

Contemporary Financial Management 13th Edition

Knowing what to do with your money is more important than ever. Billingsley/Gitman/Joehnk's market-leading PERSONAL FINANCIAL PLANNING, 14E, provides the tools, techniques, and understanding you need to define and achieve your financial goals. You will find the numerous practical examples, illustrations, and reliance on common sense that is engaging and refreshingly concrete. Features such as You Can Do It Now, the Financial Impact of Personal Choices, Financial Fact or Fantasy, Financial Planning Tips, Financial Road Signs, and Behavior Matters keep the material relevant and vital to facing a life time of important personal financial decisions. The 14th edition is packed with information relevant to you--for example, changing spending habits for the better, knowing the right questions to ask a financial adviser, using tips on budgeting and planning for retirement, knowing what to look for when choosing a bank, knowing whether to buy or lease a car, knowing what's important when buying your first home, and choosing the right credit card. All-new features teach you to use today's critical financial tools and technology, including financial planning software. CFP practice questions provide valuable practice. The 10th anniversary edition, with new chapters on the crash, Chimerica, and cryptocurrency "[An] excellent, just in time guide to the history of finance and financial crisis." —The Washington Post "Fascinating." —Fareed Zakaria, Newsweek In this updated edition, Niall Ferguson brings his classic financial history of the world up to the present day, tackling the populist backlash that followed the 2008 crisis, the descent of "Chimerica" into a trade war, and the advent of cryptocurrencies, such as Bitcoin, with his signature clarity and expert lens. The Ascent of Money reveals finance as the backbone of history, casting a new light on familiar events: the Renaissance enabled by Italian foreign exchange dealers, the French Revolution traced back to a stock market bubble, the 2008 crisis traced from America's bankruptcy capital, Memphis, to China's boomtown, Chongqing. We may resent the plutocrats of Wall Street but, as Ferguson argues, the evolution of finance has rivaled the importance of any technological innovation in the rise of civilization. Indeed, to study the ascent and descent of money is to study the rise and fall of Western power itself.

ACCOUNTING: Text and Cases, 10/E is a 28 chapter book. Chapters 1-14 cover financial accounting, while Chapters 15-21 cover management accounting, and Chapters 22-28 focus on broader issues of control and corporate strategy. The approximately 120 cases that largely make up the end-of-chapter material are a combination of classic Harvard style cases, as well as extended problems. New to this edition is the inclusion of 2-3 problems per chapter. These problems, while not as involved as the case material, allow the students to exercise the concepts demonstrated in each chapter. The goal of the problem material is to provide a transition to the case material, which is a response to customer requests.

Financial Accounting Theory and Analysis: Text and Cases, 13th Edition illustrates how accounting standards impact the daily decisions of accounting professionals. This authoritative textbook shows how accounting theory explains why particular companies select certain accounting methods over others, and predicts the attributes of firms by analyzing their accounting methods. The text examines empirical research relevant to various theories of accounting and the uses of accounting information, including the fundamental analysis model, the efficient markets hypothesis, the behavioral finance model, the positive accounting theory model, the human information processing model, and the value creation model. Enabling students to develop an informed perspective on accounting theory, the text reviews the development and current state of accounting theory and summarizes current disclosure requirements for various financial statement items. The new edition has been fully revised to reflect current methods of accounting education, including the incorporation of ethics into the curriculum, the analysis of a company's quality of earnings and sustainable income, the use of the internet as a source of information, the international dimensions of accounting, and more. Designed for undergraduate and graduate accounting majors, the text aligns with the latest curriculum changes in the CPA exam.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. A supplementary text for a variety of Business courses, including Financial Statement Analysis, Investments, Personal Finance, and Financial Planning and Analysis & An Analytical Approach to Understanding and Interpreting Business Financial Statements & Understanding Financial Statements improves the student's ability to translate a financial statement into a meaningful map for business decisions. The material covered in each chapter helps students approach financial statements with enhanced confidence and understanding of a firm's historical, current, and prospective financial condition and performance. The Eleventh Edition includes new case studies based on existing companies and enhanced learning tools to help students quickly grasp and apply the materials. Fraser and Ormiston presents material in an engaging fashion that helps readers make sense of complex financial information, leading to intelligent (and profitable!) decision-making.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as

human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. In this latest edition of Sales Force Management, Mark Johnston and Greg Marshall continue to build on the tradition of excellence established by Churchill, Ford, and Walker, increasing the book's reputation globally as the leading textbook in the field. The authors have strengthened the focus on managing the modern tools of selling, such as customer relationship management (CRM), social media and technology-enabled selling, and sales analytics. It's a contemporary classic, fully updated for modern sales management practice. Pedagogical features include: Engaging breakout questions designed to spark lively discussion Leadership challenge assignments and mini-cases to help students understand and apply the principles they have learned in the classroom Leadership, Innovation, and Technology boxes that simulate real-world challenges faced by salespeople and their managers New Ethical Moment boxes in each chapter put students on the firing line of making ethical choices in sales Role Plays that enable students to learn by doing A selection of comprehensive sales management cases on the companion website A companion website features an instructor's manual, PowerPoints, and other tools to provide additional support for students and instructors.

Arguably the strongest addition to numerical finance of the past decade, Algorithmic Adjoint Differentiation (AAD) is the technology implemented in modern financial software to produce thousands of accurate risk sensitivities, within seconds, on light hardware. AAD recently became a centerpiece of modern financial systems and a key skill for all quantitative analysts, developers, risk professionals or anyone involved with derivatives. It is increasingly taught in Masters and PhD programs in finance. Danske Bank's wide scale implementation of AAD in its production and regulatory systems won the In-House System of the Year 2015 Risk award. The Modern Computational Finance books, written by three of the very people who designed Danske Bank's systems, offer a

unique insight into the modern implementation of financial models. The volumes combine financial modelling, mathematics and programming to resolve real life financial problems and produce effective derivatives software. This volume is a complete, self-contained learning reference for AAD, and its application in finance. AAD is explained in deep detail throughout chapters that gently lead readers from the theoretical foundations to the most delicate areas of an efficient implementation, such as memory management, parallel implementation and acceleration with expression templates. The book comes with professional source code in C++, including an efficient, up to date implementation of AAD and a generic parallel simulation library. Modern C++, high performance parallel programming and interfacing C++ with Excel are also covered. The book builds the code step-by-step, while the code illustrates the concepts and notions developed in the book.

The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.
