

Comparison Paper

This book compares two countries with striking parallels in economic and political outcomes, yet with some distinct features in terms of institutional structures, relative size, and culture. Therefore, this book forms a fruitful platform for the study of the similarities and differences in the economic and societal development of Japan and Finland. Despite their geographic distance from one another and the aforementioned differences, both countries experienced rather similar economic and societal development patterns after the Second World War. The study of these societies both individually and through commonalities will provide a unique perspective on the emergence of modern economies and institutions. The book provides comprehensive coverage on issues such as welfare state formation and society, security and military spending, education system, industrial development, international trade, governmental economic policies, energy solutions, and bubbles and their collapse; thus, issues typical for these countries, as well as most modern states, studied from a longitudinal perspective. The book aims to answer a fundamental question in social science: Why do there seem to be common trends and developmental paths among countries differing in size, culture, and economic structure? This book will provide insights for those seeking to decipher how the developments in their own countries came about and where they may be headed to.

Includes the decisions of the Supreme Courts of Massachusetts, Ohio, Indiana, and Illinois, and Court of Appeals of New York; May/July 1891-Mar./Apr. 1936, Appellate Court of Indiana; Dec. 1926/Feb. 1927-Mar./Apr. 1936, Courts of Appeals of Ohio.

In 1901 the National Bureau of Standards (NBS) was founded to provide standard weights and measures and to be the national physical laboratory for the United States of America. The NBS conducted a lot of research in the fields of science and technology which were reported as "Technological Papers." In 1988 the NBS became what we know now; the National Institute of Standards and Technology (NIST). This is one of those documents written by employees of the NBS.

The purpose of the Review is to promote the collection, criticism, and interpretation of economic statistics, with a view to making them more accurate and valuable than they are at present for business and scientific purposes.

The present paper proposes a neutrosophic AHP completion methodology to reduce the number of judgments required to be emitted by the decision maker. This increases the consistency of their responses, while accounting for uncertainties associated to the fuzziness of human thinking. The method is applied to a sustainable-design problem, resulting in weight estimations that allow for a reduction of up to 22% of the conventionally required comparisons, with an average accuracy below 10% between estimates and the weights resulting from a conventionally completed AHP matrix, and a root mean standard error below 15%.

The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority.

This document provides a side-by-side comparison of the original Summary Report of "A Growth Policy for Indianapolis" with the proposed modifications made to the Report as a result of input from the community. The original text appears in the left-hand column and the revisions to that text in the right-hand column immediately to the right of the original section that was modified.

A Comparative Study of Paper Fillers

Parliamentary Papers

Seminar paper from the year 2006 in the subject English Language and Literature Studies - Comparative Literature, grade: 1.7, University of Duisburg-Essen, language: English, abstract: In the United Kingdom there are mainly two types of newspapers, namely the Quality Papers and the Tabloids. The question is in how far these two types of newspapers differ from each other, if they differ at all, and what the differences are, if any. How are Tabloids and Quality Papers defined and do they only differ in appearance or in content, too? To answer all these questions it is important to first give a definition of both newspapers and then to compare a typical Tabloid with a typical Quality Paper to make these distinctions obvious. To come to a clear conclusion it is important to focus on main aspects such as layout, language and reliability or seriousness.

The Review of Economics and Statistics

American-French Dialect Comparison

Excerpt from Comparison of American and Foreign Clays as Paper Fillers To judge the quality of a good day by feel or touch requires long experience, and a written description of such a method is, at best, inadequate. In general, however, it can be said that it has a greasy feel, adheres to the tongue when placed upon it, and disintegrates readily when mixed with water. Preliminary examination was made of 38 samples of clays, 18 of which were foreign and 20 domestic. The Clays were compared as to grit content, color, and plasticity and, considering these properties as well as the sources of the days, eight representative samples were selected for paper-making tests. Clays numbered 1 to 5 are of domestic origin; numbered 6 to 8 are foreign. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work.

Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
