenant-Colonel rob Walker, Commanding Officer, 2RCR Battlegroup "Our job is to create a functional government that earns the respect of its population. The people of Kandahar are not asking for life, liberty, and the pursuit of happiness. They want Canada's peace, order, and good government. We're getting there. But it takes time, Thankfully Afghans are more patient than people back home." - Gavin Buchan, Director, Foreign Affairs, Kandahar Provincial Reconstruction Team, 2006-07 "My soliders got to know every inch of Zharey District and its people. It was our back-yard. We knew it better than the Taliban, especially the foreign fighters. People learned to trust us and started staying in their homes while we rant he enemy out of town." - Major David Quick, India Company

In-computer editing is now as important as in-camera shooting; this book provides ingenious creative techniques to immediately enhance images through this medium. Presents 75 comprehensive workshops that have been specifically designed for photographers; each offers a clever and creative technique that can be immediately applied. Takes a specific, unique slant to provide a wide range of creative tips and tricks designed to appeal primarily to photographers, but also to other 'creatives' using the programme. From basic techniques to more advanced, all guidance is 'best practice' and shown via clear explanatory texts, photos, 'before, during and after' manipulations and screen grabs.

Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

A practical guide to programming for data acquisition and measurement - must-have info in just the right amount of depth for engineers who are not programming specialists. This book offers a complete guide to the programming and interfacing techniques involved in data collection and the subsequent measurement and control systems using an IBM compatible PC. It is an essential guide for electronic engineers and technicians involved in measurement and instrumentation, DA&C programmers and students aiming to gain a working knowledge of the industrial applications of computer interfacing. A basic working knowledge of programming in a high-level language is assumed, but analytical mathematics is kept to a minimum. Sample listings are given in C and can be downloaded from the Newnes website. Practical guidance on PC-based acquisition Written for electronic engineers and software engineers in industry, not academics or computer scientists A textbook with strong foundations in industry

The most practical and sensible way to implement ERM-while avoiding all of the classic mistakes Emphasizing an enterprise risk management approach that utilizes actual business data to estimate the probability and impact of key risks in an organization, Practical Enterprise Risk Management: A Business Process Approach boils this topic down to make it accessible to both line managers and high level executives alike. The key lessons involve basing risk estimates and prevention techniques on known quantities rather than subjective estimates, which many popular ERM methodologies consist of. Shows readers how to look at real results and actual business processes to get to the root cause of key risks Explains how to manage risks based on an understanding of the problem rather than best guess estimates Emphasizes a focus on potential outcomes from existing processes, as well as a look at actual outcomes over time Throughout, practical examples are included from various healthcare, manufacturing, and retail industries that demonstrate key concepts, implementation guidance to get started, as well as tables of risk indicators and metrics, physical structure diagrams, and graphs.

LPI Linux Certification in a Nutshell, Second Edition is an invaluable resource for determining what you need to practice to pass the Linux Professional Institute exams. This book will help you determine when you're ready to take the exams, which are technically challenging and designed to reflect the skills that administrators need in real working environments. As more corporations adopt Linux as the networking backbone for their IT systems, the demand for certified technicians will become even greater. Passing the LPI exams will broaden your career options because the LPI is the most widely known and respected Linux certification program in the world. Linux Journal recognized the LPI as the

best Training and Certification Program. The exams were developed by the Linux Professional Institute, an international, volunteer-driven organization with affiliates in a dozen countries. The core LPI exams cover two levels. Level 1 tests a basic knowledge of Linux installation, configuration, and command-line skills. Level 2 goes into much more depth regarding system troubleshooting and network services such as email and the Web. The second edition of LPI Linux Certification in a Nutshell is a thoroughly researched reference to these exams. The book is divided into four parts, one for each of the LPI exams. Each part features not only a summary of the core skills you need, but sample exercises and test questions, along with helpful hints to let you focus your energies. Major topics include: GNU and Unix commands Linux installation and package management Devices, filesystems, and kernel configuration Text editing, processing, and printing The X Window System Networking fundamentals and troubleshooting Security, including intrusion detection, SSH, Kerberos, and more DNS, DHCP, file sharing, and other networking infrastructure Email, FTP, and Web services Praise for the first edition: "Although O'Reilly's Nutshell series are intended as 'Desktop Reference' manuals, I have to recommend this one as a good all-round read; not only as a primer for LPI certification, but as an excellent introductory text on GNU/Linux. In all, this is a valuable addition to O'Reilly's already packed stable of Linux titles and I look forward to more from the author."--First Monday Shiva and Dionysus are the Hindu and Greek gods of magical power, intoxication, ecstatic sexuality, and transcendence who initiate us into communion with the creative forces of life. Revealing the earliest sources of the traditions of Shiva and Dionysus, Alain Danielou reconstructs the fabric of our ancient relationship with creation, vividly relating practices that were observed from the Indus Valley to the coasts of Portugal at least six thousand years ago.

