The bestselling book revealing why  
Americans are so fearful, and why

we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in

exceptionally perilous times? In his bestselling book *The Culture of Fear*, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and

organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating

the prevalence of particular diseases;  
TV shows that create a new scare  
every week to garner ratings.

Glassner spells out the prices we pay  
for social panics: the huge sums of  
money that go to waste on  
unnecessary programs and products

as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current
