Lots of books have been written about how to manage pay per click campaigns. This is not one of them. This book tells you how to avoid having to manage one, yet still get all the benefits of this powerful marketing tool. Pay Less Per Click is for people who want to succeed at search engine marketing without personally doing the hard work or spending a fortune on Internet marketing experts. This book gives you a good shortcut. Like all "good" shortcuts, our aim is to take you where you want to go without spending extra money or sacrificing results. For over 20 years I operated a full-service advertising agency. I worked with hundreds of clients and utilized about every kind of marketing tool you could imagine, from direct mail to television to outdoor to newsletters. At one time I had 10 employees. One day I put a client on Google Adwords, those small, three-line text ads on search engines. You only pay when someone clicks to your website. Then I put another client on Google Adwords, then several more. Soon I realized that I was able to get far better results for my clients all by myself using Google Adwords than with all my employees using a full arsenal of marketing tools. I never looked back. While paying only when you get a click sounds good, the other side of that coin is that a click costs money. A click is not really a lead, it's just a visit to a website. I realized it would be great if there were a way to reduce clicks from less effective searches and focus on those keywords most likely to result in a lead. Then I discovered BlueRaptor, a technology that made it easy to put my advertisers not just on Google, but on all the major search engines with a single campaign. It also tracked actual leads! Not just clicks, but phone calls, email requests, downloads any action taken by prospects! This was a major improvement! Since real leads could be tracked, it was also possible to see which keywords were producing leads! Ad dollars could be focused to give my advertisers their best possible return on investment. Not being a big risk taker when it comes to my clients' money, I gradually moved clients, one at a time, from my personal management of their Google Adwords campaign to BlueRaptor's computerized management system. Every one of my clients improved their results most saw dramatic improvements. They got more clicks for their money; we could track results and we even got contact information for most all of the leads. You've probably never heard of BlueRaptor. But it's time you did. This guide will help you successfully utilize this incredible shortcut to pay per click advertising.

A data-driven way to make smarter decisions every day: "One of the smartest conversion gys I know" (Perry Marshall, author of The Ultimate Guide to Google AdWords). Failure Is Obsolete reveals an easy-to-use formula for testing high-risk ideas in a low-risk environment, providing increased likelihood of success before you waste a lot of time and money moving in the wrong direction. Be more confident in your business decisions—from creating new products to hiring employees and launching new marketing campaigns—as well as personal decisions like dating or choosing a retirement home. This useful strategy evolves from the author's years of experience in conversion rate optimization, helping companies improve their websites and marketing funnels so they make more money. In addition, Failure Is Obsolete reveals some of Benji Rabhan's best conversion techniques that readers can use on their own websites.

Conversions begin in the brain. Every purchase starts with a decision, and every decision is shaped by consumer psychology. This book explains how mental shortcuts (cognitive biases) affect your customers' decision making and shows you how to be more persuasive online. Philippe Aimé and Jochen Grünbeck are optimisation addicts and have been at the forefront of digital marketing since the beginning. Inspired by behavioural economists like Daniel Kahneman, Dan Ariely and Richard Thaler, the techniques described in Smart Persuasion leverage powerful decision-making biases to make marketing more effective. Alongside these behavioural insights, Smart Persuasion incorporates research from marketing experts such as Jonah Berger, Robert Cialdini and Roger Dooley. Principles relating to attention and perception, as well as the cognitive effects that make consumers predictably irrational, are distilled into concrete website optimisation strategies. Drawing from hundreds of unique studies, Smart Persuasion lists proven effects such as Anchoring and Framing. Each one is illustrated with case-studies, examples and ideas that you can apply immediately. Using the persuasive strategies outlined in this book will allow you to influence consumers more effectively, unlocking your website's potential.