"This book is the first its kind to offer an innovative examination of the intersecting influences, contexts, and challenges within the field of children's dark tourism. It also outlines novel conceptualizations and methods for scholarship in this overlooked field. Presently, tourism research, and in dark tourism specifically, relies primarily on adult-centered theories and data collection methods. However, these approaches are inadequate for understanding and developing children's experiences and perspectives. This book seeks to inform and inspire research on children's experiences of dark tourism. Designed to appeal to students and scholars, it brings together insights from leading experts. The book focuses on five themes, to explore the conceptual and historic origins of children's dark tourism, developmental contexts, child perspectives, specific contexts relevant to children's encounters, and methodological approaches. This book is aimed at an international array of scholars and students with inherent research interests in the contemporary commodification of death and 'difficult heritage' within the visitor economy. Thus, the book will provide a multi-disciplinary scope within the fields of history, heritage studies, childhood studies, psychology, education, sociology, human geography, and tourism studies. The volume is primarily intended for undergraduate and postgraduate study, as well as scholars and tourism professionals"--

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings.

Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Jayne Sparks e seus amigos Spike, Chase, Finn e Becky estão na iminência de uma guerra sangrenta e devem sofrer uma mudança, como crianças trocadas, para serem com identidades mágicas. Poderão se transformar em elfos, ninfas, daemons, incubos, anões e duendes verdes, querendo ou não aceitar suas novas identidades, desapareceu Tony, porém, alegando não ter agressividade suficiente para enfrentar a guerra com os Fae das Trevas, se afastou, deixando Jayne Sparks cheia de saudades e entristecida. Jayne recuperará seu ânimo, pois conhecerá novos personagens cativantes e estará engajada num treinamento em que sua natural liderança, por ser determinada e despachada, na situação colocará muitas dúvidas, e os novos personagens poderão revelar facetas inesperadas. Como será resolvida a questão entre os Fae da Luz e os Fae das Trevas? Poderão os amigos capazes de dar conta de uma missão tão espinhosa? Muitas respostas a estas perguntas, e outras tantas que foram provocadas pelo primeiro volume da série, aguardam os leitores. E surgirão novos e fascinantes enigmas.

Longarm fires up Hell's Half Acre! After U.S. Deputy Marshal Custis Long blasts a killer to hell in an epic gunfight, he seeks respite in Hell's Half Acre. Notorious beyond "Acre" features bullet-riddled corpses and scores of barely dressed women, drunks, gamblers, tin horns, outlaws, cowboys and tradesmen. What better place for a mars sooner than later, the bad guys in Hell's Half Acre need reminding that there's no rest for the wicked—or for the lawman known as Longarm who blows them to blazes. The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, smiled. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and boots to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chums. They had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line was all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you could get a "Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

In an ever-changing world, such as soccer's, only intelligence may truly help, since, besides being able to act effectively, it is essential to know how to think about the game. In the more recent years of modern soccer, the tactical component has been increasingly valued and diffused. Particularly in Brazil, this dimension of sport performance has been applied by many professionals of this field, from the youth academies to professional level. This book was conceived to help those who devote much of their time to the game, and to training highly enlightened, creative and intelligent players. Hence, this work presents procedures and ideas that, besides assisting in the task of evaluating the performance of soccer players and teams, also allow improving their expression throughout the learning and training phase.

This book provides a comprehensive source of information on freezing and frozen storage of food. Initial chapters describe the freezing process and provide a fundamental understanding of the thermal and physical processes that occur during freezing. Experts in each stage of the frozen cold chain provide, within dedicated chapters, guidelines and advice on how to freeze food and maintain its quality during storage, transport, retail display and in the home. Individual chapters deal with specific aspects of freezing relevant to the main food commodities: meat, fish, fruit and vegetables. Legislation and new freezing processes are also covered. Frozen Food Science and Technology offers in-depth knowledge of current and emerging refrigeration technologies along the entire frozen food chain, enabling readers to optimise the quality of frozen food products. It is aimed at food scientists, technologists and engineers within the frozen food industry; frozen food retailers; and researchers and students of food science and technology.

In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard

and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

The 9th Edition of this popular introductory text presents the essential concepts of safe anesthesia practice and reviews important clinical issues. Includes up-to-date coverage of topics of increasing importance in clinical practice, such as sevoflurane, transesophageal echocardiography, metabolic response to operation and trauma, and laryngeal mask airways. Also features new and revised tables, boxes and figures! Uses tables to summarize essential information for rapid access. Includes clinical samples that explain scientific information, making it easier for the reader to understand the direct application of basic science to medical practice. Features new, up-to-date coverage of topics of increasing importance to clinical practice, including those that have been added to ABA and RRC requirements for residencies and residents. Saves research time by providing information on anesthesia that is not conveniently available elsewhere in medical literature. Presents a chapter that describes the actual conduct of an anesthetic, explaining the thinking as well as the technical steps of a general anesthetic. Revised and updated throughout, including new authors, new topics of current interest (sevoflurane, transesophageal echocardiography, the metabolic response to operation and trauma, laryngeal mask and airways, and more), and easier-to-scan headings for each topic.
