

Controlling And Preventing Fires At Compost Facilities

Excerpt from Fire Control Notes, Vol. 21: A Periodical Devoted to the Technique of Forest Fire Control; October, 1960 Director, Division of Fire Control, U. S. Forest Service, Washington, D. C. I welcome the opportunity to meet with you to consider the very important subject of railroad fire prevention. Fire prevention, like the frequency of man-caused fires, has its ups and downs. Apparently we are in an up period nationally. All protection agencies taken collectively have had an upsurge in man-caused fires

File Type PDF Controlling And Preventing Fires At Compost Facilities

during the past 2 years. Many explanations are given for this but it would be difficult to be certain of the true cause. Apparently, there is no one cause but several. This up swing in man-caused fires has focused renewed attention on fire prevention. We are beginning some fire prevention research aimed at trying to determine the exact cause for fires, the reason behind the cause, and at trying to evaluate the various prevention efforts now used with all man-causes. We look forward to the time when application of increased knowledge and improved methods will greatly reduce fires within the forests. We hope railroad fires will follow this path. Recent experience on the national forests has been encouraging. Railroad fires have been of concern to the Forest Service since

we were given the job of protecting the national forests nearly 60 years ago. Fires from railroad causes were very common in western national forests in the early days. Not much attention was paid to either suppression or prevention in those times. As we were able to greatly reduce the acreage burned and resulting damages through better fire control, we began to give more attention to preventing all fires. We recognize that the best fire is the one that never happens. This emphasizes prevention. In examining the fire record of the national forests for the past 10 years, I note that there has been a general reduction in railroad fires, but the pattern by regions and national forests is irregular. For example, for the 5-year period 1949-54 there were railroad fires on

the national forests. For the next 5 years this had dropped to 604 or to nearly one-half. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

File Type PDF Controlling And Preventing Fires At Compost Facilities

As a veteran FDNY firefighter and commander in Midtown Manhattan, Deputy Chief Vincent Dunn has led the call against all manner of fires and emergencies. This book crystallizes his decades of command experience. As a practical guide, it serves as an operational blueprint for today's fireground managers, in the urban environment and elsewhere. It will help prepare those who aspire to take command in an increasingly complex world, answering the alarms that will ring tomorrow. Among the many subjects covered in this text: command presence; life-and-death decision making; developing
