Complete, Unabridged Guide to Babe Ruth. Get the information you need—fast! This comprehensive guide offers a thorough view of key knowledge and detailed insight. It's all you need. Here's part of the content - you would like to know it all? Delve into this book today!... : (February 6, 1895 - August 16, 1948), best known as Babe Ruth and nicknamed the Bambino and the Sultan of Swat, was an American baseball player who spent 22 seasons in Major League Baseball (MLB) playing for three teams (1914-1935). ...Probably his deepest hit in official game play (and perhaps the longest home run by any player), occurred on July 18, at Detroit's Navin Field, in which he hit one to straightaway center, over the wall of the then-single-deck bleachers, and to the intersection, some 575 feet (175 m) from home plate. ...The team won a then AL-record 110 games, a mark for a 154-game season surpassed by the 1954 Cleveland Indians (the 2001 Seattle Mariners now hold the record with 116 wins, though they played eight more games), took the AL pennant by 19 games, and swept the Pittsburgh Pirates in the World Series. ... In 1930, which was not a pennant year for the Yankees, Ruth was asked by a reporter what he thought of his yearly salary of \$80,000 (\$1.11 million in current dollar terms) being more than President Hoover's \$75,000. There is absolutely nothing that isn't thoroughly covered in the book. It is straightforward, and does an excellent job of explaining all about Babe Ruth in key topics and material. There is no reason to invest in any other materials to learn about Babe Ruth. You'll understand it all. Attilio Teruzzi, Mussolini's commander of the Black Shirts, exemplified fascism's obsession with male strength. Through the story of his broken marriage to a young Jewish American opera star, Victoria de Grazia explores the cult of masculinity on which the New Rome was to be built, revealing the seductive appeal of fascism.

With the rise of genomics, the life sciences have entered a new era. This book provides a comprehensive history of mapping procedures as they were developed in classical genetics. An accompanying volume - From Molecular Genetics to Genomics - covers the history of molecular genetics and genomics. The book shows that the technology of genetic mapping is by no means a recent acquisition of molecular genetics or even genetic engineering. It demonstrates that the development of mapping technologies has accompanied the rise of modern genetics from its very beginnings. In Section One, Mendelian genetics is set in perspective from the viewpoint of the detection and description of linkage phenomena. Section Two addresses the role of mapping for the experimental working practice of classical geneticists, their social interactions and for the laboratory 'life worlds'. With detailed analyses of the scientific practices of mapping and its illustration of the diversity of mapping practices this book is a significant contribution to the history of genetics. A comprehensive and challenging analysis of the British defence of Egypt, primarily against fascist Italy, in the critical lead-up period to the Second World War. Culminating in the decisive defeat of the Italian military threat at Sidi Barrani in December 1940, this is a fascinating new contribution to the field. The security of Egypt, a constant of British imperial strategy, is a curiously neglected dimension of the still burning appeasement debate. Steven Morewood adds to the originality of his interpretation by suggesting the old view should be reinstated: that Mussolini should and could have been stopped in his empire-building at the Abyssinian hurdle. Thereafter, as Nazi Germany tore the Versailles peace settlement to shreds, the drift to war accelerated as British resolve and credibility were brought into question. The fascist dictators in Rome and Berlin held no respect for weakness and Mussolini became the conduit through which Hitler could apply pressure to a sensitive British interest through reinforcing Libya at critical moments.

This volume emerges from a session honoring Walter E. Rast and R. Thomas Schaub held during the 2003 Annual Meeting of the American Schools of Oriental Research in Atlanta, Georgia and includes expanded versions of many of the papers presented in that session. By gathering in Atlanta, and by participating in this volume, the contributors honor the careers and scholarly passions of Walt and Tom, whose work in southern Levantine archaeology began in the 1960s when they were young scholars working with Paul Lapp. The breadth and depth of experience of the contributors' disciplinary and theoretical interests reflects the shared influence of and esteem for Walt's and Tom's own scholarly gifts as archaeologists, mentors, collaborators, and intellectual innovators. The primary disciplinary "homes" for the scholars contributing to this volume encompass a broad range of methods and approaches to learning about the past: anthropological archaeology, Near Eastern archaeology, biblical archaeology, and physical anthropology. Their institutional "homes" include universities and institutes in Canada, Denmark, Israel, Jordan, Sweden, the United Kingdom, and the United States; their theoretical "homes" include the broadly-conceived archaeological frameworks of culture-history, processualism, and post-processualism. Collectively, these papers reflect the enormous breadth of influence that Tom's and Walt's scholarly contributions have made to EB studies. Walt and Tom shared a gift that many have benefited from: gentle listening, questioning, and pushing for more sophisticated analyses of Early Bronze Age life. Their eager engagement of younger scholars, as well as their involvement with their peers, arises from their dedication to listening well, devoting time to others' ideas and perspectives, and a generous willingness to give freely to others out of the rich depths of their lifelong scholarly pursuits and profound understanding of the Early Bronze Age, archaeology, and life in general. Many of the contributors to this volume have gained greater understanding because of Walt's and Tom's gift of listening, keen insights, and bottomless enthusiasm for learning more about the past and the present in the southern Levant. The 18 essays presented here are to honor both men for these gifts both to the discipline of archaeology and to so many of us engaged in that intellectual endeavor.

James Thurber's unique ability to convey the vagaries of life in a funny, witty, and often satirical way earned him accolades as one of the finest humorists of the twentieth century. A bestseller upon its initial publication in 1945, The Thurber Carnival captures the depth and breadth of his talent. The pieces here, almost all of which first appeared in The New Yorker, include selections from such beloved classics as My World and Welcome to It, The Owl in the Attic, The Seal in the Bathroom, and Men, Women and Dogs. Thurber's take on life, society, and human nature is timeless and will continue to delight readers even as they recognize a bit of themselves in his brilliant sketches.
