David Pichaske has been writing and teaching about midwestern literature for three decades. In *Rooted*, by paying close attention to text, landscape, and biography, he examines the relationship between place and art. His focus is on seven midwestern authors who came of age toward the close of the twentieth century, their lives and their work grounded in distinct places: Dave Etter in small-town upstate Illinois; Norbert Blei in Door County, Wisconsin; William Kloefkorn in southern Kansas and Nebraska; Bill Holm in Minnesota, Minnesota; Linda Hasselstrom in Hermosa, South Dakota; Jim Heynen in Sioux County, Iowa; and Jim Harrison in upper Michigan. The writers' intimate knowledge of place is reflected in their use of details of geography, language, environment, and behavior. Yet each writer reaches toward other geographies and into other dimensions of art or thought: jazz music and formalism in the case of Etter; gender issues in the case of Hasselstrom; time past and present in the case of Kloefkorn; ethnicity and the role of the artist in the case of Blei; magical realism in the case of Heynen; the landscape of literature in the case of Holm; and the curious worlds of academia, best-selling novels, and Hollywood films in the case of Harrison. The result, Pichaske notes, is the growing away from roots, the explorations and alter egos of these writers of place, and the tension between the "here" and "there" that gives each writer's art the complexity it needs to transcend provincial boundaries. Quoting generously from the writers, Pichaske employs a practical, jargon-free literary analysis fixed in the text, making *Rooted* interesting, readable, and especially useful in treating the literary categories of memoir and literary essay that have become important in recent decades.

Science and Convention: Essays on Henri Poincare's Philosophy of Science and The Conventionalist Tradition contains essays concerned with Henri Poincare's philosophy of science, physics in particular, and with the conventionalist tradition in philosophy that he revived and reshaped, simultaneously with, but independently of, Pierre Duhem. Separating five essays as chapters, the book discusses the main ideas of the philosophy (Essays 1 and 5), traces at least some of its historical background (Essays 1, 2, and 3), and provides some of its developments (Essays 2 and 4).

Menander (342 - 293 BC) was the greatest dramatist of Greek New Comedy, which has influenced the course of Western drama both in its realism and romanticism. And yet until a large part of his comedies came to light in papyri discovered in Egypt in 1908, his influence was exercised almost entirely through his Latin adapters, Plautus and Terence. This book offers an appreciation of Menander's work based on his own writings. It explores the many sides of Menander's dramatic art, emphasizing the versatility and originality of his plays, achieved both within and sometimes in the face of a well-established comic tradition and the conservative expectations of his audience.

This book surveys several theoretical controversies in anthropology that revolve around reconciling the objective description of culture with the influence of inquirer interests and conceptions. It relates them to discussions by followers of W.V. Quine who see the problems of anthropological inquiry as indicative of conceptual problems in the basic assumptions operative in the discipline, and in the study of language in general. Feleppa offers a revised view of the nature and function of translation in anthropology that gives a plausible account of the problems that traditional semantics introduces into anthropology, while avoiding the severe methodological import Quine envisions.

The archaeology enthusiast will find this versatile guide contains treasure trove of information. A generous collection of black and white photos are scattered throughout this handy book, along with detailed maps, lodging and dining suggestions, and a broad listing of additional local points of interest. The volume's brief introductory chapters offer an overview of the archaeology of the Upper Midwest and explore the symbols and meanings of intricate rock art and effigy mounds. Eighty-five dedicated archaeology parks exist in Minnesota, Wisconsin, Iowa, and northern Illinois. Wisconsin alone contains sixty-three of these outstanding parks. From Effigy National Monument in Iowa to the privately held Henschel Mounds in Wisconsin, this magnitude of managed sites is exceeded only by the abundance of archaeology sites found in the American Southwest.

This study scrutinizes one of the main agreements to come out of the Earth Summit of June 1992, the Climate Change Convention. It explains how the Convention affects the national interests of all countries involved, and its impact on most areas of economic activity, such as industrial activity, transport, agriculture and energy policies. The authors also

analyze the substance of negotiations about the Convention and the processes of legislation and diplomacy involved.

Adoption of the Northwest Ordinance in 1787 ended a long and sometimes acrimonious debate over the question of how to organize and govern the western territories of the United States. Many eastern leaders viewed the Northwest Territory as a colonial possession, while freedom-loving settlers demanded local self- government. These essays address the ambiguities of the Ordinance, balance of power politics in North America, missionary activity in the territory, slavery, and higher education in the Old Northwest.

Seven Midwest Writers of Place

In the late 1940s and early 1950s a new kind of detective story appeared on the scene.

This was a story in which the mystery is solved by regular police detectives, usually working in teams and using ordinary police routines. This kind of narrative is customarily called the "police procedural" story. And it is the subject of this book.

Though there has been numberless writers of these stories, there has never been a book of criticism before.
